Lancaster Farming, Saturday, April 24, 1976

\$3.00 Per Year

One of the nation's outstanding spokesmen for agriculture, Henry Holloway, right, looks over some of his beef cattle with four-year old son, Andy, and brother, Richard. The Holloways farm approximately 700 acres in partnership and produce beef cattle and hogs. The ag spokesman has made numerous TV appearances and has been the subject of many newspaper stories.

Farmers' story being publicized

By DIETER KRIEG
DARLINGTON, Md. — Henry Holloway has been on a whole bunch of TV shows, has made headlines in newspapers, and confronted both consumer groups and union leaders. But he hasn't done all that because he likes the limelight, but rather because he wants non-farmers to know about agriculture.

It all started three years ago when a group of women who called themselves "Housewives Against Rising Prices" started to capture some publicity with their remarks about rising meat prices.

Holloway, who in partnership with his brother, Richard, raises hogs and beef cattle, didn't think the ladies from Fallston had all the facts, so he decided to call up the leader of the pack and attempt to straighten her out.

To his surprise, the lady invited him out to their next meeting so he could tell his side of the story.

A likeable fellow with an innate sense of humor, Holloway recalls how he became a little nervous about what he had gotten himself into.

"So I thought of the biggest farmer I could think of, both physically and otherwise, to help me out," the witty farmer said. That was Lawrason Sayre, an engineer turned farmer

whom Holloway describes as a big fellow who excelled athletically and academically at Yale. Together they confronted the 75 women who were looking for someone to blame for

high prices. They were in for some surprises.

Cameramen from a Baltimore TV station were there to record the activity for a newscast.

Holloway told the group to

come down to an "honest-to-goodness farm, instead of sitting around in a development."

The ladies accepted the invitation and came to Holloway's property where

they were taken on a tour and given a thorough explanation of what's involved in producing beef and pork. Again, to his surprise, the ladies didn't come by themselves — they were

accompanied by TV cameramen, more housewives, and children.

All this eventually snowballed until Holloway was making headlines in the papers and invited to make TV appearances in Baltimore. At one point he was even in attendance at a meat cutters' union meeting. "That was really something," the trim farmer recollected. "They had body guards all over the place, and cars were checked for bombs — it gave you a funny feeling."

Prior to each TV ap-

Hospital farms controversial

Editor's Note: More than 6400 acres of farm land currently operated by eight state hospitals may be up for grabs in the coming months because the Welfare Department claims the farms are losing money. The

issue is creating somewhat of a controversy and was the subject of a symposium held in Harrisburg last Tuesday. Pennsylvania Agriculture Secretary Raymond Kerstetter, Grange legislative chairman Charles Wismer

Jr., and State Representative Kenneth Brandt, among others, made their opinions known at the day-long meeting. Following are summaries of statements made by Kerstetter and Wismer and remarks made

by Brandt in a telephone interview with this newspaper.

HARRISBURG — Appearing before the House Agriculture Committee,

Dairy judges win state event

By MELISSA PIPER
LANCASTER — Cloister FFA members, representing Ephrata High School, captured three top place awards in the State Invitational Dairy Judging

Contest held earlier this month, at Penn State. Cloister's B Team scored a total of 1,561 points to top the field of 39 teams from all across the Commonwealth. Members of the first place

team were Bob Fox, Linford Frey, Kevin Smoker and Mark Weiler.

Third place honors went to Cloister's A team with members John Weiler, Curtis Martin, Cliff Martin

and Cheryl Bollinger competing. Fourth place in the contest was also won by a Cloister Team. The "C" team consisted of Larry

Milk jugger tells his story

By DIETER KRIEG
CAMPBELLTOWN — "Farming is one business — working with the public that's another," Marlin Hitz began, as he was about to reveal many of the hurdles he encountered prior to his

family going into the milk "jugging" market.

"I never realized there could be so much red tape, so many regulations, and so many inspections," he continued. Preparations,

including zoning, take about a year and all permits have to be approved before a shovel of ground can be turned. "The government is not in any hurry," Hitz remarked. He has seven licenses on display in the

dairy store and a few others elsewhere.

One of those licenses is for food handling which is required in his case since his "Dol-Mar Dairy Store" dips

For Over 80 Years
A Company You Can Trust
& Have Faith In

Your Commission Man

I've observed the marketing of livestock for 25 years. During this time I have come to recognize the honesty and integrity of the commission man. No group of business men are more honest in their dealing with their customers. Oh, of course, their judgment is faulty in some rare cases. Their advice to customers at times does not prove out. But, all in all their intent is honest.

When a farmer does not receive his expected price for his livestock on the market, oft times the commission man has been blamed. Markets are very unpredictable. The absence of a certain buyer for a certain kind of animal will make quite a difference in price realized in the sale.

A case in point, last week packer-buyers scoured the country buying cattle at prices \$2-\$3.00 under what came to be market price at Lancaster. As a result thousands of dollars were lost to the farmer who sold direct.

There is example after example where one firm of commission men have cared for the livestock interests of a farmer year in and year out. The commission man advises the farmer when to sell. He sorts his cattle for sale. When replacements are needed, he buys feeder cattle for the farmer. In general this farmer must take the ups and downs of the livestock market. But, when all is said and done, feeding livestock has returned these farmers a lucrative existence - they have been well paid for their efforts.

In payment of livestock, I've watched the commission man pay for his daily consignments many times with borrowed money. I've watched him take his loss when customers have failed to pay for their purchases. I've watched him sell feeder cattle at a loss to get rid of old stock to replace with new.

If testimony be given on behalf of the honesty of the commission man, I for one, after years of observance of the livestock marketing scene, can say he is a dedicated representative of the farmer in the marketing of his livestock.

Your LIVESTOCK PRODUCTIVITY, your PROFITABILITY.

That's what
Pennfield people
care about.

Successful, high yield livestock feeding programs don't just happen. It takes superior products and interested people giving excellent service to make them work.

Sure, some companies approach the quality of Pennfield's formulations. A few companies even offer some of the same technical services as Pennfield (although Pennfield is the only local company with modern laboratory facilities), and you'll find some dedicated, concerned people in most any company.

But, no one puts all three ingredients together as completely and successfully as Pennfield Feeds. Pennfield people combine Pennfield products and services into the kind of complete livestock feeding and farm management programs that result in higher yields, planned growth, and increased profit for Pennfield customers.

Chemists, nutritionists, production personnel, veterinarians, computer technicians, business and marketing analysts, deliverymen, quality control specialists, financial experts, and more . . . led by your Pennfield Area Manager who can put them all together to develop and service a customized, profit-oriented program for you. These are Pennfield people. And, Pennfield people make Pennfield Feeds a better buy!

Want to know how Pennfield people can work for you to improve your yields and profit? Complete and mail this coupon for a no obligation survey.

PUT WATER WHERE IT'S NEEDED WATERMASTER 3

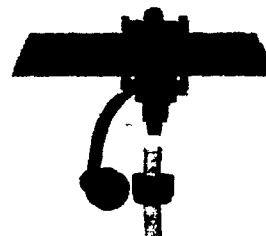

Moulded from polyethylene for ease of cleaning and maximum life. The Watermaster 3 has been designed for use by broilers, pullets, layers and turkeys from day-old onwards.

The special anti-perch shape prevents birds from fouling the drinker and in this, the big brother of the world renowned Watermaster 2, the 15 in diameter offers greater drinking space. The valve system is extremely simple to ensure continuous water supply. The large flat filter is easily removed for cleaning and all fittings are self-sealing with no 'O' rings or washers needed. Watermasters are supplied complete with the BEC saddle connector, 10ft. of tubing and suspension. The recommended stocking rate is 10 to 14 waterers per 1000 birds.

The Bec 75 Waterer:

- 1 Takes up less room in the house more room for the birds.
- 2 It is distribution that counts - more drinking points, for the same money, means that the birds have less distance to walk to water.
- 3 Lighter and more convenient to handle and clean.
- 4 At the end of the crop, easy to empty house - one person can carry 50 to 100 waterers.
- 5 Easy Connections: a) Saddle connector (see inset). b) Tube fittings (see inset) c) new easy method of raising and lowering the waterer with hanger box.

Saddle Connector

SHEEP 52. Couple Choice 15 lbs. spring slaughter lambs at 135.00, Choice 40-90 lbs. 55.00-65.00. Slaughter ewes 14.00-21.00.

April 21
Weekly 51 Cattle

Compared with the previous week's close: slaughter steers and heifers were unevenly 50-1.50 higher through midweek, some steers 2.00 higher as feeder buyers competed aggressively for those suitable for a short turn in the feedlot. However, limited late sales little better than steady under a dull late demand. Cows firm to 50 cents higher, bulls weak to 1.00 lower. Fleshy two-way feeder steers were firm to 50 cents higher.

The fed cattle trade followed a very irregular course as it proved unusually sensitive to the rapid undulations of erratic carcass trading, with day-to-day price variations often substantial.

Steers made up approximately 37 percent, heifers 29 percent, cows 10 percent, and feeders 22 percent.

STEERS: At midweek high time, two loads and part loads Choice and Prime 3-4 1156-1314 lbs. 46.50 in early trading. Three loads same grade 3-4 1154-1291 lbs. 45.25-45.50. Choice 2-4 1000-1275 lbs. mainly 45.00-46.00 early Wednesday, closing sales 44.50-45.00, load 3-5 1300 lbs. 43.50. Few late sales low and average-choice 1025-1200 lbs. 2-4 43.00-44.50. Mixed Good and Choice 2-3 975-1250 lbs. 43.50-45.00, Good 2-3 40.50-44.00, standard and low-good 2-3 39.00-40.50.

Average of LS-214, detailed quotations, for Choice 900-1100 lb. steers this week 44.60, choice 1100-1300 lbs. 44.50. Average weight steers this week 1144 lbs. as compared 1134 lbs. previous week. Average weight heifers 984 lbs. as compared 983 lbs. previous week.

HEIFERS: Four loads Choice and Prime 3-4 937-1227 lbs. 45.00, load same grade 1126 lbs. 3-4 44.50. Choice 2-4 875-1050 lbs. 43.00-44.50, few late sales 42.00-42.50. Mixed Good and Choice 2-3 800-1000 lbs. 41.50-43.50. Good 2-3 38.00-40.50. Small lots Standard and Good 2-3 35.50-37.50.

COWS: Utility and Commercial 2-3 29.50-33.00. Canner and cutter 24.50-29.50, mixed Cutter and Utility 29.75-30.00.

BULLS: 1-2 1400-1800 lbs. 34.00-39.00, few 39.50-40.00.

POLE BUILDING CONSTRUCTION

This one-of-a-kind book will save you money, labor, time and materials in building a small home, barn or other structure. **NEWLY REVISED AND ENLARGED EDITION** includes PLANS FOR A SMALL BARN, GARAGE, TOOL SHED, SPLIT-LEVEL HOME along with 40 other drawings and plans. Covers also basic building instructions, patented fasteners, heating diagrams, electrical wiring. Do it yourself with this clearly written book! Large-sized quality paperback, \$4.95 plus 50¢ postage and handling. Ask for **POLE BUILDING CONSTRUCTION**. Send to: **GARDEN WAY PUBLISHING CO., Dept. 64434** Charlotte, Vermont 05445.

SOYBEAN ROASTING ON YOUR FARM

For peak feeding value have your soybeans roasted. (To kill toxic enzymes in raw soybeans.)

1. Roasted soybean (not just cooked), increased digestibility by 15 percent.
2. Increased weight gain for beef & hogs.
3. Increased butterfat in milk & egg production.
4. Improved animal health, reduced vet bill.
5. Eliminates hauling to the mill & back to farm.
6. Feed your own grown grain. (Not exchanged with others)
7. Beans remain whole. Store for months without losing any feeding value.

THE OLD FARMER'S ALMANAC

APRIL 26-May 2, 1976

Yonder forest wears again its native hue.

Set fruit trees now . Casey Jones killed in Mississippi April 30, 1900 . New moon May 29 . Annular Eclipse of the sun April 29 (not visible from continental US) . Wild pear now in bloom . Average length of days for the week, 14 hours, 2 minutes . Japanese Peace Treaty signed April 29, 1952 . We overlook so much happiness because it costs nothing

Old Farmer's Riddle: What President had false teeth made of ivory? (Answer below.)

Ask the Old Farmer: Could you tell me why they call them the "Horse" Latitudes? H.H., N.Y.C.

The Horse Latitudes are also called the Belt of Calms. Sailors on Spanish ships carrying horses to the New World centuries ago often had to kill their horses and throw them overboard because they ran short of water waiting for wind in these latitudes.

Home Hints: The next time you wash the cover of your ironing board, tack the cover on while it is damp and it will be a tight, smooth fit when dry.
Riddle answer: At the close of the Revolutionary War, a French dentist made George Washington false teeth carved from rhinoceros ivory.

OLD FARMER'S WEATHER FORECASTS

New England: Cool with showers at first, then clearing and mild, clear, sunny and warm latter part, but rain beginning on coast at week's end.

Greater New York-New Jersey: Week begins partly cloudy and showery, then clearing and warmer, clear and seasonable latter part, but storm arriving by end of week.

Middle Atlantic Coastal: Scattered showers and very cool to start, then clear and mild, week ends clear and mild inland, rain starting near coast.

Piedmont & Southeast Coastal: First part of week clear and mild, then cold with light to heavy rain; latter part cloudy and cooler than normal, rain on northeast coast by week's end.

Florida: Early week partly cloudy and cooler, with scattered heavy showers in central and north, thundershowers and cool latter part.
Upstate N.Y.-Toronto & Montreal: Week begins with rain in north and west, then clear and unseasonably warm throughout the region rest of week.

East Coast Carlot Meats

April 21

Compared to Tuesday's close: demand and inquiry moderate at best for most meat items. Choice steer beef steady to 1.50 lower, mostly 1.25-1.50 off. Utility cow beef 1.50 higher, Canner and Cutter 1.00 lower. Spring lamb compared to last Wednesday 2.00-3.00 higher; lamb 4.00 higher. No comparison on skinned hams.

Steer Beef

Choice 600-800 lb. YG 2-3 73.00, 600-800 lb. YG 3 70.00-72.00 1.25-1.50 lower, 600-800 lb. YG 4 67.00 Generally steady; Good 600-800 lb. YG 3 68.00-68.50.

Cow Beef

Utility (Boning YG 1-2 62.50 1.50 higher; Canner & Cutter YG 1-2 63.00 1.00 lower.

AGSTAR

SAVE VALUABLE FEED, AS WELL AS
FLOOR SPACE, WITH A LONG-LASTING
ROTARY FEEDER

Here's the compact, space-saving rotary hog feeder that lets hogs get enough feed — but not waste it. Top-mounted screw crank adjusts precisely and locks so securely unnecessary feed waste can be eliminated. Rugged construction features include stainless steel drum bottom section to ward off abrasion and rust from wet snouts ... durable Porcelainized Steel or cast iron trough ... cross-braced, heavy-duty drum that holds its shape ... bearing mounted center pivot shaft that even small pigs can turn with ease.

The AGSTAR rotary is available in three sizes — 140, 275, and 400 lbs. capacity — with or without top lid and grill.

If you're thinking about confinement equipment, you owe it to yourself to get the facts about AGSTAR's complete line of rotaries, rectangular feeders, waterers, pen partitions, slotted floors, and other products.

EDITORIAL COMMENTS

BY DIETER KRIEG, EDITOR

'Powerful milk co-ops conspire to keep prices high'
'Dairy industry's political muscle may inhibit reform'
'Milk prices keep soaring'
'Government pushes milk prices beyond poor's reach'

The above headlines are no joke. They're for real. Granted, they sound ridiculous, and every dairyman will question their honesty, but they appeared earlier this year in newspapers across the country.

Columnist Sylvia Porter, who has a nationally syndicated, consumer-oriented column attacked the milk industry in some of her stories and the above headlines are from those articles.

Such misunderstandings and misrepresentations point to the need for farmers to stand up and tell their story. According to the National Milk Producers Federation the situation has become rather drastic, which is why that organization sponsored a symposium in Washington two weeks ago to bring the farmer's story to consumers.

What that symposium accomplished is hard to determine. Most reporters present were evidently farm editors, according to information obtained personally and received through USDA. The readership for these writers, most particularly LANCASTER FARMING, is definitely rural. That's not really where the story needs to be told. Where were the food editors from the big cities?

A number of farmers have told stories about the fellow in Philadelphia or Baltimore who scoffs at the need for farmers since "I can get all the food I need at the supermarket." Besides Sylvia Porter and the likes of her, they're the people farmers should be concerned about. Greater efforts must be made to reach them.

Henry Holloway, whose ideas and accomplishments on this subject are told in stories beginning on pages 1 and 96, is on the right track. There is indeed a lot which farmers can do if they just use their imagination and some initiative.

The task of educating the public should not be left to individual farmers entirely, but they should certainly play a large role in it. Every farmer and every agricultural organization should get in on the act.

If it's true that a number of our city residents believe that food has its origins in the supermarket — and I have no reason to doubt that — then it's time to exert some pressure on the legislatures of our state and national governments to bring about some consumer education. There's no excuse for this sort of ignorance to continue. This issue in itself should concern even the U.S. Secretary of Agriculture and possibly the President himself.

Some possibilities for bringing

America's farm story to the public might be:

School programs which would require students to take a look at agriculture by studying a general course in the classroom coupled with a number of field trips to a working farm. Are farming and food any less important than English literature, for example? Or calculus, or physical education?

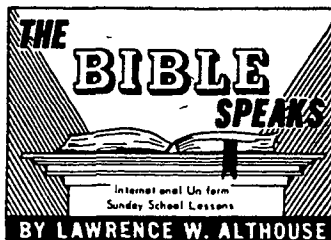

Films produced and sponsored by farmers may be the answer for educating other groups. Farmer cooperatives or associations could take charge of filming and distribution. The finished product could be made available to service clubs, church groups, youth organizations, and so forth.

Sponsoring sports events is another idea which farmers could look into. And while advertising the finished product is important, don't forget to tell your own story. I believe consumers would be fascinated by posters, films, and messages which tell a little bit of what's involved in producing milk, meat, eggs, etc. Forget about showing that chilled glass of milk on the table every time. There's more to it than that. Much more.

Another idea is to promote farm products in TV ads. It's already being done, but it's rare that the farmer's story is incorporated in them. It's about time that they are.

Direct contact with editors of newspapers and managers of TV and radio stations would probably be more effective in telling the farmers' story than a big event in Washington which is hundreds and even thousands of miles away from where the action and problems are. Also, speakers, organizers, and supporters of such events should tell their story to their constituents directly. What are the chances, for example, of some Senator's kind remarks about dairy farming trickling back to his district? Sure, he sends a news release out to the papers, but possibilities exist that the speech will never make it into print unless the paper has a farm editor. Again, the emphasis for such stories should be food editors, and even city editors.

A final idea I'd like to propose in this commentary is for fairs to become more "public oriented." A great many visitors to fairs are from town and these events therefore offer farmers a terrific opportunity for publicity. How about putting on some shows which are highly attractive and informative? Big business does it; there's no reason why farmers can't do it. After all, agriculture is a bigger business than anything else, and infinitely more important.

BY LAWRENCE W. ALTHOUSE

HEAD OF THE HOUSE

Lesson for April 25, 1976

Background Scripture:
Colossians 3: 1-21.

Devotional Reading: 2 Corinthians 5: 16-21.

A woman recently appeared on a television "talk show" and called the women of America to "forget women's lib" and restore their husbands to the position of "head of the house." She was quickly attacked by another woman who asserted that such a point of view was a return to the "dark ages." Governing the household, she said, should be equally shared by both husband and wife.

A youth in the audience rose to object that both women were "off-base," for they were ignoring, he said, the role of the children. They too need to be equal partners with the parents in running the household.

Who's in charge?

Someone has rightly observed that the American family today is engrossed in a bitter struggle for sovereignty. Everyone, it seems, wants to be in the driver's seat and is concerned with his or her "rights."

This is not so much a matter of whom we say is in charge - for what we say and what is actual may be quite different. Often we still maintain that "the man is head of the house." But that may be more apparent than real. It may be the women of the house - wife and/or mother - who makes the decisions. Or it may be the children who actually wield the power, bending parents to their wills by one means or another.

I am reminded of the story of the man who said that while his wife made the "low-level decisions" as to how they spent their money, where they would go for their vacations, how they'd educate their children, he made all the "important decisions, like 'Shall the USA send military aid to Israel?', 'Should we grant amnesty to conscientious objectors?', etc."

Put off the "old man"

The Apostle Paul, however, sees family life in different terms than these. The struggle for power within the family circle is not the focus for the Christian. That kind of concern is something that he needs to grow beyond. "Put them all away . . .", says Paul of destructive and divisive family dynamics. Even more than that, "seek the things that are above" (Colossians 3:1). The Christian family needs to look higher than the struggle for family power.

Above all, says Paul, "put on love which binds everything together in perfect harmony" (3:14). There will be differences in the family and there is none that does not experience conflict. But if there is love - genuine love - there will also be the cement that binds the family together. This love will transcend all questions of "Who's in charge?", for the Christian will realize that

NOW IS THE TIME . . .

To Be Alert

For Alfalfa Weevil

The extremely hot weather of the past week has brought many crops and insects ahead of schedule. We hear reports of severe weevil infestation in some alfalfa fields; growers should be on the alert for these insects and on some fields a spray application may be needed in order to save the first cutting. In recent years the weevil infestation has not been generally serious; however, weather conditions this spring could be more favorable for earlier and heavier weevil numbers. Reference to the 1976 Agronomy Guide for spray applications is suggested.

To Make Rye

Into Silage

The best time to make winter rye into silage is at heading time; the recent hot weather has caused the rye to shoot heads very early and in most cases the growth is short; however, higher feeding values and quality will be attained when the rye is cut at this time. Wilting is needed to get a quality silage and in addition, we suggest some feed additive to increase the amount of energy. Ground corn and cob chop, or one of the molasses feeds, will improve the quality of the rye silage. Don't go by the calendar this year.

To Recognize

Livestock Comfort

This is the first time that I needed to mention protection from hot weather in mid April; however, when temperatures get into the 90-degree range, it is time to take action to prevent animals from suffering and from heat exhaustion. Open

however decisions are made in the family circle, there can only be but one "Head of the house," and every struggle for power within the family is a usurpation of the power that belongs to God alone.

all of the doors and windows to get cross-ventilation to the maximum is suggested for confined animals. Exhaust fans should be used to move air out of the building. Fresh water and good shade is needed for all types of livestock. Hogs suffer the most and need extra misting or fogging devices on the concrete feeding floors. Animals do suffer from the heat and may die under extreme conditions. Careful supervision and management is needed to prevent losses.

To Be Alert For Soil Compaction

I hear of reports that the soil is so dry and hard that normal machinery will not penetrate into the subsoil. The extremely hot, dry weather in the past week made this condition worse; however, if farmers have trouble with very hard, cloddy soil, it could be an indication of soil compaction and the lack of organic matter in the topsoil. On some farms with the growing of continuous corn, the organic matter in the soil becomes depleted and hard; the use of livestock manure and green cover crops will correct this condition. Heavy equipment on the soil when it is too wet will also cause compaction. A loose, pliable soil full of organic matter should be the aim of every farmer and gardener.

Farm Calendar

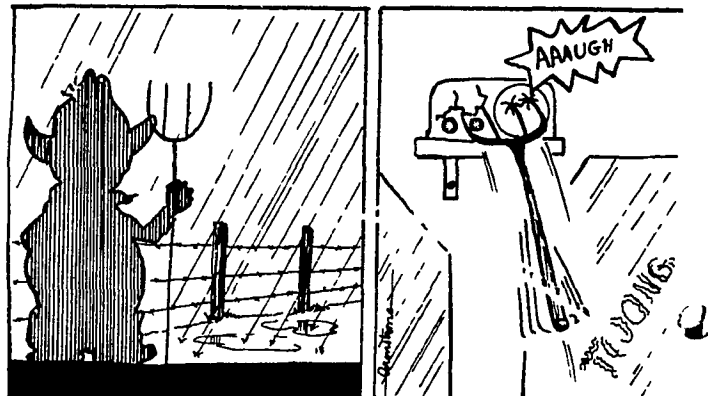

Saturday, Apr. 24

Peach Blossom Festival at Paul McPherson's Maple Lawn Farms, Gatchellville. Activities begin at 10 a.m. today and last until 6 p.m. More events on Sunday, beginning at 1 p.m. and lasting until 6 p.m. Farm located three miles north of Fawn Grove.

RURAL ROUTE

By Tom Armstrong

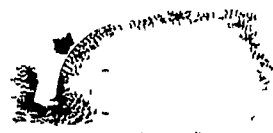

New Idea's NEW "Hay Thing"

Best there is in heavy, down, tangled hay.

Introducing New Idea's advanced Cut/ditioner—a rugged 7-foot machine that excels in heavy, down and tangled hay. Its non-plug, non-skip operation in any type of hay or forage crop means less downtime and more production. And, it makes a high-quality hay.

Selective conditioning. Knives hit only the stems of plants. This conditions the stems without damaging the leaves.

Try this new Cut/ditioner on your farm.

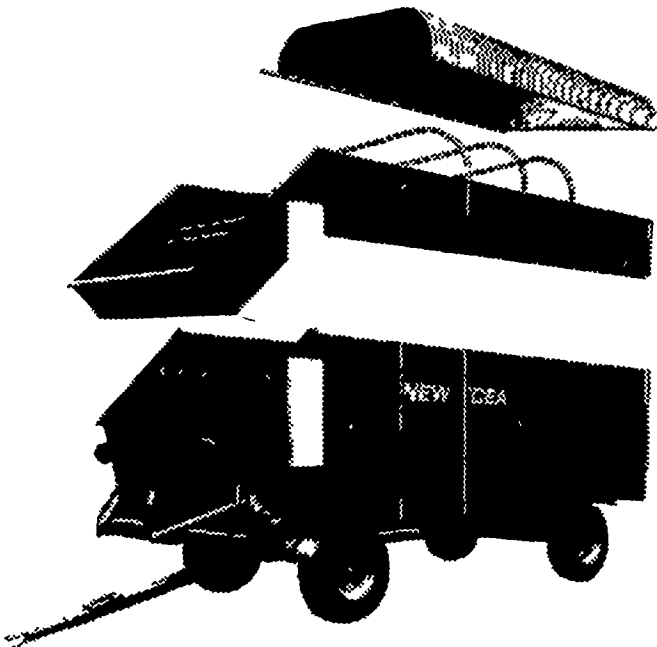

New Idea's Long-Reach Elevators

REACH! Get extra reach and save money with this multi-purpose elevator!

Take our word for it, this New Idea elevator will do the same job that longer (and more expensive) elevators do. The way they've engineered and balanced the extra overhang beyond the wheels makes the important difference. It raises and lowers quickly with a new, safer, easier-to-operate hand winch. The deeply embossed areas around bolt holes and steel angles that overlap joints give it rigid, no-sag construction and extra long life. Additional strength is provided by formed stress plates welded to the bottom of each section. Five lengths—31 to 51 feet. Choice of hoppers and drive. Written full year guarantee.

New Idea's Forage Boxes

Two rugged boxes built to last.

New Idea's two big forage boxes—the 14-ft and the 16-ft—are both built to get the job done fast. Both are available with 2 or 3 beaters, and galvanized roof. The 16" diameter beaters have staggered teeth, to give a waterfall effect, delivering a more uniform feed to the cross auger. The 16" diameter cross auger means you get smooth, positive unloading without chains, slats, bearings, or idlers. In all, these attractively priced boxes are built to bring your crops in—fast.

We make your job a little easier.

The Election Scene

"Conflicts of interest in official Washington could be more readily exposed if Federal employees who earn over \$25,000 per year were required to make detailed annual reports of their finances," State Rep. Marvin E. Miller, Republican candidate for 16th District Congress told voters last week.

Miller said the reporting procedure should apply to Senators, Representatives, military men and women, judges and federal bureaucrats.

An amendment to the Federal fair election law "should require details as to sources of income, assets and liabilities on an annual basis so the public can readily ascertain significant accumulations of wealth by public officials."

Miller said, "this 'Sunshine' requirement is the type of legislation I would introduce and support in the Federal Congress." He said it would be a step toward "exposing corruption in high places."

Rev. Bill Drury, Republican candidate for Congress, said he believes the hard working American people are sick and fed up with the never-ending give away programs, with paying the salaries of non-productive individuals. In a campaign message he said we need a gutsy representative from the 16th Congressional District who can stand up to the liberals on Capitol Hill and spell out to them why and how their programs have failed so miserably.

He sees unemployment and inflation as the Number One issue - no economy can be healthy with millions collecting money with no services rendered. Projects which can be completed in a relatively short time can be assigned to those on unemployment and welfare. No able bodied person should receive a check unless he has earned it. Those incapacitated and in genuine need should always be cared for, he said.

Inflation has been per-

petuated by government spending and payrolls. Labor unions have made increasing and unceasing demands. Both of these factors must be brought under control before the economy will recover. Both interfere with free enterprise and the laws of supply and demand. It appears that the recession is far from over or even contained. The country cannot survive economically with deficit spending any more than an individual can.

On foreign policy and aid, he said that Canada, who had been doling out \$930 million to 70 countries, had the courage to cut off almost half the number of countries who showed no inclination to solve their own problems. "We need to take a complete look at who is receiving aid, why, and what is being done with it," he said.

"Food remains one of our strongest superiorities. The Soviet system has consistently failed agriculturally under the Kremlin leaders. Before Communism in Russia, the country was a grain exporter. We need to be firm in our export policy and positive in our stance in the world community. After our recent humiliating house cleanings, we should take this election as an opportunity to elect men who can bring respect here and abroad."

Of the CIA and FBI, he says a periodic investigation and review is healthy. "However, certain aspects of the work of both agencies require discretionary secrecy. Limitations of power must be imposed on the heads of both organizations. In this regard, the function of a free press has never been as appreciated as in the past few years."

Norman O. Aamodt, Republican candidate for Congress, addressed voters in the lobby of the General Sutter Hotel recently and spoke about the many state and federal regulations

which impose a costly and time-consuming burden on local governments, private companies, fire companies, law enforcement agencies and other public and private groups. He pointed out that injustices occur all too often in the bureaucratic interpretations of these regulations.

Aamodt would propose legislation to create a three-man board of local citizens to arbitrate all disputes. The board would be empowered by law to render final and binding decisions. Interpretation and control of federal directives would be restored to the local community. Aamodt has made the role of the people in government the theme of his campaign.

During a recent meeting of the Republican Club of Parkesburg, Aamodt said a qualified representative could do his job well from the beginning of his term. Further, Aamodt suggested legislation that required all congressmen to step down after eight years, at which time an open and unendorsed primary would be held. Corruption and political dynasties would be checked and more capable people would be encouraged to enter public life.

The eight year maximum term would eliminate the abuse of the seniority system. With the dead hand of seniority removed, a qualified congressman could carry more influence from the beginning of his term, he said.

Lancaster Mayor Richard M. Scott, a Republican candidate for Congress is taking a week's vacation without pay from his mayor's job to devote his full efforts to a broad sweep of the district in the last week of the campaign.

Explaining his decision, Scott said, "It's a secret to no one that I've been at a disadvantage in conducting a part-time Congressional campaign in my off-duty time as mayor. Some of my opponents have outspent me,

time-wise and money-wise, by a vast margin.

"I believe the time has come," he continued, "to show the people of the 16th District just how serious I am about representing them in Washington. I also want to impress upon my friends and supporters that the job I've started as mayor of Lancaster needs to be continued in Washington."

Catherine Baker Knoll, Democratic candidate for State Treasurer in this month's primary election, was the featured guest Saturday morning at a Lancaster County Democratic Party rally.

Citing current figures to illustrate the size of the State Treasury's operation, Mrs. Knoll said that the State Treasurer receives and disburses approximately \$18 billion a year. Daily receipts amount to more than \$65 million every working day, and the State Treasurer writes 96,000 checks a day.

"But before the state spends this money, it is possible to earn very substantial revenues by the placing of temporary investments. This year, revenues from investment will reach more than \$250 million - \$250 million that the taxpayers will not have to come up with," Mrs. Knoll emphasized.

Stating that her administration of the State Treasurer's office will introduce improvements in investment performance, Mrs. Knoll said she would completely eliminate all uninvested funds in the state.

"Further," Mrs. Knoll said, "I will work as long and as hard as it takes to insure that all of Pennsylvania's tax dollars are invested in the best interest of all the people of this Commonwealth."

Al Lewis, Republican candidate for Congress, speaking in Coatesville, called for "import quotas on specialty steel and mushrooms to save the economic interests of the 16th Congressional District."

Lewis endorsed President Ford's intention to seek a "negotiated settlement of orderly marketing of specialized steel between America and other nations" but called on the President "to stand firm on his pledge to impose import quotas if a negotiated settlement is not reached by June 14."

"For some strange reason the United States International Trade Commission does not seem to believe the problem is just as serious in the mushroom industry which is so vital to our District. They have recommended some kind of worker assistance program for people in our area who are thrown out of work because of a flood of foreign mushrooms. Our people don't want a relief program, they want jobs. The President should conduct similar negotiations in the mushroom industry or he should immediately put a clamp on mushroom imports."

Lewis released the text of a telegram to the President in which he added his support to the Pennsylvania Congressional Delegation's request to the White House for assistance with the mushroom import problem.

State Rep. Marvin E. Miller said in a campaign message the "rules of the Federal Congress insulate its membership against facing charges of misconduct in office."

He said the "rules under which Congress operates and Congressional comradery serve to protect members whose actions indicate they ought to be called before the Ethics Committee." Miller said a major goal, if he is elected, will be to seek to bring about some changes in procedures in an effort to expose self-interest legislation and congressional conflict of interests.

The Pennsylvania Rifle and Pistol Assoc. Inc., has endorsed George R. Packard, walking candidate

Sale reports

Second Annual
Penn-National
Red and White
Cattle Sale
April 19, 1976

High selling cow was Glen-Moore Ivanhoe Susie-Red (EX). The 9 year-old cow, ready to freshen at sale, was purchased by Yourstend Farms, Elkhorn, Wisconsin for \$5600. Contending bidder was Lowell Brubaker, Manheim.

50 head averaged \$840. Sale was sponsored by the Pa. Red and White Dairy Cattle Association - Kenneth Myer, president.

A Holstein Dispersal sale of registered and grade cows was held April 20 by Barry Essig 2 miles north of Wernersville, Pa. in Berks County.

The herd of 25 cows averaged \$723 per head. The top 10 cows brought \$913 each. Four cows sold between \$1000 to \$1075.

The top priced cow was a grade Holstein for \$1075, 2nd was a registered fresh heifer at \$1025, 3rd was a registered cow for \$1000, 4th a grade cow for \$1000, and 5th priced grade cow was \$975.

Auctioneers were Carl Diller and J. Everett Kreider.

CONTROL WEEDS IN ALFALFA WITH BUTYRAC-200

Apply 2 to 4 weeks after alfalfa emerges. Controls broadleaf weeds in seedling or established legumes. This remarkable selective action — killing many broadleaf weeds without affecting certain broadleaf crops — has been proven by research men and commercial growers throughout the country.

We are distributors for a complete line of

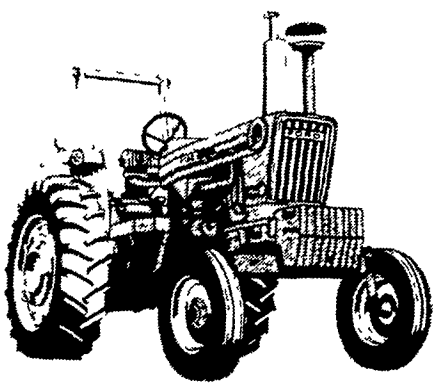

WEED KILLERS

P. L. ROHRER & BRO., INC.

SMOKETOWN, PA Phone Lanc. 717-299-2571

THE BIG BOYS ARE HERE READY FOR IMMEDIATE DELIVERY — 110 HARD WORKING HORSES.

The acres go fast when you're farming with a Ford 8600. You expect that with 110 tough and eager horses working for you. The surprise comes with how easily and quickly the day goes. For a Ford 8600 combines great workpower with exceptional comfort and convenience. This tractor is kind to the operator.

Big capacity comes from a great balance of power, weight and strength, all under easy and accurate control. Cross-flow heads with opposed manifolds help make the big 401-cu. in. diesel extra responsive and thrifty. Big-capacity hydraulics handle heaviest equipment with ease. Optional Dual Power transmission offers 16 forward speeds. And you get 540-1000 rpm PTO as a standard feature.

The big and roomy operator's deck is spacious and comfortable. Non-skid steps and easily reached handholds make boarding easy. A ½-in. thick rubber mat cushions the 9-sq. ft. deck. Special shielding protects you from engine heat. These are just clues to the comfort you'll enjoy on a Ford 8600.

★ Console puts 3-point hitch and remote hydraulic control levers within easy, natural reach.

★ Settle into the contour-cushioned seat — adjust it fore and aft and up or down for a perfect fit. Adjust torsional suspension spring for just-right support.

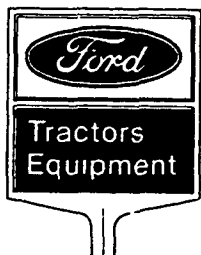

★ Dual Power transmission option helps increase pulling torque to drive wheels at the touch of your toe — to help you through the tough spots. Smooth and easy

★ You'll like the nearly effortless ease and precision of hydrostatic power steering. Wheel telescopes and tilts to match your height and reach.

★ Power-engaged diff-lock gives you full traction of both drive wheels for slippery spots. Release heel pressure and diff-lock disengages.

★ Straight-line shifting gives you positive and easy gear selection. For parking, just pull the range lever into park position. Convenient and safe.

★ Quick connect couplings make attaching or detaching remote hydraulics quick, easy and clean — even with pressure in the system.

Pa. Antlerless rules similar to '75 season

The Pennsylvania Game Commission has adopted rules and regulations governing the issuance of antlerless deer licenses for 1976 that are similar to those in effect last year.

In so doing, the commission discontinued at this time consideration of another approach that would have required county treasurers to schedule drawings for antlerless licenses when applications exceeded allocations.

Under guidelines adopted, county treasurers will begin accepting applications for antlerless licenses on Monday, October 4. As in the past, all applications must be sent to county treasurers by first class mail only. Applications will again be limited to one per envelope.

Antlerless licenses will not be issued by county treasurers prior to October 11, and all unsuccessful applications shall be mailed by county treasurers to the applicants no later than October 12.

The Game Commission had proposed at its January meeting that all county treasurers schedule

drawings for antlerless deer licenses when there were more applications received than there were licenses allocated.

The Game Law provides that antlerless deer licenses "... shall be issued without restriction or regard to the county residence of the Pennsylvania applicant..." The Game Commission felt that an impartial public drawing was the fairest method to select antlerless license recipients.

But nearly 14,000 persons registered their opposition to the Game Commission's proposal for drawings, while less than 900 indicated via written communications that they supported the idea. Most of the opposition to the proposal came from north-central Pennsylvania counties - about one-fourth of the signatures were from Elk County. In light of the overwhelming opposition to the proposal, the commission discarded the plan from further consideration at this time.

In other recent action, the commission:

- Elected C. Clair Winter of Everett as the new vice

president of the commission, replacing Marshall E. Jetty of Brockway, whose term on the commission had expired. Winter had been serving as the commission's secretary.

- Elected Robert E. Sutherland of Erie as the new secretary of the commission, replacing Winter.

- Approved recruitment of a new class of game protectors, starting early this fall. Instruction will begin in July, 1977.

- Allocated \$1,000 to the National Rifle Association to help combat anti-firearms legislation.

- Removed the area west of Interstate Route 79 and north of Interstate Route 80 from the territory open to the hunting of hen pheasants.

- Expanded Pennsylvania's primary turkey range to include the area north of Route 322 and east of Route 8 in Venango and Forest Counties, to Titusville, and the territory east of Route 27 and Route 69 in Warren County.

- Purchased 418 acres of land to be used for public hunting in Bedford, Sullivan and Dauphin Counties at a total cost of \$64,720.

Use an old toothbrush dipped in suds and ammonia to give a sparkle to cut glass.

- Revoked the hunting license privileges of 461 individuals for infractions of The Game Law.

- The commission also has drawn up several proposals which it will consider before taking final action at the June meeting of the commission. These proposals include the following:

- Hunting seasons for 1976-77 in the listed framework: archery deer, October 2-29; early small game, October 16-November 27; regular small game, October 30-November 27; bear, November 22; antlered deer, November 29-December 11; antlerless deer, December 13-14; winter small game and archery and muzzleloader deer, December 27-January 15. The daily bag and possession limits as established last year are again proposed for 1976-77.

The commission also proposed to issue 440,350 antlerless deer licenses this year, an increase from the 421,300 that were authorized one year ago.

- Reclassification of red and gray foxes. These species are now classified as predators; the commission proposes to classify them as furbearers in the future.

- Adding State Game Lands 127 and 221 in Monroe County and Hoovers and Clemson Islands in the Susquehanna River between Selinsgrove and Clarks Ferry to the list of areas for muzzleloader deer hunting.

Field work pulls into high gear

HARRISBURG — Fieldwork has moved into high gear as a result of a dry spring in the commonwealth, according to the Pennsylvania Crop Reporting Service. Spring plowing was reported nearly 60 percent complete for the week ending April 19, a week ahead of 1975 and about two weeks ahead of usual for this date. By area, plowing is nearly two-thirds done in the south and central counties and one third completed in the northern counties.

Oat seeding is reported at 44 percent complete, a week ahead of last year. Northern areas show 39 percent sown while central and southern counties are 47 percent planted.

For the state, potatoes are 17 percent planted, a week ahead of 1975 and ten days

earlier than normal. Most progress has been reported in the central counties.

Tobacco beds are over 80 percent set with some sprouting reported.

Hay stands are mostly reported in fair to good condition, comparable to last year. A below average amount of feed is being obtained from pastures, and the crop now needs a warm rain.

Fruit crop development is about two weeks ahead of usual. Peaches are 60 percent pink and nearly ten percent in full bloom. Cherries are one-half pink and one-third in full bloom. Apples are rated two-thirds pink with under five percent in full bloom. Damage to the fruit crops from the recent frost is hard to access at this time.

Eggs counted

HARRISBURG — Pennsylvania layers produced 287 million eggs during March, the same as a year ago, according to the Crop Reporting Service.

The March average of 13.7 million layers is the same as a year ago.

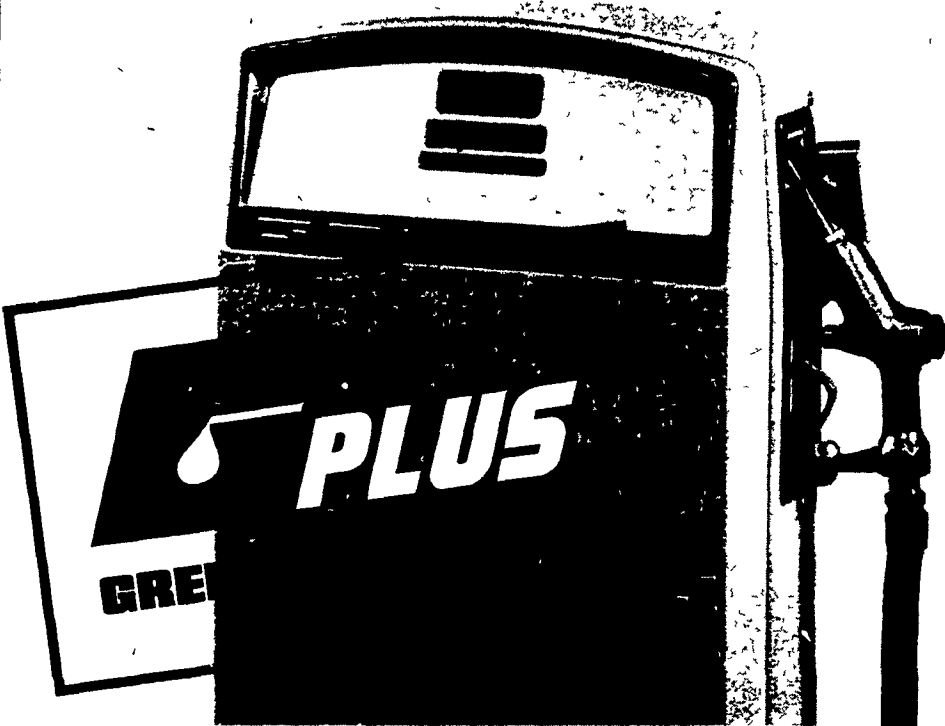

Egg production per 100 layers during March totaled

2,093 eggs compared with 2,099 a year earlier.

The nation's laying flock produced 5,557 million eggs during March, up one percent from a year earlier. Layers on hand during March averaged 277 million, down one percent from a year earlier. The average rate of lay during the month was up two percent from a year ago.

"When you rejoice over being young, and notice how well you feel, that is age." Jules Renard

THE BLENDERS CHOICE

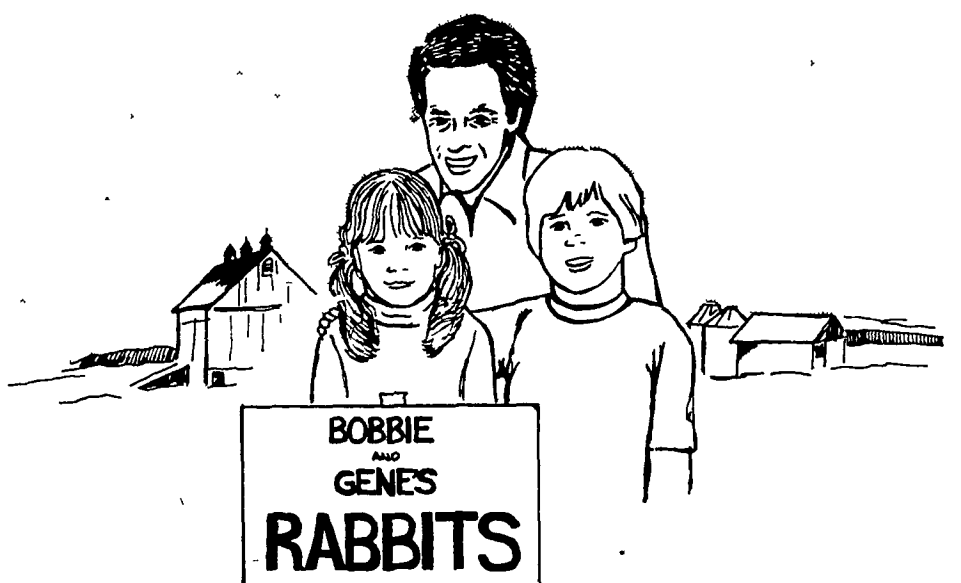

Combines the best features of Agway's #1 and #2 Green Diesel to give you a superior, year-round, premium-grade fuel.

- You get these features:
- quicker engine starts than from a #2 fuel
- dependable fuel flow in cold weather
- more power than from #1 fuel

- practically smokeless operation. And Agway's complete additive package lowers injection maintenance costs and prolongs engine life.
- New Agway Green Diesel Plus is the very best fuel for your diesel tractor, all year long.
- For complete details, call your Agway Petroleum man, today

Raising rabbits can be a family affair!

Begin a new hobby that's inexpensive, educational and fun for the entire family. From pampering your first litter to showing prized stock at the local fair, you'll discover new worlds of personal satisfaction in raising rabbits. You'll learn small-animal management firsthand. Feed, handle, care for your growing herd. Maybe even specialize in Angoras or Checkered Giants.

And now, it's easy to set up your own rabbitry with the new Favorite Beginner's Rabbit

Management Kit. You get all the equipment you need: two science-engineered 24" x 30" x 18" high all-metal Lifestyle hutches—designed to install in minimum space; performance-tested accessories like two 9 1/2" Conservall feeders, two 32 ounce ball-valve waterers and a protective nest box for little ones. And to start you off right—a copy of the authoritative new guidebook, *Raising Rabbits the Modern Way* by Bob Bennett. In all, over seven items for the special price of just \$55.00.

Start your family affair today! Send check or money order for your Beginner's Rabbit Management Kit to Favorite Manufacturing, Inc., RD 1, Box 176, New Holland, PA 17557. (PA residents add 6% sales tax.) And if not completely satisfied, simply return the equipment within ten days for full refund of purchase price.

Members of the Cloister FFA dairy judging team which recently placed first in competition at state level were Bob Fox, Lin Fry, Mark Weiler and

Kevin Smoker. The students were all freshmen and coached by Lew Ayers. The competition was sponsored by the Penn State Dairy Science Club.

Poultry show scheduled

The first annual Poultry Show of the Delmarva Poultry Fanciers Club has been scheduled for Sunday, May 23, from 10 a.m. to 4 p.m. at the Delaware State Fairgrounds in Harrington.

The show is open to all participants wishing to exhibit purebred chickens, bantams, geese and ducks. Only birds recognized in the Standards of Poultry Perfection book will be eligible for competition. Classes will include American, English, Mediterranean and Asiatic breeds; clean and feather

leg bantams; single comb, rose comb and pea comb fowl as well as modern and Old English game birds.

In addition to class ribbons, there will be trophies for best of breed and best of show.

The show is open to anyone wishing to compete, provided their entries qualify as established breeds. There will be an entry fee of \$1 per bird. Deadline for entries is May 9.

For further information, contact either Mrs. Robert

English, Rt. 1, Seaford, DE 19973 or Mr. A. Burke Cleaver, 2600 Pennsylvania Avenue, Wilmington, DE 19806.

Dairy judges win state

(Continued from Page 1)

Burkholder, John Zimmerman and Joyce Gerhart.

Second place honors also came back to Lancaster County as Solanco High School's B team received 1537 points. Members of the group were Mary Kirk, Samuel Long, Tom Kirk and Scott Heighbaugh.

In individual competition, Mary Kirk, Solanco, was the

high individual in Holstein and Jersey judging with Tim Hanks, also of Solanco, being named the high individual of the contest.

Other schools in the county which participated were Lampeter-Strasburg - 14th place, Pequea Valley - 17th place, Penn Manor - 7th

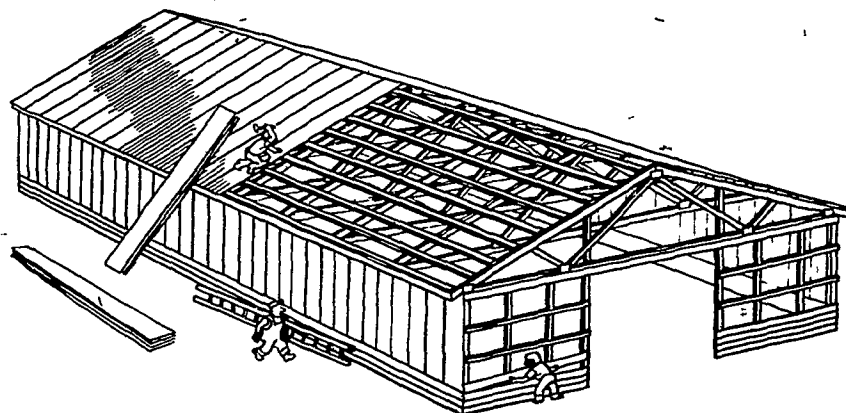

place, Manheim - 11th place and Oxford - 13th place.

The dairy judging contest is sponsored annually by the Penn State Dairy Science Club as a preliminary competition in conjunction with the Dairy Expo. A total of 152 contestants participated in this year's event.

Mearig addresses elderly

Herbert C. "BUD" Mearig, congressional candidate for the 16th District called recently for a "tapping of a wealth of wisdom and experience which the senior citizens of the country have by every representative and senator in Washington."

Addressing a group of 150 members of the New Holland Senior Citizens organization at the Liberty Fire Hall earlier this month, Mearig commended them as being "the bulwark of the nation, as citizens who have made their mark on society by contributing of their talents in their trades, on the farms and in the business and professional world, making America what it is today."

"What is needed in our government today at all levels, is for public officials to avail themselves of this vast knowledge and skills you people possess, which only years of experience in the school of hard knocks has

taught you. You have earned your way."

He pledged: "As your congressman, I will be calling on you frequently both as a group and as individuals for guidance and advice for you still represent a most important part of the heart of what makes this country tick, and I want to be constantly tuned into that pulse beat."

"Retirement does not relegate you to the shelf,"

Mearig said, "for we need you as surely as we need the younger generation upon whom the mantle of presonsibility that you have carried so well, will soon be placed."

"Your talents must not be wasted."

Jesus speaks of John

And as they departed, Jesus began to say unto the multitudes concerning John, What went ye out into the wilderness to see? A reed shaken in the wind?

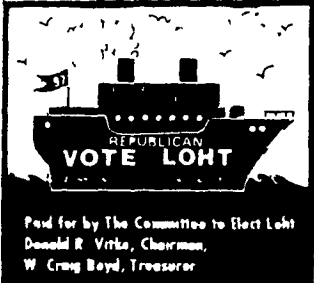

But what went ye out for to see? A man clothed in soft raiment? behold, they that wear soft clothing are in kings' houses.

But what went ye out for to see? A prophet? yea, I say unto you, and more than a prophet.

For this is he, of whom it is written, Behold, I send my messenger before thy face, which shall prepare thy way before thee

St. Matthew 11: 7-10

POLITICAL ADVERTISEMENT

Fire danger still great

HARRISBURG - Although a few widely scattered showers were reported in some portions of the Commonwealth Tuesday night, a steady rain of at least two days duration is required to alleviate the fire danger which continues to exist in Pennsylvania.

Eugene F. McNamara, Chief, Division of Forest Fire Protection, Department of Environmental Resources, said showers are only temporary relief and within a day or so the fire danger in the forested areas is as great as ever.

However, noted McNamara, there was some minor relief experienced by the fire crews on Tuesday when 55 wildfires were reported as against 64 the previous day.

He also said that a Lycoming County fire, which broke out Monday in the vicinity of Haneyville, swept over almost 3,000 acres and spread to the ridge above Pine Creek, had been contained. On Wednesday fire crews were involved in strengthening the control lines.

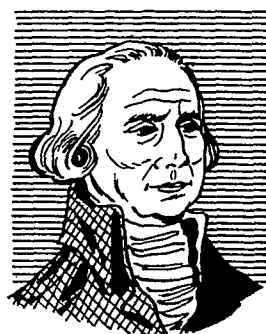

Each year, especially during the Spring fire

season, the Department has under contract aircraft - fixed wing and helicopters - which are used as part of the suppression program and over the past week they have been exceedingly active.

The B-26 and PV2, aircraft, based at Mid-State Airport, near Phillipsburg, and at Hazleton, flew over 86 fires and dropped well over 168,000 gallons of fire retardant. Each plane has a capacity of 1,000 gallons.

The helicopters, as of Tuesday, were active on 168 fires and made 1,299 drops involving 146,760 gallons of retardant.

George Washington

No pesticide shortage expected

WASHINGTON — Supplies of pesticides this year will be ample for farmers' expanded needs, and prices have leveled off, according to a report released by the U.S. Department of Agriculture. Increased supplies are coming from 10 to 15 per cent gains in production of pesticides plus much larger inventories at the start of 1976.

Following two years of rapid rise, pesticide prices are leveling, concludes the report by USDA's Economic Research Service (ERS). Dealers are paying slightly higher prices than last season, but are charging growers the same or lower prices than last Spring. Sales of pesticides to growers have been way down for the early season, but are expected to pick up, and top 1975 levels later on.

Demand for pesticides is

being influenced by plans to expand the acreage of cotton, corn, sorghum and wheat. Overall, demand for pesticides may rise five to ten per cent, largely because of increased needs for herbicides on cotton (possibly up a fifth) and corn (up about six percent). Cotton will also be the chief source of added demand for insecticides this season, and for other types of pesticides, chiefly defoliant and desiccants.

The pesticide industry's capacity is increasing, and few production problems are apparent; thus, supplies are likely to be ample next year, too. The study suggests that the years of sharp annual increase in pesticide use by farmers are about over, because most acreages of the principal crops that require pesticides are now routinely treated.

Chemgro Fertilizer Co., Inc. in East Petersburg has been selected as your Certified Crop Care Center.

Elwood Funk

In recognition of professionalism as a supplier of farm services Elwood Funk of Chemgro Fertilizer Co., Inc. has been named as a member of the new Certified Crop Care network.

Crop Care is a unique concept in farm supply service especially designed for you the progressive farm businessman.

Management takes time Time to plan Time to think Time to make decisions Good management also takes professional help and advice when and where it is needed.

Your Crop Care dealer offers these services designed to give you the kind of professional help you need to better manage your cropping programs.

1 Complete, accurate, soil testing service. Your Certified Crop Care dealer will assist you in obtaining soil samples and will send them for you to a leading soil analysis laboratory. The laboratory soil analysis and computerized fertilizer recommendations will be reviewed with you and an application plan developed.

2 Plant analysis. Your Crop Care dealer will help you take samples and handle all details of the tests. He will provide you the printed report analysis along with expert interpretation. This service pinpoints deficiencies in uptake of plant food nutrients.

3 One-source responsibility for your farm chemicals. Your Certified Crop Care dealer offers weed and pest control programs as well as fertilization of your crop land. Your Crop Care dealer is qualified to render a complete range of services from planting to harvest.

Your Certified Crop Care dealer pledges to offer farmers:

- Products and services best suited for maximum efficient crop production under local growing conditions
- Sound counsel on crop production based on soil test and plant analysis services
- Product application equipment and services that fit customer needs
- A staff of professional people with the experience knowledge and capability to relate to local grower requirements
- A progressive retail business dedicated to building and maintaining high standards in quality of products and services

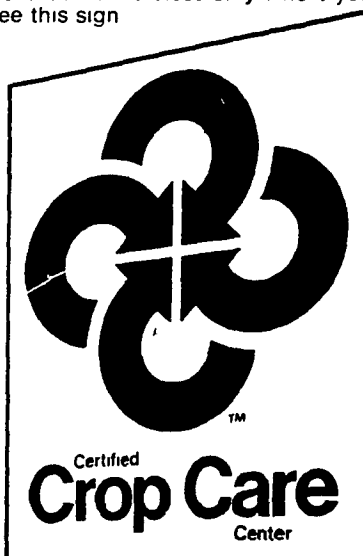

4 Professional counsel. Your Crop Care dealer is well informed on all matters associated with efficient and profitable crop production. He is a most valuable source of

information about successful farming ideas used in the area. And he can draw on the experiences and techniques of other Crop Care dealers too.

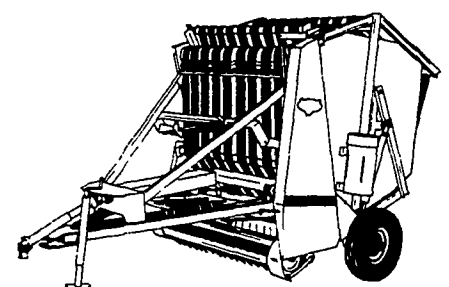

5 Skilled, professional application. As a part of his total Crop Care service your dealer offers custom application of fertilizer and other farm chemicals. Application may be made by one of your Crop Care dealer crews. Or he may arrange for application by a qualified applicator.

The services your Crop Care dealer offers are designed to help you get maximum yield and to free up your time to do what you do best. **Manage.** Your Certified Crop Care dealer can provide professional advice and services to help you do it better.

Remember you get Certified Crop Care Center services only where you see this sign.

Hospital farms controversial

(Continued from Page 1)

Kerstetter urged against selling the land to private interests. He said his Department is undertaking a study which would augment work being done by the House Agriculture Committee to study ways to keep these lands in agricultural production.

Kerstetter proposed placing the lands under the "statutory authority" of the Department of Agriculture which would then become "a leasing agent to farmers who met certain clearly established criteria."

He explained that "under a possible leasing plan, young farmers could get started in the Commonwealth. Existing buildings could be leased to bonafide farmer interests and their use would help the farm economy of Pennsylvania."

Kerstetter stressed that his testimony was not meant to dispute the findings of welfare officials. He noted the inmates "are not farmers and it would seem to me that the involved tasks would seem difficult and unrewarding to them."

"Working or would-be farmers on the other hand," said Kerstetter, "would find the leasing of much of the lands in question highly attractive."

Kerstetter was against "selling the lands to interests which would almost certainly take them out of green and put them under asphalt for one kind of development of another."

The secretary noted that earlier this year he had "cited the potential of the dairy barns at Harrisburg State Hospital to provide holding facilities for cattle being shipped overseas from Harrisburg International Airport."

"These kinds of general ideas fit the 'innovative methods' called for under HR 230."

Grange Wants Change In Management

The Pennsylvania State Grange proposed establishment of a commission to operate institutional farms in the state.

Testifying before the House Agriculture Committee, Charles E. Wismer, Jr., Grange legislative

chairman, opposed the Department of Public Welfare's proposal to phase out farming operations at the institutions. It would involve 6422 acres, 3000 of which are considered prime agricultural land.

"How can we justify phasing out these farms," Wismer asked, "and, at the same time, urge the preservation of agricultural land in Pennsylvania?"

In view of efforts to focus attention on world food policy, Wismer pointed out, "I find it difficult to understand the rationale behind the Administration's position to phase out farm operations at our state welfare institutions."

Wismer cited a resolution adopted at the Grange's annual state convention in 1968 in which it was pointed out that during the 1966-67 fiscal year the farms produced \$4 million worth of food at a saving to the state of \$949,594.

In its proposal for establishing a commission to operate the farms, the Grange suggested that it include the State Secretary

of Agriculture, the dean of the College of Agriculture at the Pennsylvania State University, and a representative of the Department of Public Welfare.

The Grange recommended that the commission be responsible for the administrative care and maintenance of all land at Department of Public Welfare institutions, and have direct control of all personnel engaged in operating the farms.

47 Steps Required To Get Parts; Farmer Should Take Charge

Kenneth Brandt (R.-Lancaster) says a farmer should run the state farms so that the business attitude would be agriculturally oriented. In a telephone conversation with LANCASTER FARMING, the legislator charged that under present management 47 different steps are required before final action is taken on whether or not to buy equipment or even spare parts. The reason, he says, is because such matters first have to be cleared by a business manager who runs the entire institution, but generally has little knowledge of farming. Brandt went on to say that if a farmer took over the agricultural side of the institutions, they could be made much more efficient.

"We hear the cry from the Welfare Department that they don't want to farm because they can't operate the farms profitably," he said, adding that in view of all the other money that's going out through that agency it's not a very significant point.

Brandt favors the idea that the 6422 acres be kept under the jurisdiction of the Welfare Department, and

Dairy facts

1. 13.4 billion gallons of milk were produced in the U.S. in 1975.

2. Approximately 70 percent of the milk was marketed by dairy farmers through some 700 dairy cooperative associations.

3. Approximately 45 percent of the milk produced

that the eight farms be supervised by a farmer. He expressed concern over the possibility that the state may want the land back again in a few years and the best way to assure that is to keep it. Leasing agreements, as suggested by Kerstetter "can get out of hand," he said.

Welfare officials reportedly have concluded that inmates at the state institutions derive no therapeutic benefit from their farm work, nor do they create any savings for the institutions. There have been unofficial reports of gross mismanagement. Brandt says the farms lost \$1.5-million last year.

is used as fluid milk for drinking, and 55 percent is manufactured into other dairy products.

4. The national average per capita consumption of milk and dairy products was 550 pounds in 1975.

5. The average milk production per cow per year was 10,350 pounds or 1,203 gallons in 1975. Each cow supplied the milk, cheese, ice cream, butter and other dairy products for 19 people in 1975. This is double the per-cow production in 1955.

6. There were 11.2 million cows in 1975 compared to 22 million in 1955. Half as many cows today are producing the same volume of raw milk as 20 years ago.

7. The number of dairy farms in 1975 was 300,000. There were 1.5 million dairy farms in 1955.

8. Farmers received \$9.8 billion in gross income from milk production in 1975.

9. The retail value of milk and dairy products purchased in 1975 by consumers reached \$22 billion.

When you need automatic feed processing, you need a total system.

We're total.

A Mix-Mill Farm Feed Factory is the "TOTAL" system for automatic-feed-processing. It comes in a variety of capacities to meet your individual requirements. For example, our overhead grain holding bins range in sizes of 12 to 400 ton capacities. Our automatic mixer/grinder is available in hammer mill or roller mill with 5, 7½, 10 or even 20 horsepower.

There's a wide range of

optional equipment, too! Grain Bins, bulk tanks, bucket elevators, grain roasters, and auger systems, to name a few.

Your Mix-Mill Distributor is the place to go for automatic-feed-processings. Whether you make three (3) tons of feed a week or 400 tons or more everyday, there's a total Mix-Mill system just for you.

For more information on a total labor/cost savings system, use this coupon today!!

Tour hostesses honored at Ladies' program

By MELISSA PIPER
STRASBURG — Following a tour of Lancaster County farm homes, almost 500 Lancaster farm women met at Historic Strasburg here on Wednesday for their annual PFA Ladies' Day Out program.

Six women were recognized for having opened their homes for the tour and Mrs. J. Richard Garber presented gifts to Mrs. Roy Rohrer, Mrs. Harold Rohrer, Mrs. Norman Kolb, Mrs. John Kreider, Mrs. Henry Barley and Mrs. Melvin Shertzer.

A talent competition for youth was held in conjunction with the Day Out program with a winner selected to represent the county at the regional program slated for later in the summer.

Lou Ann Brenneman along

with Larry and Terry Frey won the talent contest, by doing a skit telling the story of PFA. Miss Brenneman, the 15-year old daughter of Mr. and Mrs. Elvin Brenneman, Mt. Joy, portrayed a over-zealous farm wife with Terry Frey as the reluctant farmer. Sound effects were provided by Larry Frey.

Talks were given by Theresa Heinz, wife of senatorial candidate, John Heinz and Earl Newcomer, president of the Lancaster County Farmers' Association.

Entertainment for the day was provided by Mrs. Noah Kreider, Jr., at the organ and by Michael Martin who presented several vocal selections. Numerous door prizes were donated by area agribusiness firms and local banks. Mrs. Elvin Bren-

CUSTOM CORN

"Dol-Mar Farm's" dairy business is a family affair. Involved are, left to right, Boyd, Guy, Mrs. Hitz, Scott, and Marlin Hitz. The Hitz's daughter also helps as manager of the store.

Milk jugger tells his story

[Continued from Page 1]

ice cream. It's made by Yuengling's from his own milk, and is one of the really big attractions, especially in

the summertime. This year the family is thinking of placing tables and chairs outside of the store for their customers.

There's no doubt that the

health programs which the Hitz's deal with now are much stricter than those they encountered while just operating a dairy farm and letting someone else do the processing and marketing. "We're dealing with the public now," Hitz explains simply. His wife, a city girl turned farmer's wife, added that there's lots of paper work. She, like her husband and four children, are totally involved in the business, and they enjoy it. "I wouldn't live off the farm," she said enthusiastically, "I love it on a farm—I had to find things to do in town, but not here—I've been on that side of the fence."

If Mrs. Hitz has any advice at all for those who may be considering the jugging route in their future, it's making sure that enough good help is around. "Things snowball on you once it starts," she explained, and there's more to it than one might suspect. They visited more than 20 jugging operations prior to their taking the big step into processing and retailing. As a result they ended up having a pretty fair idea of what's involved.

Good help is no problem at the "Dol-Mar Dairy." The Hitz's four children are totally involved and several girls are hired to help in the store. The oldest of the four children, Guy, 26, has a degree in dairy husbandry and is in charge of the dairy herd. Boyd, 23, takes care of field work, while 21-year old Scott is in charge of the processing end of the operation. Marlene Sheetz, the Hitz's daughter, takes care of the store—inventories, ordering, pricing etc. She's had plenty of

experience in that area since she was formerly employed by Sears. "It keeps me busier here, but I can bring the family along—I like it better," she said. Like everyone else in the family, she has farm life in her blood. Her advice to those who go into retailing is that it's important to be friendly—the customer should be the store's first concern.

"Anyone who wants to get into it should look around first," Hitz advised. For example, stocking the store is a big expense and supplies take six to eight weeks to come in. A fellow has to watch what sells and what doesn't. Local, state, and federal regulations have to

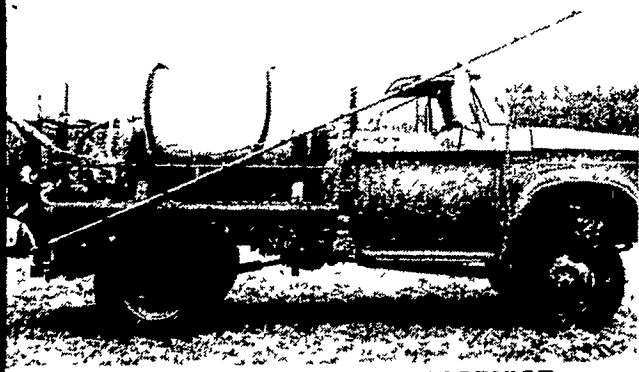

be adjusted to. Every employee has to be enrolled in an unemployment compensation program. Dol-Mar's monthly electric bill exceeds \$700. "It takes money," Hitz remarked.

Location of the farm is, of course, another important consideration. The Hitz's farm is located 14 miles east of Harrisburg and 12 miles southwest of Lebanon. Milk is a big seller, but they also carry meat, some of which is from their own heifers, home-made bread, convenience foods, and high-volume groceries. It's worked out to their satisfaction, and in spite of

Milk jugger

[Continued from Page 18]
the hurdles, they'd do it again if they had to.

In the dairy business since 1949, Hitz says he's never done anything else. The idea of going into retailing came up as a result of the children wanting to stay with the farm, but with just 110 acres of their own land, the property would hardly support them all once they were married and had families. "We went into processing for the extra income," Hitz explained.

They've been processing milk since Autumn of 1973. Their first venture into retailing involved a portable processing van which

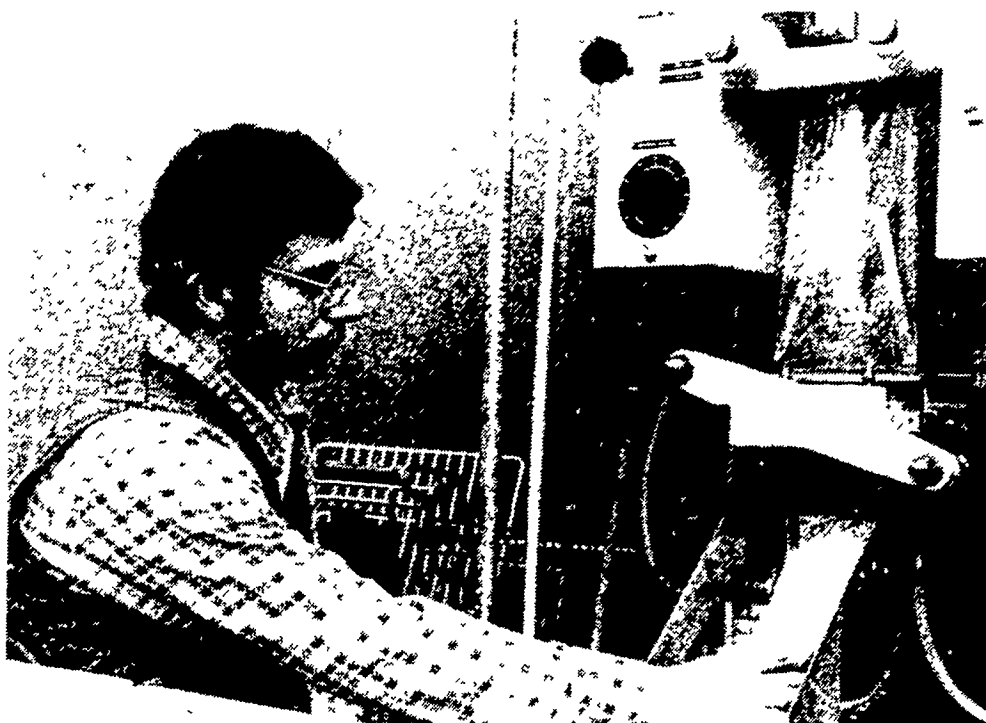

arrived twice a week and a small trailer which served as a store. They've come a long ways since then. The store is spacious, and they have all of their own processing facilities, including equipment to bag either milk, orange juice, and chocolate milk.

"The portable rig was a good deal for starting out," Hitz remembered, but their own set-up coupled with their own schedule is even better. They made that switch in January of 1975. They market all of the milk from their 64 registered and grade Holsteins, and have a capacity for 100 milkers. They're milked in a parlor

and housed in a four-year old free-stall barn.

The cows are grouped according to production and fed a total mix ration (TMR) which the family considers to be not only economical, but also very productive. "I wouldn't want to go back to the old feeding system," Guy said. The ration consists of grass silage, soybean meal, corn silage, high moisture corn, and ground ear corn. Everything is tested for quality and quantity of nutrients.

Summarizing their operation, the Hitz's say they went into it when milk was relatively short and they had no problem selling milk. But advertising helped. They publicized their "grand opening" in newspapers as well as radio and lured customers with offers of free meat. It caught on quickly. Now their biggest concern is running out of enough cows to keep the milk supply adequate.

Guy Hitz demonstrates how the filling machine operates. The family prefers plastic bags to bottles because they reduce expenses in the processing room by eliminating the need for bottle washers. Hitz also

believes that the bags, which cost three cents a piece, are also more sanitary. They were one cent each before the price of petroleum products went up.

of the sire are included in the summarization.

'Gold medal' sire named

A registered Holstein bull owned by Sire Power, Inc., Tunkhannock, has recently been designated as a Gold Medal Sire by the Holstein-Friesian Association of America.

He is 9H134 P-A-Longview "Big Apple", a VG (86) son of 7H058 Round Oak Rag Apple ELEVATION, EX GM.

"Big Apple permanently joins the Gold Medal Sire ranks after being designated

as both "Production and Type Qualified" in a recently published issue of Registered Holstein Sire Performance Summaries. The Holstein Association, in cooperation with USDA, calculates and prints sire performance information three times each year. These facts are used by dairymen as a guide for selecting sires for use in their herds.

The temporary designation "Type Qualified" is re-evaluated each time a sire's performance is updated. Requirements demand a certain level of body con-

formation improvement in the daughters of the sire when compared to their dams. Other factors included pertain to Holstein breed average type scores for age and the number of daughters considered.

"Production Qualified" is also temporary in that the prescribed qualifications must be met each time the performance of the sire is figured. USDA calculates the production performance of the sire's daughters, comparing them with their herd mates. All DHIA production records accepted by USDA from the daughters

How to put fertilizer where it does the most good.

Farmers looking for ways to reduce crop production costs, are taking another look at placing some of their fertilizer in a band. Because pound for pound, it results in better nutrient uptake and utilization.

We call it precision placement. And it's a proven method of giving your crop a better start. Especially when you use liquid fertilizer made the SLF® way. Because it gives you the additional efficiency of highly available polyphosphates and micronutrients.

It's the fertilizer and the program that consistently delivers higher yields and profits. Recent international data confirms this as well as our own studies. So discover the extra efficiency of precision placement of liquids rich in polyphosphates.

Talk to us today about how this program and ARCADIAN® liquid can increase your efficiency and reduce production costs.

Peach festival starts today

GATCHELLVILLE — Maple Lawn Farms, is ready to receive visitors for their second annual Peach Blossom Festival, which begins today, (Saturday) at 10 a.m. Sunday's activities start at 1 p.m. Programs on both days last until 6 p.m. Located three miles north of Fawn Grove, near the village of Gatchellville, Maple Farms personnel have erected peach tree signs to help direct motorists to the site.

Moving to a much larger building than last year's site in anticipation of more craftsmen, more home-made food concessions and more guests, this year's event promises to be a real "celebration of life on the land," according to Mr. and Mrs. Paul McPherson, who initiated the festival last April at their Gatchellville farm.

Already they have amassed over 40 craftsmen from Maryland and Pennsylvania to show and sell their handiwork; everything from art to ceramics, needlework to refrigerator magnets, hand-painted jewelry to sand art, dolls, wood carving, leaded glass, macrame, scrimshaw, caning, leather craft, rugs, flowers, calico and candles, acrylic blocks, Christmas ornaments, cone craft and Bicentennial memorabilia. Bedding plants also will be available.

The Stewartstown 4-H Club will man its petting zoo for children and all animal lovers. In addition to the penned animals, they will offer pony and buggy rides around the grounds, weather permitting.

True to the spirit of the occasion, there will be peach puree to top vanilla ice cream dipped by the Milk and Money 4-H'ers from Airville, while the area Trail Riders 4-H group whirrs up gallons of milk shakes.

Eager to pay for their new fire truck, the Delta-Cardiff firemen and their auxiliary under the leadership of Joann Briton will provide fresh pizza from their Pizza Wagon, beef barbecue, baked goods and fudge as well as a bazaar table with crafts and old books for sale.

York County lamb producers will be promoting lamb with lamb-ka-bobs and stew in a unique setting next to the Disabled American Veterans, Baltimore Chapter No. 1, selling the great American hot dog with toppings and coffee.

For dessert in addition to the bake sale tables, there will be the Pennsylvania Dutch funnel cake and ready made to order donuts by the dozen.

"If we can contract some expert apple butter makers, we'd also like to host an apple butter boil Saturday for all to watch and stir. The canned apple butter would

then go on sale Sunday by order or on a first-come, first-served basis," announced McPherson.

"Last year's festival brought in a crowd of 2,000 on a weekend unusually cold about a week before the blossoms actually showed. This season's excessively warm weather is pushing the blossoms a little ahead of schedule, but different varieties hold the blossom season over about three weeks," says the fruit grower.

According to children and grownups, one of the most fascinating and fun amusements at the Maple

Lawn Farms festival is the peach bin wagon train ride through the orchards where they can see the pruners cutting back branches to keep the trees in shape. The trees offer a veritable sea of pink overhead from which they can take home branches for flower arranging.

Planted in contours, the orchards present a first hand picture of conservation farming. School and group tours can be arranged to view the many conservation measures on the farm as well as other crop operations: Apples, blueberries, corn.

"This is a time for venting

the pent up exhilarations of spring fever," asserts Mrs. McPherson. "We feel fortunate in having so much beautiful and productive nature around us, we just want others who aren't so close to the land to be able to share in our experiences and joy."

On March 26, 1776, outside Quebec, Col. Benedict Arnold remained indomitable even though he received but a small trickle of reinforcements. His soldiers were erecting batteries on the Plains of Abraham and constructing ladders to storm the city.

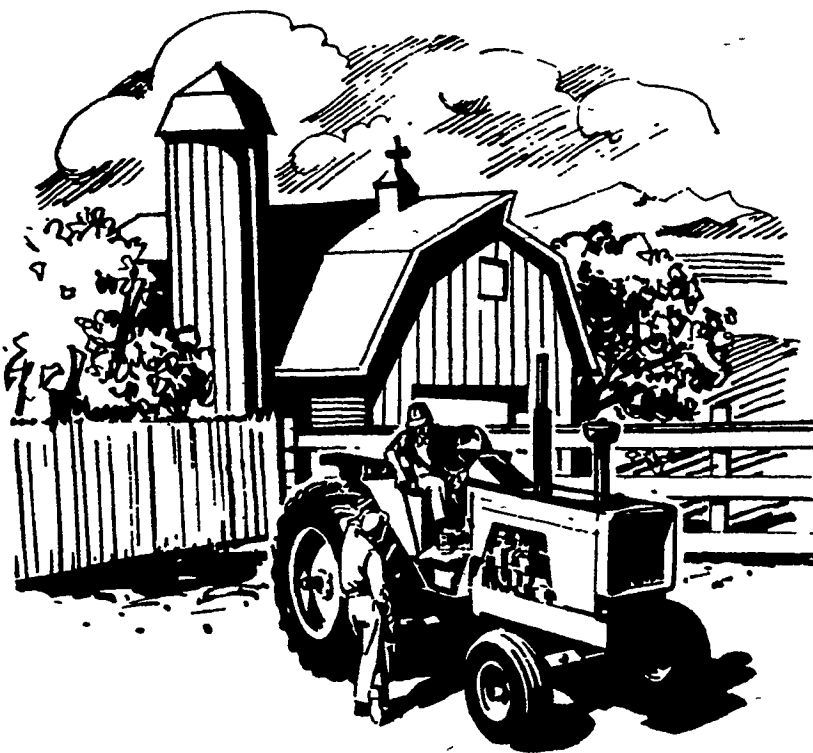

"With our new storage building near the packing house and grain elevators that hold over 50,000 bushels of corn in season, we have planned an event that will be free from temperament of the weather and full enough with diverse activity to interest young and old alike. The week after Easter, and two weeks before Mother's Day, we hope the time is right for people to get away from it all and see a little of God's country where their food is produced."

Beat the weather

Get the most feed value out of your hay with Beacon Hay Pre-Serv*

You get more milk per ton of hay when you treat your hay with Beacon Hay Pre-Serv. Hay Pre-Serv lets you cut hay as much as 26 hours earlier, at moisture levels up to 25%.

This means a larger hay crop, with less leaf loss and shattering, and less risk of weather damage. Hay Pre-Serv is easily applied to baled, chopped or stacked hay and prevents mold, spoilage, oxidation and excessive heating.

You get better color, improved palatability and more digestible nutrients in every ton of hay you cut.

If you grow succulent forage crops, make the most of them with Beacon Silage Pre-Serv.* With Silage Pre-Serv you can harvest at moisture levels from 40 to 70%, and get as much as 30% more feeding value per ton of roughage.

Evil weevils infesting Md. alfalfa fields, management tips given by Extension staff

COLLEGE PARK - Extension survey entomologists at land-grant colleges have several things in common with weather forecasters. Among them is the chance to have their predictions go awry.

A case in point is the recent explosion of weevil populations in alfalfa fields throughout Maryland. And the prospect appears imminent for the worst infestation of this voracious leaf-chewer since the early 1960s.

Ironically, less than six weeks ago, informed observers were predicting lower insect populations than normal in 1976 because of a stretch of sub-freezing temperatures this past winter.

But the recent spell of warm weather has triggered an early hatch - some eight to 10 days earlier than in the two previous years. And it may well have improved the percentage of eggs hatching out.

In addition, the weevil larvae do their most evil work when daytime temperatures reach 80 degrees F. and nights are somewhat cooler.

Alfalfa fields with a southeast exposure seemed to be the most heavily infested with feeding larvae during a pre-Easter check conducted in Frederick County.

All 14 alfalfa fields in the spot survey showed varying degrees of weevil infestation, University of Maryland agronomist reported.

With most farmers busy planting corn, well ahead of schedule. Dr. Wallace Harding, entomologist, advised those who grow alfalfa to take time to check their hayfields every few days for signs of heavy weevil populations. When 50 percent of the plant tips show damage before a field has approached the full-bud stage, the field should be sprayed immediately.

Early cutting soon after the full-bud stage can often eliminate the need for spraying, under normal conditions. But farmers should not count on the stop-gap measure this year, Dr. Neri Clark, agronomist, warned. (Average cutting date for first-crop alfalfa in the Piedmont area of north central Maryland is May 10).

The Extension agronomist observed that the alfalfa

weevil damage problem is being accentuated in some areas by moisture shortages on light, sandy soils. This places the young plants in a stress situation which makes them especially vulnerable to insect pests.

Warm weather is also

accelerating the hatch of spittlebugs, and masses of this sucking pest have already been observed on both alfalfa and red clover fields in western Maryland, according to *Insect Notes*, a weekly mimeographed newsletter published by

Extension entomologists at College Park. So, far, however, the spittlebug populations have not generally reached sufficient proportion to cause economic losses.

Detailed information for control of both alfalfa

weevil and spittlebug is contained in two current publications of the Cooperative Extension Service. At least one should be available free of charge at county Extension offices throughout the state.

The first is a four-page

leaflet titled "Control of Insects on Alfalfa and Reed Clover" (Fact Sheet 159). The other is a 30-page manual covering the entire spectrum of Maryland farm crops. It is titled 1976 Pest Control Recommendations for Field Crops.

What's New

'Economizer'

RegO offers an automatic gas shutoff that permits welders to save up to 30 percent on gases, as well as operator time and labor.

The RegO "Economizer" is ideal for situations in which welding operations are intermittent. Hang the torch on the hook and the gases are shut off completely. Remove the torch, pass the tip over the pilot light, and the torch is instantly ready to use again.

Farmers' story being publicized

[Continued from Page 1]

pearance, Holloway armed himself with lots of facts and figures from the Department of Agriculture. He was a guest on the "Larry Angel Show" on three occasions to represent farmers and has served on panel discussions along with representatives from unions and consumer groups.

Asked if he thought non-

farm people might have benefitted from these talks and visits, Holloway responded quickly: "Sure, they couldn't have helped but benefit."

He tells an interesting story about one of his TV appearances when the leader of the women's group began to attack the unions and blamed them for high prices. During a commercial

break the lady was reprimanded by TV-station employees and warned she'd be kicked off the show if she didn't cool it. Pressure also arose from within her group and she lost her leadership position. The consumers group then allied itself with the meat cutters' union, a move which Holloway tried to warn them of. He told them the union would use

their group for all it's worth and then drop them when they're through. That's what happened, according to Holloway.

"American consumers really don't know what they have," he said philosophically. It concerns him and he believes it should be of concern to all farmers. When asked by the ladies how he felt about America's

food exports, he stated: "Yes, I'm in favor of exports for as long as American consumers are paying less for food than anyone else in the world and aren't willing to pay a little more. Furthermore, he believes that "to build our efficiency we have to produce, which means we must export because we produce more than we need. Our incentive to produce is profit. No one produces more than the American farmer, and that's because of the free enterprise system. Government interventions are counterproductive."

"They (consumers) must realize this," the public-relations minded farmer said.

Holloway is concerned about not only what the consumer's image of the farmer is, but also about what the government is doing. EPA, OSHA, FDA, the availability of agricultural land, and the cutting back on ag research are issues which concern the farmer.

"There's a simple answer to overcome our problems, and that's to shift some of our priorities and pay a little more for food," the Maryland farmer stated. "We must allow farmers to become competitive for land, rather than let it all go for housing. The consumer is willing to pay tremendous prices for a building lot, but unwilling to pay a little more for food. We need the land to produce food."

Holloway's words and actions have won him various honors and even national recognition. Recently he was named as one of the country's outstanding spokesmen for agriculture. (See related story on page 96).

"There's so much we (farmers) can do, if we just used our imagination," the award recipient said. He also

stressed the value of personal contacts — talking on a one-to-one basis with the public to let them know what farming is all about.

Holloway has had his farm open to visitors for the past eight years and it's open to them again this year. Every Spring he sponsors a day when housewives, teachers, and children can come to see the animals, go on hayrides, and hear his side of the food story. "Lots of school kids come here," he said with a smile.

"The people are very appreciative, and they ask some really intelligent questions," he remarked, expressing thorough satisfaction with the response and results he's getting from these farm visits. "I thoroughly enjoy doing it, but I couldn't do it all if it weren't for my brother doing double-duty on the farm when I'm giving a talk somewhere," he said.

The first vice-president of the Maryland Farm Bureau, which is the counterpart of the Pennsylvania Farmers' Association, Holloway says the organization is becoming increasingly active in fostering improvement in urban-rural relations. As an example he cited the group's plan to "adopt" city legislators for a year.

Young farm couples in Maryland are hosting city councilmen from Baltimore. They're welcome on the farm any time and will be invited for dinner occasionally. To make it even more worthwhile, the Maryland Farm Bureau is willing to go into a possible reciprocal program.

These Marylanders are no more satisfied with misrepresentations and misunderstandings than any other farmer, but instead of just complaining among themselves, they're attempting to do something about it in a variety of ways.

LIFE on the farm

By Dieter Krieg, Editor

© Dieter Krieg 1976

Warm, bright sunshine; tree branches whispering as they sway with the breeze; robins hopping across the lawn; birds filling the air with their songs; freshly plowed fields releasing their earthy scent; blackbirds calling; cows advancing, army-like, across a lush, green pasture, all of them facing the same direction and their neck chains tingling; reflections in the pond; a couple cotton-like clouds drifting in a vast, clear-blue sky - these are a few of my favorite things at this time of year.

Whether working in the field, or sitting outside on the lawn, such blessings and advantages of farm life never go unnoticed, especially on

Sunday afternoons - normally the only time off for the farmer, and then only for a few hours.

I love warm weather and some of the niceties it brings with it - like those mentioned above - and climbing aboard a tractor which has already been warmed by the sun rather than being ice-cold to the touch. With farming in my blood, I remember the days on the home farm, and the warm Spring days which generate new life, beauty, and "farming fever."

There is always a lot of work to do on the farm - particularly at this time of year - but in spite of these busy days of plowing, planting, fence

mending spring cleaning in the house, barn, and surrounding areas, and lawn mowing - the beauty of the countryside stands out. While birds seem to applaud the warmth of the day with their chirping, and farm children take advantage of it by riding a pony, taking a pet calf or heifer for a walk, or playing ball, the farmer may rest a while sitting on the back porch steps after lunch and silently admire - almost worship - what he sees and hears.

Warm weather is here. Arriving with it is a full slate of chores to be done and an endless list of niceties which make life on the farm worth living.

The Election Scene

[Continued from Page 12]

for the Republican nomination to the U.S. Senate in the April 27 Primary.

"George Packard has made the right to bear arms a part of his campaign platform" declared James M. Spicer, legislative chairman of the shooting sportsmen. "He is on record

Democratic Presidential contender Morris Udall will be in Lancaster Friday morning, arriving by train at 9:11 a.m. train and departing at 11:11 a.m. He will walk from the station to Central Market, then walk to one of the farmers markets.

in opposition to gun registration and confiscation and any form of gun control legislation which would inhibit the freedom of law-abiding sportsmen and gun owners."

Packard, 43-year old former executive editor of the Philadelphia Bulletin, walked 602 miles through the towns and hamlets of Pennsylvania from last October through early March. The one message he heard over and over is that people are against gun control in any form.

Early in his campaign, the candidate from Montgomery County spoke on the senselessness of controlling guns: "I own several shotguns and enjoy hunting. I also understand the pressure for some form of gun registration, but no law I have ever heard of would effectively curb their illegal use."

Concluded Packard: "I will not tolerate any form of legislation which would inhibit the freedom of law-abiding sportsmen and gun owners."

"I have come to believe that there is more common sense on crime and gun control in every township and borough in Pennsylvania than there is in all of Washington, D.C."

Packard has also proposed a national policy to cut back on the paperwork burden that threatens to make small business extinct.

"One of the mainstays of this nation is its businessmen who have built up its towns and communities," he declared.

"In walking over 600 miles around Pennsylvania, I heard from men and women who run small businesses - corner stores, barbershops, diners, small manufacturing plants - who feel they have been betrayed by the politicians and bureaucrats who are running this country. They told me that they are faced with the threat of strangulation by regulations and an accompanying blizzard of paperwork."

"Small businesses are those that employ fewer than 500 people and 80 percent of those businesses actually employ fewer than 10 people. But did you realize that these small concerns provide 55 percent of the total U.S. business jobs?"

"But small businesses are losing ground. They are being allowed to fall farther and farther behind year by year. And part of the reason is the avalanche of paperwork that is no longer a nuisance but has become a threat to survival."

"I would support legislation requiring each new federal form to be approved by the General Accounting Office," Packard said.

"Furthermore, I would propose legislation to review existing forms and other red-tape requirements."

Packard has announced a major change in his campaign leadership. John S. D. Eisenhower, son of the late President Dwight D. Eisenhower, has been appointed chairman of Packard's finance committee, to replace the former Secretary of Defense Thomas S. Gates, who President Ford recently named U. S. Representative to China.

legislation to control political dynasties created by limitless re-election of congressmen.

Norman O. Aamodt, a Republican candidate for Congress spoke Thursday afternoon at a neighborhood coffee at the home of Mr. and Mrs. William K. Shirk, Lititz R2.

"A three-pronged attack is necessary to save the family farm," Aamodt told the gathering. "First, low cost loans, must be made

available to second and third sons in farm families to allow them to establish themselves in farming. Second, farm land must be taxed as farm land and not on the same basis as development ground. Third, a fair market must be established by promoting a competitive climate with foreign imports. Taxes which American Farmers must pay are rebated to European farmers so that European farm products have an unfair competitive advantage in the world market." Aamodt proposed import tariffs to match foreign rebates.

Aamodt's campaign slogan, "You'll be happier with Aamodt in Congress," is related to his desire to bring a return to government with constitutional limits, he said. He opposes gun control because it violates a right guaranteed by the second amendment, and takes a similar stand against abortion.

In international affairs, he sees detente as hazardous, opposes giving away the Panama Canal, and advocates a strong defense posture supported by adequate research and development to insure superiority in technology and weaponry over the Soviets.

A four-term limit to the congressional office is an Aamodt proposal to keep government closer to the people. Aamodt, vowing to set the example himself by stepping down after eight years, would initiate

Political debate scheduled

The contenders for the seat of retiring U.S. Senator Hugh Scott will take part in a live question and answer session on Public TV's "Pennsylvania: People and Politics" on WITF, Hershey.

Candidates for Pennsylvania's Democratic and Republican primaries will share their views in a 90-minute interview program on Monday at 7 p.m.

PPTN host-moderator John Roberts will appear with Democratic candidates Jeanette Reibman and William J. Green. Reibman is a State Senator representing Lehigh and Northampton counties and is chairperson of the Senate Committee on Education. Green is a U.S. Representative from Philadelphia's 3rd District and a member of the House Ways and Means Committee. Their portion of the program airs from 7 to 7:30 p.m.

Republican primary candidates are featured on the program from 7:30 to 8:30 p.m. The include: C. Homer Brown, a retired engineer and lawyer and former U.S. Civil Service executive; Mary E. Foltz, a realtor and residential builder; Henry John Heinz, III, U.S. Representative

from Pittsburgh, 18th District, and a member of the House Interstate and Foreign Commerce Committee; George R. Packard, former editor of the Philadelphia Bulletin; Arlen Spetor, former district attorney of Philadelphia; and Francis Worley, an attorney and former State Representative from the 91st

District, Adams and York Counties.

Portions of "Pennsylvania: People and Politics" will be pre-recorded in order to afford each candidate equal time to air his or her views.

Pennsylvania: People and Politics is a production of the Pennsylvania Public Television Network.

World's Smallest Fire Alarm

You can protect your family and your home with the Compact Fire Alarm. This incredibly small and powerful alarm weighs only 1 ounce, yet it can be heard easily throughout a large house. It is about the size and shape of the smallest night light and plugs into any wall outlet without any additional

wiring. The alarm contains a miniature electronic sensor that sets off a built-in alarm buzzer whenever room temperature reaches 135 degrees Fahrenheit. It can be moved from room to room - even packed for use in hotel room or camper while traveling. \$18.95, postpaid. H & V Enterprises, Dept. NR-101, P.O. Box 8139, Salt Lake City, Utah 84108.

CAMP HILL — More than 500 persons attended the annual legislative banquet of the Pennsylvania Farmers' Association held recently to discuss important agricultural legislative issues. Attending from Montgomery County Farmers' Association were: First row (l-r.) — William Gerhart, Rep.

Roosevelt I. Polite, Rep. G. Sieber Pancoast, Mrs. Charles Rhodes. Second row (l-r.) — Mr. and Mrs. Ken Schultz, Wallace Derstine, Norman Landis, Philip Schultz. Third row (l-r.) — LeRoy Derstine, Wilbur Seipt, Frank McDonnell.

Nat'l Central posts increased quarter earnings

LANCASTER, PA — National Central Financial Corporation, holding company for National Central Bank, today reported increases in earnings, deposits, loan activity, and assets for the quarter ending March 31, 1976.

Income before securities gains and losses was \$2,300,422, an increase of .3 percent over the first quarter of 1975. Per share earnings was \$.65 for both periods.

After securities gains and losses, net income increased by 2.4 percent to \$2,362,890, or \$.67 per share, from \$2,307,589 and \$.65 per share a year ago.

Total deposits on March 31 increased 9.1 percent to \$903,257,073, as compared to \$827,911,695 at the end of the 1975 first quarter. Loans

outstanding totalled \$629,706,875, a .4 percent increase over the year-ago figure and a 5 percent increase over the 1975 year-end level.

Total assets rose 8.8 percent to \$1,007,404,967 vs. \$925,625,839 for the same period last year.

Wilson D. McElhinny, president, reported that commercial loan demand has increased throughout the National Central Bank trading area. "We believe this increased lending activity together with other encouraging trends indicates the beginning of a period of sustained growth for our economy," he said.

National Central Bank operates 50 offices in Berks, Chester, Dauphin, Lancaster, Lebanon and York counties.

The Lancaster county Conservation District presented the Penn Manor FFA with 230 bundles of evergreen trees. These trees were given out to interested homeowners and farmers in the community. Steve Charles, grade 10, (pictured above), took care of the orders.

Deadline extended

The U.S. Department of Agriculture has extended from April 15 to April 29 the time for commenting on testimony at a public hearing held last February to consider changing transportation allowances in the New York-New Jersey federal milk marketing order.

H. L. Forest, dairy official in USDA's Agricultural Marketing Service (AMS), said the additional time for filing the briefs was requested by Delaware County Dairies, Inc., a handler in the market.

The major proposals at the hearing were intended to permit individual producers to bear more of the farm-to-plant milk hauling costs than they do now, to equalize the cost of milk to all handlers wherever located in the market, and to improve competition between New York City and Philadelphia handlers in the sale of fluid milk in northern New Jersey.

Forest said federal milk marketing orders set

minimum prices, based on supply and demand, that milk dealers or handlers must pay dairy farmers for milk.

Persons wishing to submit comments on the record of the hearing should send them to the Hearing Clerk, Room 112-A, U.S. Department of Agriculture, Washington D.C. 20250, where anyone may review them.

Pewter Problem

In colonial days pewter was hand cast. This technique is still used but has been joined by spinning and stamping methods for greater versatility. Pewter is an alloy of several metals consisting mainly of tin. Small amounts of copper and antimony are used for strength and brilliance. Certain chemicals and acids present in many foods may cause stains and pitting if in long contact with pewter. Common culprits include party dips, eggs, salad dressings, oils, vinegar, salt and fruit juices.

Solar energy favored

Norman O. Aamodt, Republican candidate for Congress, discussed the hazards of nuclear power plants recently. Citing the near melt-down in Alabama of the Brown's Ferry facility, Aamodt pointed out the hazards of nuclear power plants are sufficiently great that no more should be built. He pointed out that the development of safe alternate sources could satisfy the nation's need for more electric energy.

Aamodt who was a pupil of Daryl Chapin, inventor of the solar cell in 1954, urged development of the existing solar technology. Aamodt believes solar energy can be by far the cheapest source of energy, and it is inexhaustible. He pointed out that forty acres of solar collectors in Death Valley

could supply all power needs from the Mississippi River to the Rockies.

Aamodt has proposed a testing site in the 16th district where the physical characteristics lend themselves to testing sun, wind and small streams as alternate sources of energy. The state of Pennsylvania is about to dispose of this site, 550 acres of land, the former Fuzzydele Farm in northern Chester County, where a multi-million dollar prison plan was knocked down recently by citizen protest. There would be little change in the physical characteristics of the area, and the plan could be funded through Rural Electrification Administration with whom Aamodt has worked in his business life.

Field work pulls into high gear

A dry spring has allowed fieldwork to move into high gear in the Commonwealth. Six days were considered suitable for field work last week with soil moisture supplies rated adequate to short. The central counties were mostly short on moisture. Activities included top dressing, plowing, orchard work, grape tying and some planting of oats, clover, potatoes and a very little corn. Early indications show that the warm spring was not ideal for maple syrup production.

Spring plowing is nearly 60 percent done. This is a week ahead of 1975 and about two weeks ahead of usual for this date. By area, plowing is nearly two-thirds done in the south and central and about one-third done in northern counties.

Oat seeding is reported at 44 percent complete, a week ahead of last year and usual. Northern areas show 39 percent sown while central and southern counties are 47 percent done. Potatoes are

17 percent planted - a week ahead of 1975 and about 10 days earlier than usual. Most progress has been made in central counties. Tobacco beds are over 80 percent set with some sprouting reported.

Hay stands are rated in mostly fair to good condition. This is comparable to last year and the crop now needs a warm rain. A below average amount of feed is being obtained from pastures as they also need rain.

Damage to the fruit crops from the recent frost is hard to assess as yet. Most likely, sweet cherries were hurt as well as low blocks of peaches and early blooming apple varieties. The crop development is about 2 weeks ahead of usual. Peaches are considered 60 percent pink and nearly 10 percent in full bloom. Cherries are one-half pink and one-third in full bloom. Apples are rated two-thirds pink with under 5 percent in full bloom.

BEEF CATTLE DISPERSAL

QUALITY BREEDING ANIMALS

SATURDAY, MAY 1, 1976

11:00 A.M.

In the sale barn on the Trout Farm located along Dublin Road, 2 miles North of Biggs Ford Road and Walkersville, 8 miles North of Frederick, Md. via Rt. 15 North.

organically grown vegetable
plants for sale. 85 cents a
dozen; lettuce, cabbage,
cauliflower, broccoli, celery,
green pepper, egg plants,
tomatoes, kitchen herbs.
Resurrection Greenhouse, .6
mile South of New Danville
on 324. 717-872-4012

Get your Hybrid vegetable
plants at Martin's
Greenhouse. Tomatoes in
many different kinds. Also
cabbage, broccoli, egg
plants, cauliflower, brussel
sprouts and mild and hot
peppers, etc. Bedding Plants
too. Call 215-683-3813

FERTILIZER

Are you tired of paying \$150
or \$200 or more per ton for
fertilizer? Try dry poultry
manure fresh from the
broiler houses. Delivered
and dumped on your farm in
8 to 16 ton loads within 50
miles of Lancaster. You can
buy 8 to 100 tons. Next
delivery in June. \$25.00 per
ton delivered. Write Box 27,
Strasburg, PA 17579

ELECTRONIC SEED TREATMENT IS NOT A FAKE

Rather it will make history. It is the coming thing. Makes much quicker emergence. Double stooling. Double the roots. Protein averages about 1 1/4 percent higher in grain, worth \$20.00 per acre. Treating continues on Wed. and Thurs. by appointment at Edgar Martin farm on Orlan Rd. 1st farm west of Weaver's Poultry Processing Plant which is south of New Holland Sales Stables. Dr. Corson was called to other states, but he left us a treating machine to use. Call or write for literature and testimonials from the Menonite farmers of Middlebury, Ind. You'll be glad you did. You lose much by waiting a year, especially in drought like the weather prophets predict. Don't fail to ask for literature.

ROBERT E. PLANK

REALTOR

717-393-1384

WILLIAM PENN

2 stone homes & a banked barn of the same, perfectly & pleasantly placed on 25 acres, are at the end of a maple tree lined lane. An Eastern Lancaster County flowing pasture & stream grace the southern boundary enhancing the natural beauty of this Penn Grant Farm.

The splendid Paramount home includes a southern exposure & enjoy the warmth of 7 fireplaces. Spacious original home design, with dignified high ceilings (including five bedrooms) offer an expanse unparalleled in today's world. A native country kitchen with walk-in fireplace & beehive oven will indeed tantalize your imagination as you reminisce about earlier splendor.

While the miniature stone building (original homestead) needs attention, it could be suitable as an ideal retreat for your most welcome guests.

Spring house, school house & original framed sheds complement the gracious homes & barn, offering a fine opportunity to enjoy the tranquility of the past with an eye towards the future.

Offered at \$165,000 with restrictions, up to 100 additional acres available. Please ask for Mr. Artinian at 215-857-2141.

140 acres tillable, 80 pasture, 15 woodland, 80 free-stall new barn, cement 20 x 60, 20 x 35 Harvestore, large brick home close to Rt. 14, Lower Bradford Co. Lower Franklin Co. Among the better limestone dairy farms. This 130 acre farm nearly all tillable will interest you as it has many splendid features.

Luzerne Co. 120 Acres, 50 stall (like new) barn, large pond.

Among Bradford Co's biggest and Best!! 770 A. complete dairy facility, Harvestores, automatic feeding, loose housing barn, beautiful homes. Owners willing to divide it into (2) operations, dairy or beef.

Unusual opportunity near Rtes. 219, 22, 422. Complete dairy or beef facilities. 6 BR Home. This 345 acre Cambria Co. farm will open your eyes.

(7H431) Hubervue Monarch, Very Good (86)

Yes, the first proven son of Select Sires' Woodbine Pearl Comet has made the big time. According to the latest USDA Sire Summary [Sept. 1975], HUBER is plus across the board for milk, percent test, fat and dollar value. The type pattern on the HUBER daughters is outstanding too. He is an outstanding improver of udders - siring udders that are high and wide in rear, strong in center support and smooth in fore with proper size and placement of teats. HUBER sires much depth and width of body with wide level rumps. You can use HUBER to correct set and bone in rear legs. ORDER A GOOD SUPPLY OF HUBER SEMEN NOW! \$5.00 per unit.

Harvestore[®] Farming: efficiency is the whole idea...

**In the past 27 years, more than 30,000
farmers have bought over
50,000 Harvestores.**

**37% of the structures we are selling today
are purchased by present owners.**

Here are just a few of the reasons why:

**1. There's more to a Harvestore
than meets the eye.**

Most farmers are skeptical about the advantages of a Harvestore system until they actually own one. They think because a Harvestore structure is the same general size and shape as a silo, it must do just about the same job. So, they figure it's just a fancy, expensive silo.

Farmers today do not buy anything just to impress their neighbors or dress up the farm. They're looking for more efficiency with less labor.

Preparing either grain or hay for storage by drying or baling costs money, takes time, and uses up a lot of fuel. Most of that money can be saved by storing your crop in an oxygen limiting structure such as a Harvestore.

2. The savings are real.

We've talked with thousands of Harvestore owners, year after year. If they've used their Harvestore structures right - and most of them have - almost without exception, they've prospered. One of the first things they notice is that their supply of farm-grown feed seems to go farther than it did before, which means feed bills for purchased feed are lower.

About the same time, they find that they're saving a noticeable amount of time and labor - a lot of it their own. They have more time to spend on management, and more time for their families. This is probably the advantage Harvestore owners' wives appreciate most.

**3. You get more from what
you have.**

Many, if not most Harvestore owners have found that by processing crops through their Harvestore structures, they can feed more animals from the same acreage. So, they expand, and as they do, their net worth increases, too. It's about this time that they begin thinking about adding another Harvestore structure. We know one family that has bought 39 of them during the past 25 years. Half a dozen aren't uncommon.

**4. You don't have to be big—or
rich to own a Harvestore system.**

We have lots of Harvestore customers with 40 or 50-cow dairy herds, others who feed out a hundred cattle a year or less, some who market under a thousand hogs a year.

Your Harvestore dealer offers feedlot planning service, feed ration consultation, and financing. He's used to consulting with all kinds of farms, with helping resolve all kinds of financial needs. He understands your problems and your opportunities and he stays around long after the sale is made.

**5. Harvestore helps take some
of the gamble out of farming.**

Take weather, for example. You know what a good, corn-growing heavy rain can do to hay that's laying in wind-rows. There's a lot less chance of that kind of damage when you can pick hay up and blow it directly into a Harvestore. Lots less leaves lost, too, because you're storing it at a higher moisture level. Same kind of story with grain. Harvest it at a higher moisture level... before fall rains turn your fields into mud. Less field losses, higher palatability, no baked-out nutrients, no drying costs.

**6. Take a tour and talk to other
owners.**

We've been selling Harvestores long enough to know that it's hard for most folks to believe that what we tell them will really happen when they own a Harvestore system. That's why we'd like to have you take a tour and introduce you to as many Harvestore owners as you'd like to meet. You ask the questions. We'll let them answer. And, we'll be glad to give you firm figures on your investment in a Harvestore system, plus our best advice on how to make it pay its way.

**7. Efficiency is the key to the
future.**

We believe in the future of agriculture. We know there will always be a place for the men and women who accept change when change means greater efficiency. Efficiency is what Harvestore is all about.

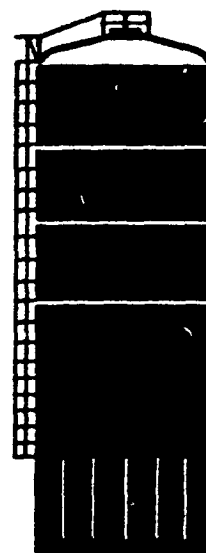

Talk to your Harvestore salesman. He will tell you the advantages proved by research of high moisture corn, haylage, and other crop opportunities made possible by the Harvestore system.

KEY TO PROFIT
AGRI KING, Inc.
 PERSONALIZED FEEDING PROGRAMS

FULTON, ILL.

A LOOK AT A WELL MANAGED FAMILY FARM MARBET FARMS — LEBANON COUNTY, PA

MR. MARVIN MEYER

I went to an Agri-King meeting in March 1973. I thought the whole program made good common sense - testing your feed and balancing the ration according to your cows and milk production. We had had fairly good production since 1966. We had been over 14,000 lbs. milk and over 525 lbs. butterfat since that year, but along with the high production we had a lot of herd health problems.

Since we've been on Agri-King our vet bills are lower and our milk production has been going up each year. We are really happy with the way our cows are performing.

MRS. MARVIN MEYER

I was asked what I thought of the Agri-King feeding program when we started in 1973. I had to admit that I was not for Agri-King — I thought it was just another gimmick. All I saw was another bill from Agri-King each month and it didn't look like we got much for it. I kept after Marvin all spring and summer about the program costing too much. "How are we going to pay all these bills?" I would ask him. About three fourths of the way through the summer Marvin said "Betty, sit down and figure the costs for yourself. I don't think it costs as much as you think." So we sat down and went over the records comparing them with the two previous years. We looked at the vet bills, the feed bills and the way the cows were holding production thus far through the summer. This is when I decided that maybe Marvin didn't make the wrong decision after all.

Now I'm sure glad we're using the Agri-King Feeding program. The boys and I do the milking and it's a pleasure to milk cows that give a lot of milk and do not cause a lot of problems.

Clyde Meyer holding Donna, a two year old, who is predicted 19,067 lbs. milk & 761 lbs. fat.

CLYDE MEYER

As we were starting the Agri-King feeding program in March 1973 I was scared because I didn't want our cows records to drop. I thought our cows were milking as good as they could, because they aren't all purebred and dad hadn't bought the highest priced cows to start with. We were averaging over 15,000 lbs. milk and over 550 lbs. fat on more than 80 cows. However dad persisted in staying on the program, because he thought the idea of keeping things in balance was the way to go.

We kept saying it was costing too much until mother and I checked things out for ourselves and saw the price of feed and vet bills were not going up and the cows were doing better at the end of this summer than they had in previous summers.

Since we are using Silo King and getting top quality hay and silage I can see a big difference in the way the cows eat. The biggest change I see in the whole thing is the way the first calf heifers milk and keep on milking. It's hard to believe the way they are peaking and holding production. A heifer like Donna, still milking over 70 lbs. of milk after being fresh more than 200 days, is doing a good job. And she is due to freshen again October 4, 1976. These heifers have been on the Agri-King program since birth.

JIM MEYER

I do all the feeding, and when we first started the Agri-King program it took me a little longer to do the feeding. I thought this was a big waste of time, but now it doesn't take me any longer to feed the cows than it did before. It's enjoyable feeding and caring for cows that are averaging almost 18,000 lbs. of milk and over 650 lbs. of fat.

Homestead Notes

Mt. Joy farm wife is Society 4 leader

By SALLY BAIR
Feature Writer

Mrs. Henry Reist, Mount Joy Route 1, leads a busy life which revolves foremost around her family. She is active in her church, her farm women society and her husband's business, but maintains that she is "just ordinary."

Her activities may be typical of many Lancaster county farm homemakers, but her contributions add up to a sizeable interest in her community and home.

As president of Farm Women Society 4, Mrs. Reist explains that she is serving her second term. She says, "I feel as though I grew up with farm women. I went with my mother when I was young, and before I knew it I was a member. I always enjoyed Farm Women. I've learned so much from them. It really is a learning experience as well as a social outlet."

Basically, Mrs. Reist says, farm women have not changed over the years of her association with the group. "Perhaps it has changed countywide because members are no longer only farm women. The basic principles remain the same and members are usually small town or country people. Programs are about the same."

Mrs. Reist recalls when the Penn State extension service provided programs which were probably more farm oriented than today. She said, "I'm sure they helped tell about freezing when it was a new method of preserving food."

Probably the most important part of Mrs. Reist's life is being mother to four sons, two of whom still reside at home. Tim is an apprentice tool and dye maker for Micro Precision Tool and Manufacturing in Hempfield Industrial Park, and helps on the farm after his regular working hours. Sam, a sophomore at Manheim Central, also lives at home. The oldest, Bill is a minister in Marysville. Although he will not graduate from seminary until May he is presently performing all the duties of a minister in the church. Dave, the next oldest, works with his father in the Reist Seed Company in Mount Joy where he now lives with his wife, Pam.

Although she lives in a historic house, built in 1833, Mrs. Reist said she prefers to have a home which is "lived in." With four young boys around she said she never wanted to have furniture that she had to worry about, and wanted them to feel at ease.

Mrs. Reist admits with a laugh that she once said she'd never marry a farmer, but in retrospect adds, "I'm really grateful for a farm. We are fortunate to have this place, especially to rear four boys. I love it."

Mrs. Reist was born on a farm near Silver Spring, but her family moved to Landisville when she was six. Both parents, Mr. and Mrs. Frank Nolt, still live there.

She met her husband through Rural Youth, which was a group of post-4-H'ers. She said, "That really was a match-making group." She and her husband served as officers at the same time and, she said, "It was convenient for him to pick me up and take me along to meetings."

The Reists have been married for 25 years in January and moved into their present home at that time. When she moved on the farm, she said, "I didn't know the first thing about anything."

Today the crops are farmed by a neighbor, except for four acres which the four boys jointly farmed in tobacco last year. Mrs. Reist said they plan to do it again. She said she and her husband used to farm tobacco and tomatoes and at one time had 3,000 layers "until they didn't pay anymore."

Now the Reists fatten steers and have a flock of sheep,

from which they sell the wool. Henry has worked full time for Reist Seed Company since 1960.

The Reists are members of the Landisville Church of God, and Mrs. Reist is a deaconess in the church, a position to which she was elected. She said she was especially busy this past week because it was Holy Week, and she helped with baptismal services and communion. She said her denomination still practices the washing of feet twice annually, and she assists in preparing for that ritual.

Explaining her church, she said it was founded in 1825 when it split with the Dutch Reformed Church. She is one of five deaconesses and her husband is an elder.

She also works with the York-Lancaster District Missionary Forum which meets twice annually. Its purpose, she explained, is to raise money for their church's missionaries in Haiti, Bangladesh and New Mexico, and programs at the forum usually deal with these missions.

Another group which plays a part in Mrs. Reist's life is the Mountwaybia Club, which she described as a "book club." The club meets every other Wednesday, from October through May, and at each meeting a member presents a topic of interest.

This year's programs all deal with the Bicentennial year, including colonial music, medicine, cookery and women of the Revolution. Mrs. Reist presented a program on colonial art. She said she researched it and found the topic quite interesting.

Her interest in art is long standing. Upon graduation from Hempfield High School she enrolled in the Moore Institute of Art Science and Industry in Philadelphia. She said she enrolled there at the "urging of my sister who was a student at Temple."

At the Moore Institute she studied technical design and worked at designing wallpaper, dress fabric and upholstery fabric. She said she was able to sell some of her designs and worked the "twilight" shift at a local bank. "I was able to work my way through school." She explained that during the war years there were many jobs available and since her school work was done during school hours, the evening shift coincided perfectly for her. Lots of college kids worked then and "it was fun."

One tribute to her ability in design work was an award she won from Pillsbury Mills in a contest they sponsored for the students. They offered a prize to the student who designed the best wallpaper for them, and Mrs. Reist won the \$50 award. She said, "I was really thrilled with that much money." Pillsbury screen painted her design and used it in their showroom and offices in Minneapolis and offered to send her enough of the paper to decorate a room in her home.

Mrs. Reist said she used some of the paper in her bedroom at her parents' home where she was living then, but saved some. Luckily, it turns out. When she married she used it in her dining room, where it still graces the walls. The design incorporates an old mill, a new mill, a hand reaper and a combine, all tied together with wheat and morning glories. It is interesting and easily worth a first prize.

Her training in design was not wasted because upon graduation, Mrs. Reist went to work for Armstrong in their Bureau of Interior Decoration. She explained that rooms were built which showed color schemes which could be used with their linoleum. She worked there four years and retired when her first child was born. After her second child was born they asked her to return, which she did briefly, but said, "I found out it was not for me,"

Her farm home was built in 1833, but Mrs. Reist says she just wants it to be a home that is "lived in."

Mrs. Reist pours iced tea by her kitchen sink on a warm spring afternoon.

referring to being a full time career woman and mother.

Mrs. Reist says she does some watercolors but added, "I haven't kept up with painting the way I should. I would like to do some pen and ink drawings of our old church for the bicentennial year."

How did she become interested in drawing? She said, "I didn't realize it at the time but my mother always encouraged me to draw pictures."

On Mondays, Mrs. Reist is a driver for the Meals on Wheels program, a service which she describes as "wonderful. It really means the difference between these people living in their own homes or going to a nursing home. I get far more out of it than I give."

Her job is simply to drive the meals to the recipient, with someone else doing the actual delivering. But she

(Continued on Page 44)

Country Corner

Corn planting time is here again

By MELISSA PIPER

The door banged loudly against the house
Enough to scare the bravest mouse.

He scuffed his boots across the rug
And flicked a hand instead of a hug.

The farm wife handed her husband a glass
As he opened the refrig just as fast.

Guzzling the lemonade down in a flash
He grabbed the phone and a chair with a clash.

She shook her head and smiled just barely
When corn was waiting were wives treated fairly?

And as quickly as he had come in from the barn
He left her with overalls which needed a darn.

Yes, corn season's here with work to be done
But where are the trips, vacations and fun?

The seed dealer sees more of him, she thinks
All I do is make up cool refreshing drinks.

Corn is a crop which requires much time
But is remembering your spouse such a terrible crime?

Mt. Joy

(Continued from Page 42)

tells how she often re-visits a blind man once a week and helps him pay bills or goes to the store for him. There is also the person for whom she checks the mail and empties the garbage. One really gets the idea that Mrs. Reist is not just a driver, but a friend as well.

Mrs. Reist says she has no hobbies. But she describes her large family garden which is used by the whole family and her parents-in-law. The garden is huge, and certainly takes lots of care. Freezing and canning go with the work, of course.

"I like to sew," she said, "but I don't do much anymore." There are evidences throughout the house of her handiwork. For instance, a lovely crewel picture hangs in the "parlor." "It was just a kit," she explains. The hooked rug on a bedroom floor is "just a kit" also. And there are the projects which don't seem to get carried out, like all the wool she has collected to make a braided rug. "Maybe next winter," she says with a laugh.

She works several part days a week for Reist Seed Company, which was founded by her father-in-law, Alvin, in 1925. "I do the bookkeeping for the company. I work whenever I want to which is nice, as long as I get the taxes paid on time. I find it a challenge and I can see what happens in the business. In a family business I think it is important to know what's going on."

She discussed the Reist Seed Company, explaining that much of their work is on a contract basis with farmers who raise the seed grain. Now, she explained, all seed grains must meet state regulations and must be certified by the state before it can be sold. State inspectors visit the plant and also inspect fields which are on contract. Interestingly, she said, "We do a great volume of popcorn business." Although there are several local growers, most popcorn comes from the midwest.

Another part of the company is operating portable seed cleaners which can be used by local farmers in the summer. The company supplies the cleaners and the operators who visit the farms on request. "That is how our two oldest boys worked their way through college," Mrs. Reist said.

Mrs. Reist may consider herself an "ordinary" farm wife, but her abilities and community interests put her in the special category of those who make things happen, and create a better world for themselves and others.

A small sample of the prize-winning Pillsbury wallpaper which Mrs. Reist designed as a college student.

Know Where the Activities Will Be?

Read the Farm Women Calendar.

Society 30

Society of Farm Women 30 held the April meeting on Monday evening in the home of Mrs. Donald Good, New Holland. Pads were made for the American Cancer Society.

On Saturday, May 15, Society 12 will entertain

Society 30 at the Farm and Home Center for a luncheon at 12:30 p.m.

The next regular meeting will be held on Monday, May 17, at 7:30 p.m. in the home of Mrs. Cleo Hershey, R3, New Holland. A white elephant sale will be held. Each member should bring any item for sale. Members may also bring a friend.

Home on the Range

Thanks to all those readers who sent in recipes for Chow-Chow and Coconut Cake. With such an overwhelming response we are planning to print the recipes each week

until concluded. It is interesting to note all the different variations of Chow-Chow as it was served in the different areas of the state.

Have a favorite picnic recipe? We'd like to print a special picnic basket edition in May so please be sending us your favorite "take along" foods. Also, we will be accepting recipes for our annual Dairy Issue scheduled for June. These recipes must be received no later than May 31 so be sending in all those milk, cheese and dairy product favorites!

Have a nice week!

Zesty Pork Burgers

- 1 lb. ground pork
- 1/4 cup buttermilk
- 2 teaspoons sage (crushed)
- 3/4 cup shredded cheddar cheese
- 3/4 teaspoon salt
- 3/4 teaspoon pepper
- 1/2 teaspoon garlic powder
- 1/2 teaspoon oregano
- 1 tablespoon finely diced onion

Combine all ingredients, mix well. Shape into 4 patties. Place patties on grill over low glowing coals. Cook 10 minutes per side or until done.

Jon A. McClure
1974 Pa. Pork
Cookout King
All American Pork
Cookout Book

Old Fashioned Chow-Chow

- 2 cups lima beans
- 2 cups string beans
- 2 cups carrots
- 2 cups celery
- 2 cups green tomatoes
- 2 cups mangoes
- 1 cup onions (small)
- 1 cup cauliflower
- 1 cup pickles
- 2 1/2 cups sugar
- 1 1/2 heads cabbage

Juice:
2 teaspoons turmeric
1 teaspoon celery seed
1 teaspoon dry mustard
1 1/2 cup vinegar and water
Boil each article separate until soft and pour off the water. Put in a larger container to hold everything. Salt to taste and add new juice. Boil together for 8 minutes.

For a larger amount use a sauce pan for a cup.

Mrs. Vivian Engle
Elizabethtown, Pa.

Best Ever

Chocolate Cake

- 1 cup shortening

- 2 cups brown sugar
- 2 eggs
- 1 tablespoon vinegar
- 1 cup milk
- 2 1/2 cups flour
- 2 teaspoons soda
- 1/2 teaspoon salt
- 1/2 cup cocoa
- 1 teaspoon vanilla
- 1 cup hot water

Cream shortening and sugar and eggs one at a time beating well after each addition. Blend in cocoa. Add sifted dry ingredients alternately with the milk to which the vinegar has been added. Beat until smooth. Stir in vanilla and hot water. Pour into 8-inch greased large pans and bake at 350 degrees. 40 to 45 minutes.

Miss Rachel S. Kauffman
Christiana, Pa.

xxx

Rhubarb Custard

Line bottom of pie plate with dough. Put a good layer of raw diced rhubarb on the bottom and fill with custard mix. Put 1/4 cup granulated sugar and 1 tablespoon flour on rhubarb custard.

- 2 eggs well beaten
- 1/2 cup granulated sugar
- beaten in eggs
- pinch of salt

1 tablespoon flour add to eggs

1 teaspoon vanilla
1 1/4 cup milk heated add last
1 tablespoon butter melted, pour over top of custard and sprinkle with nutmeg.

Bake at 400 degrees for 15 minutes and at 350 degrees for 40 minutes.

Mary Stoltzfus
Gap, Pa.

xxx

Fresh Coconut Cake

- 3/4 cup shortening
- 1 1/2 cups sugar
- 4 eggs separated
- 2 1/4 cups all purpose flour
- 2 1/2 teaspoon baking powder
- 1/2 teaspoon salt
- 1/2 cup fresh grated coconut
- 1 cup coconut milk
- 1 teaspoon vanilla

Beat egg whites until stiff

Lancaster Farming, Saturday, April 24, 1976—45

& gradually add 1/2 cup of the sugar. Set aside. Mix together the flour, baking powder, salt, and set aside. Cream shortening and remaining 1 cup sugar together. Beat in egg yolks, one at a time. Add vanilla. Blend in flour mixture alternately with milk. Add coconut, fold in egg whites. Bake in 2 greased 8" or 9" cake pans until tested due. Bake at 350 degrees for 25 minutes.

1. To fix coconut pierce eyes with ice pick and set upside down over bowl. After draining, place coconut in 400 degree oven for 25 minutes. Tap sides of coconut and open. Pare off dark skin and grate. Excess coconut can be frozen.

2. If coconut doesn't have enough milk add dairy milk.

3. Can use 3/4 cup bread flour and 1 1/2 cups pastry flour.

Mrs. W. Hoag
Malvern, Pa.

xxx

Lettuce Dressing

- 1 cup confectioners sugar
- 1/2 tablespoon salt
- 1/2 tablespoon paprika
- 1 teaspoon onion

Ida's Notebook

Ida Risser

I find it difficult to appreciate the time and effort that others put into a project and only when I'm involved do I realize how time consuming an undertaking can be.

Sometimes the effort put into holiday celebrations makes me glad when they are behind me. Each Sunday I drive to our church in Lancaster 3 or 4 times in order for all of us to attend church and youth activities. This past Sunday there were 6 round-trips plus 3 nights of practice during the week for Junior Choir, Bell Choir and a Passion Play. Sometimes I sit in the car for hours waiting for one or the other of our children and try to catch up on reading the newspapers.

It is so easy to forget the work of those managing church suppers, planning musical programs or teaching Sunday School unless you are the one directly involved. Sure, someone must pack the clothes for relief but unless we give a day of our time, we don't appreciate the work behind shipping a certain number of pounds overseas.

My mother gave me a 24" long clipping from a 1869 newspaper which accuses a Mr. Ilyus of taking \$712 from the Pa. Treasurer's office without rendering any service as a "paster and folder." Nowadays, someone could accept ten times that much before he'd be implicated in a crime.

Actually, I found the other side of the newspaper much more interesting. A reporter from the Philadelphia "Ledger" visited Lancaster and wrote a sketch on it. He described how the Conestoga was navigable for the 19 miles to the Susquehanna by means of dams and locks. He spoke of the imposing courthouse built in 1852 at a cost of \$166,000 including the furniture. Also described is the Fulton Hall, the county prison with its tower, 110 feet high, which is the "first object to strike the eye of the traveller as he approaches

Lancaster," and also a House of Employment and Support for the Poor which was established in 1798.

It is also stated that the cotton mills employed more people than any other business. A mill owned by F. Shroder & Co. made 300,000 yds. of muslin each month. The women weavers were paid \$3 to \$7 per week.

Berks Co.

Society 1

The April meeting of Berks Co. Society 1 was held at the home of Gail Sittler with twenty-one members attending.

Before the business meeting the Rev. Omar Kurtz gave a talk on the Oley area Medical Center, stressing the need of financial support from all members and organizations of the community and surrounding area. Also for the program Mrs. Elaine Vardigan, showed the process used in Pysanke, which is the decoration of Easter eggs.

The candy committee reported a total of 1013 pounds of Easter eggs made and sold.

The President held a short Memorial Service for Sarah Marsteller, who passed away since the last meeting. Donations were made to the following: Oley Valley Medical Center - \$300.00 in subventions. Hamburg State School toward their Wheel-A-Thon. Sarah Marsteller Memorial Fund of St. Paul's Lutheran Church.

Members were reminded of the following dates: Our bus trip to Longwood Gardens on April 27. Remember to vote in the primary on April 27. A Night of Entertainment by Group 8 on May 7. The Spring Rally at York on May 12.

Due to the Spring Rally being held on their meeting day they will hold their next meeting on May 5, at the home of Else Badrow.

PFA ladies meet in Montgomery Co.

A program on one family's experiences in adopting Assain orphans was featured during the recent Ladies Day Out of the Montgomery County Farmers' Association (MCFA).

Guest speaker at the program, which was held at Mooreheads in Trappe, was Mrs. Alvin Detweiler of Boyertown.

Mrs. Detweiler spoke on her family's experiences in adopting the orphans, and also presented a slide program showing Korean orphanages.

Musical entertainment for the day was provided by "The Kitchen Gals," of East Greenville, a kitchen band which presented songs both in English and Pennsylvania Dutch.

A plant demonstration was also presented to the ladies by a representative from the Russel Boyer Jr. Greenhouses in Pennsburg.

All of the plants brought to the luncheon were available for purchase, and tips for the care of each plant was presented.

Also speaking at the event were Debbie McDonnell, the Montgomery County Dairy Princess; Melba King, the regional representative to the state women's committee, and Jim Shoemaker, a Farm Family insurance agent.

Pat Schultz, president of the women's committee of MCFA presided at the meeting.

Numerous door prizes were awarded to the 75 women attending the

program from Montgomery, Bucks, Berks, and Chester counties.

The prizes were donated by various merchants and farm-related businesses.

The regional Ladies Day Out for the women of Pennsylvania Farmers' Association (PFA) Region I will be held on July 14 in Allentown.

York Co.

Society 6

Society of Farm Women 6, Manchester, York Co., held its regular monthly meeting recently at the home of Mrs. Harold Gross. The president, Mrs. Glen Hoover presided. Devotions were led by the hostess who read part of the Easter story followed by the Lord's prayer and pledge to the Flag.

Roll call was answered by telling something remembered from childhood Easters. There were 14 members, two guests and five children present. The guests were Mrs. Chester Gross and Mrs. David Muzzy.

Eleven members plan to attend the annual Spring Rally of the Pa. Soc. of Farm POLITICAL ADVERTISEMENT

W. Craig Boyd, Treasurer

Women to be held May 12, 11:00 a.m. at the Sheraton Inn, Gettysburg.

Group 6 will be entertained by group 16, Dover, at Salem Union Church Gove, June 30 at 6:30 p.m. This is a change from the previously announced date of June 23.

Mrs. Fadely informed the group that Mrs. Freda Griffith is a patient in the York Hospital Intensive Care Unit. A get-well card

was signed by those present and sent to her.

Group 6 will entertain Group 18, Glen Rock, June 9, 6:30 p.m. Persons appointed to arrange the affair are Mrs. Fadely, Mrs. Marian Hewitt, Mrs. Bruce Taylor and Mrs. Raymond Wilt.

A reading was given by Mrs. Fadely entitled "I'm proud to be an American."

Next meeting will be held at the home of Mrs. Hoover May 17, 1:30 p.m.

4-H meets

The Broken Bit 4-H Horse and Pony Club held its monthly meeting recently at the Farm and Home Center. Brian Immel, vice-president, conducted the business meeting.

Members were reminded that the Club's horse show

will be held at the Friendly Horseman's Club in Denver on May 23.

The club is planning a trail ride for later in the summer at the Valley Lee Stables.

Society 8

Farm Women's Society 8 met at the home of Mrs. Eloise Rentzell, Bainbridge Rt 1 on April 17th. Twenty-one members and two visitors attended. Mrs. Anna Risser had devotional time and read scripture relating to Easter. The main feature of the afternoon was an interesting slide presentation by Kathryn Erb and Arline Witman. These pictures were taken as they enjoyed a previous trip to Alaska, sponsored by the Farm

Women. Numerous artifacts were shown which they brought with them. The Ways and Means Committee announced that this Society is planning to have a food booth at the farm sale of Elizabeth Guthridge, Marietta Rt 1, on May 3. Donation will be made to Deborah Heistand who plans to help with an airstrip project in Brazil. There is some space on the bus going to the Spring Rally at Gettysburg on May 12th. There are no more luncheon tickets available. The St. Joseph's Hospital

Mobile Unit is the County Project. Refreshments were served by hostesses Eloise Rentzell, Hettie Ginder, Vera Frey, Anna Risser and Ada Kraybill. The next meeting will be held on May 15th at 2 p.m. in the Lutheran Church, Maytown. Barbara Walsh will demonstrate Rock Painting as the special feature. She is a resident of Berks County.

Society 3

Society of Farm Women 3 met Saturday, April 17, at the home of Mrs. Walter Shaub, Reamstown. The business session was conducted by the President, Mrs. John Edwards. A contribution of \$20 was given to the I.F.Y.E. to help sponsor an exchange student during 1976 and \$25 was contributed to the Lancaster County Council of Churches for the Shared Holiday Program.

Reports were given by Mrs. Gilbert Paul and Mrs. Paul Hess on the recent trip to New York City. Mrs. Ivan Eberly reported on Sewing Day at the Ephrata Community Hospital. Mrs. Walter Shaub and Mrs. Robert Gregory reported on Heart Screening Day conducted recently by the American Heart Association.

There was an exchange of potted plants & annuals among the members.

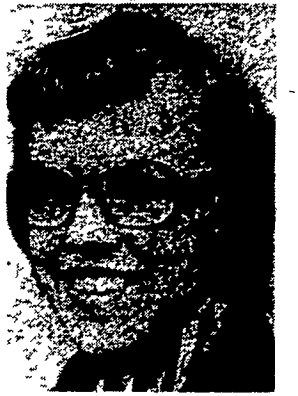

Miss Fay Stoner, the I.F.Y.E. student to Germany during 1975, showed slides and told of her life among the German families during her six month visit.

The next meeting will be at Salem Lutheran Church, Ephrata, Saturday, May 18. Members of Society No. 21 will be guests. There will be a hospitality hour from 12-12:30 followed by luncheon.

Ladies Have You Heard?

Lancaster Home Economist

Labeling On An Old Product: Cream

There's a new term that's appearing on cream carton labels. It's ultra-pasteurized. It replaces relatively recent labeling such as, "sterilized," or "UHT."

Ultra-pasteurized cream is raw cream which has been heated to 275 degrees F. to 300 degrees F. for a very short time, about two to four seconds. It is then aseptically packaged to give it a refrigerator shelf life of from 60 to 90 days.

The ultra-pasteurized first appeared on whipping cream, but is being extended also to other types of cream such as the 18 percent variety. It's possible that half and half may also be ultra-pasteurized.

Whipping cream is a special product with somewhat limited use. Consumers have not always been able to find it when they wanted it. Stores have not always been able to sell it while fresh and sweet. The ultra-pasteurization should solve problems for both retailer and consumer.

Another bonus for ultra-pasteurized whipping cream is that, in addition to increasing its refrigerator shelf life, it may be frozen. That was not possible with regular whipping cream since flecks of protein formed during freezing. Homemakers had to whip the whole carton and could freeze leftovers in the form of dabs or dollops.

POLITICAL ADVERTISEMENT

Whipping ultra-pasteurized (whipping) cream requires a well chilled bowl and beaters for quick results. If she's in a hurry, a homemaker can always chill bowl and beaters in her freezer for about 30 minutes. Cream, naturally, will be well chilled if it's kept refrigerated, as required. Once the carton is opened, its keeping quality is the same as any cream or milk.

Ironing Safety Tips

More than 6,000 people were injured last year in ironing accidents. Small children are especially vulnerable because they trip over or pull cords, causing hot irons to fall on them.

You can avoid accidents with irons by following these safety guidelines:

- Choose an iron with a wide resting base so it can't tip easily.

- Always unplug the iron and place it out of children's reach even if you leave for just a few minutes.

- Use a sturdy ironing board, placing the board as close as possible to a wall and the outlet in which the iron is plugged.

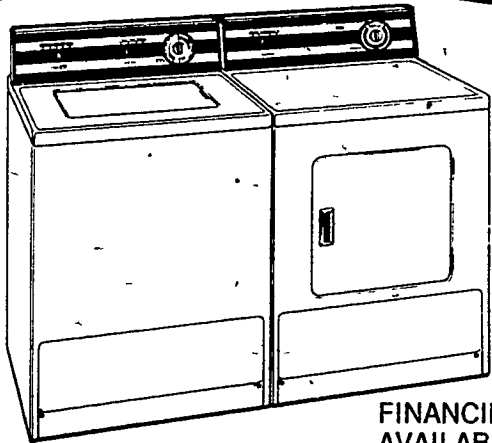

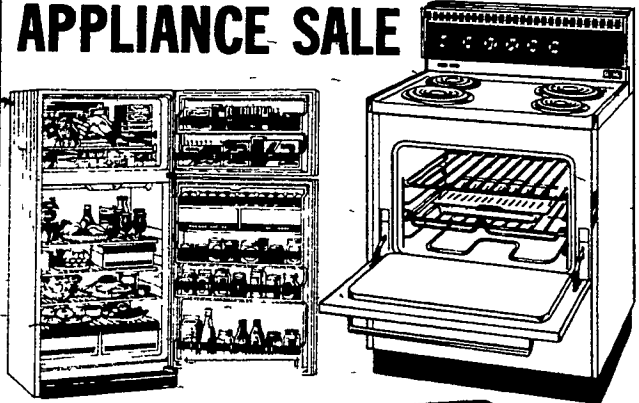

- Unplug a steam iron when you fill it. If water spills on live electrical components, it could cause a shock.

- Have a leaking iron repaired. The water could cause scalding or a fatal electrical shock.

- Coil the cord when you've finished ironing. Then place the iron high up to cool, far out of children's reach.

Open fires banned at state parks

HARRISBURG — Department of Environmental Resources Secretary Maurice K. Goddard announced this week that open fires on all State Forests and State Park lands are banned until further notice.

Secretary Goddard's decision is the outcome of a serious fire situation which has been building up throughout the Commonwealth. Already this year there have been approximately 700 fires involving about 4,000 acres, compared to about 325 fires which burned over nearly 800

acres during the same period of time in 1975.

The present day problem is caused by a combination of little or no precipitation and low humidity throughout the State with only one exception, the northwest corner of the Commonwealth.

Dr. Goddard concluded by noting that the Department wishes all trout fishermen a lot luck on the opening day of the trout season but reminded them to be extremely careful especially when discarding matches, cigarettes, cigars and pipe ashes.

Area farmers investigating the hopper-bottom, concrete high moisture corn silos in Iowa last week

were, left to right: Andy Stoltzfus, Ralph and Gerald Myer, Eli Zesit, and Chuck Aungst.

Iowa farms visited

You think of Iowa with flat farm land growing tall corn. Well, the corn actually does get tall, but for farmers from this area who visited the popular farm state this week, as guests of Weaver Star Silo, Inc., you couldn't tell how tall the corn gets, because the Iowa farmers are just at the beginning of their corn planting season. Not much different than the local planting schedule. And in Adair County, 60 miles southwest of Des Moines, the country is rolling, almost hilly at places with farms laid out in square mile (640 acres) sections. Hay and beans are also grown to feed the beef cow and calf herds, steers, swine farrowing and fattening operations.

The visiting farmers wanted especially to see the new hopper bottom concrete silos in operation in Iowa. These concrete silos used for high (25-28 percent) moisture shelled corn have a funnel-shaped bottom built into the ground and a simple auger used to bring the shelled corn up out of the cone bottom to a wagon or conveyor. All of the silos also had a side-unloading sealed outlet which the Iowa users were using quite successfully. The side unloading pipe with a sealed cap

to control the intake of oxygen was really a gravity flow opening placed at bucket or wagon level for emptying the silo without use of a mechanical unloader.

Elvan Tannett, of Fontanelle, farms 300 acres of corn, 100 acres of beans, fattens 12,000 head of hogs and has 100 Angus cows with calves. His hopper bottom concrete silo held 17,000 bushels of corn and he farmed an Iowa section of 640 acres. His farm records showed that he was producing 252 pounds of pork per 100 pounds of feed. He had weaned 9.8 pigs per litter in 1975, quite a bit above the Iowa state average. Tannett's pig grower ration included 600 pounds of oats, 100 pounds of medicator-250, 900 pounds of grower concentrate of 35 percent protein and 2,600 pounds of high moisture corn, out of the concrete hopper bottom silo. The total of 4,200 pounds allowed for an extra 200 pounds of high moisture corn to relate the ration to dry shelled corn.

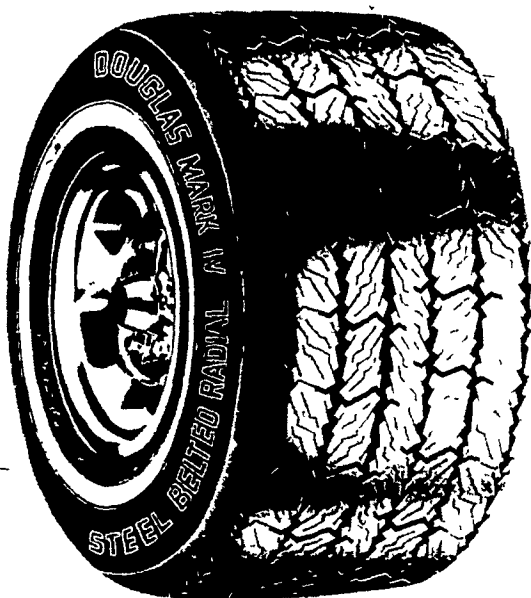

Dave and Lee Nichols at Bridgewater, have some very definite ideas on how their 1800 acre commercial beef cattle farm should be managed. "Use everything you know," Dave said, "do the things that are right economically, even though it isn't popular at the time."

What's New...

Dimension 2000, a phenolic-epoxy that dries to an extreme hardness, is being made available in this area by the May Post Office Dry Good Store.

The new product will resist oil or gasoline, acids, skuffing and detergent scrubbing. Upon application, the coating will flow on smoothly without showing brush marks and will not give off a paint-like odor after the three or four hours it takes to dry without tack. This product is permanent and it makes an excellent waterproofing for basement walls or any concrete foundation.

The possibilities for use in industry or around the home are practically limitless.

Dimension 2000 can be used to coat and protect silos, water towers, or bulk storage tanks, or even maintain heavy machinery

or equipment on the farm or in a factory.

Manufactured by Interstate Chemical & Coatings Co., Inc. of New York, Dimension 2000 comes in three finishes. The Everseal Flear finish can be used as a waterproofing coating that may be applied either by brush, roller or spraygun.

The 200 Series Phenolic-Epoxy coating comes in white, black, charcoal grey, aqua, colonial blue, tile red, buttercup yellow, and tropical green. It covers 400 to 700 square feet per gallon depending on the color, texture and porosity of the surface.

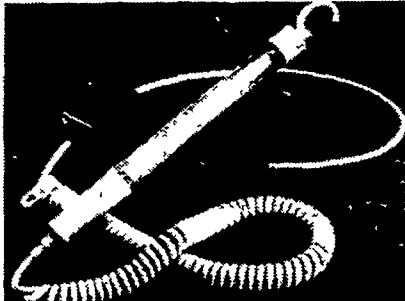

The third finish, the Duraglo Clear, puts a isocyanate plastic finish on anything and will not be harmed by detergents, ink, most acids, and grease. It too spreads between 400 and 700 square feet per gallon and is waterproof.

Portable Fluorescent Work Lights

There are many areas in the typical plant where illumination requirements are variable. Installing permanent fixtures to meet maximum lighting requirements is both expensive and wasteful of precious energy resources. Potter Portable Fluorescent Work Lights provide the ideal solution to the need for flexibly located extra lights - they provide a wide glare free, shadowless area light; they don't waste energy by producing heat, thus remaining comfortably cool to handle and work around and providing maximum light for your energy dollar; they offer long bulb life and low maintenance requirements; and most importantly, they are designed to provide the ultimate in safe operation. Conventional incandescent lamps produce considerably less light per watt or power consumed, throw off great amounts of heat, and require replacement. Furthermore, the open metal grid used to shield incandescent work lights can allow hot glass shards to pelt workers in the event of accidental bulb breakage.

POLITICAL ADVERTISEMENT

Potter Portable Fluorescent Work Lights are offered in five models which fit a variety of requirements and incorporate 3 wire power cords with 3 prong grounded plugs for full OSHA compliance. Lights are powered by standard 110 volt, 60 cycle current; all models are tested and approved by Factory Mutual Laboratories and meet OSHA standards. Replacement tubes and starters are standard hardware store items, and replacement can be easily accomplished in minutes without the use of tools - and without affecting the watertight seal.

More complete information on this product may be obtained from Potter Industries, 421 Dover Drive, Des Plaines, Illinois 60018.

New Logo Adopted by Pfizer Genetics

A new company logo has been selected as the symbol of Pfizer Genetics, Inc., headquartered at Olivia, Minnesota. Implementation of the new design on all of the literature, stationery, packaging and advertising of Pfizer Genetics is now in progress.

The new logo is representative of the many changes which have taken place in the company in recent months. It particularly represents the fact that the company has grown beyond what was once the Trojan Seed Company.

Explains Rod Hanchett, communications director for Pfizer Genetics, "Nothing could be more symbolic of genetics than the stylized male and female scientific symbols which are a part of the logo. The crossing of selected genes is the scientific basis of hybrid corn and of all work in hybridization for that matter."

Pfizer Genetics now markets four major seed lines. These are Trojan

brand hybrid corn, and Trojan brand sorghums including grain sorghum, forage sorghum and sorghum - sudangrass hybrids.

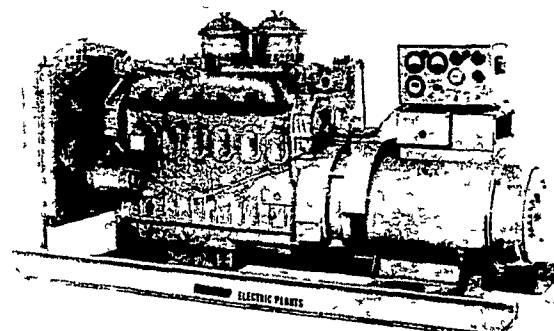

Superstition has it that if there is a ring around the moon, expect bad weather.

4-H holds meeting

The Central Dairy 4-H Club met on April 12 at the 4-H Center, near Bair. The 4-H pledge was led by Kevin Laughman. Reports given were: dairy display for June by Tommy Welsh, Lancaster County Farm Tour by Carl Anderson, Dairy Fun Day by Cindy Rutter, and dairy judging by Timy Rutter.

Demonstrations were

given by Tim Eisenhart on "Ways to Identify Animals," and Timy Rutter on "How to Clean a Calf's Ears."

Mr. David Norman, Ass't. County Agent, gave a slide presentation on how to select a calf. The next meeting will be held on May 10 at the 4-H Center.

Consultant, National Dairy Council

THE MR. FIT PROJECT

In six more years, after a ten-year research effort, we may get some answers to how some heart disease might be prevented, or slowed. That, at least, is the hope of the National Heart and Lung Institute (NHLI). The Institute is betting millions on it.

IN A RECENT announcement, NHLI said "Enrollment of volunteers has been completed for a major clinical trial to evaluate what effect lowering blood cholesterol, reducing elevated blood pressure, and curbing cigarette smoking have in prevention of first heart attacks and in reducing death rates from coronary heart disease (CHD) and other cardiovascular disorders."

Called the Multiple Risk Factor Intervention Trial (MR FIT), the study involves 20 medical centers and more than 12,500 volunteers. The study's clinical phase will run six years. Estimated cost about \$72 million.

ABOUT 366,000 men were screened to find the 12,500 who will participate in the study. These are men, aged 35-57, without clinical evidence of coronary heart disease, but who are believed to be at higher-than-average risk of developing it because of various combinations of elevated blood cholesterol, high blood pressure, or cigarette smoking.

"In addition," said NHLI, "all were free of other medical conditions that would exclude them from the study, and all were willing to commit themselves to a six-year prevention program."

Well, we've talked about this before and while it will be good to know the results of this study, in six years or more, it still will not answer the question of whether changing how we eat can prevent heart disease.

WE WILL know that these men did or did not improve their health by curbing three risk factors, but the results will not tell whether changes in their diet helped. The results will not delineate each of the factors separately. We really won't know if the same results could have been attained without quitting smoking, or without changing the diet.

It is certainly important to find out if we can reduce heart disease by any means. But the great controversy over diet and heart disease is not going to be settled by this multi-million dollar research. And that is too bad because many of us feel the kind of diet changes recommended (without proof) by cholesterol-lowering enthusiasts may very well be harmful, nutritionally, to many of the people they hope to help.

York Co. youth attends 4-H conference

Jeffrey Roth, Spring Grove R1, is one of five outstanding Pennsylvania 4-H members selected to take part in the National 4-H Conference in Washington, D.C., April 24-29.

The conference, with headquarters at the National 4-H Center, is designed to explore ways to improve 4-H work and to interpret the youth program to legislators and other public officials through personal contact.

Jeffrey was named to attend the event on the basis of his 4-H records and participation in county and state activities.

Major thrusts of this conference will be based on the Bicentennial theme, "4-H '76 — Spirit of Tomorrow." The delegates will have an opportunity to concentrate their participation on 4-H program history, heritage, and plans for Century III; future directions of 4-H and our nation's heritage; and horizons for the future including emphasis on international programs.

Several hundred 4-H members from all states, Puerto Rico, and the District of Columbia will take part in the activities.

The son of Mr. and Mrs. Maurice Roth, Jeffrey has been a 4-H member for eight years.

A member of the Thomasville 4-H Community Club, and York County 4-H Beef and Horticulture Clubs, he served as president, vice president, news reporter, and game leader. He also assisted with club activities and events as a teen leader the past four years.

Jeffrey participated in the Regional 4-H Teen Leaders Retreat, Regional 4-H Demonstration Day, Pennsylvania 4-H Leadership Congress, State 4-H Achievement Days, Citizenship Short Course, and National Junior Horticultural Association annual meeting.

He was a State 4-H Award winner in citizenship and was named York County's Outstanding 4-H Boy in 1973.

The other 4-H members attending the national conference are Patricia Reinhart, of Gettysburg R6; Wayne Bender of Sonestown; Wendy Graves, of Bloomsburg R4; and Terry Coon, of Clinton R1.

1977 wheat allotment set

WASHINGTON - Crop wheat allotment of 62.2 million acres was proclaimed recently by Secretary of Agriculture Earl L. Butz. The allotment for the 1976 crop was 61.6 million acres.

The national allotment does not represent a limit on the amount of wheat that may be planted. Rather, it is used solely as a basis for making payments to wheat growers should the market price for wheat fall below the established target price or if growers qualify for disaster payments. Under these two programs, growers are eligible for payments only on allotted acres.

The 1977 allotted acres will be apportioned among states, counties and individual producers generally

on the basis of the apportionment for the 1976 crop year.

The national allotment represents the number of harvested acres of wheat, based on the estimated national average yield, needed to produce the quantity of wheat (minus imports) that will be utilized domestically and exported during the 1977-78 marketing year.

The 1977 national allotment is computed on the basis of an estimated national yield of 32.0 bushels per acre and estimated total utilization (less imports) for the 1977-78 marketing year of 1,990 million bushels. Domestic use is projected at 766 million bushels, exports at 1,225 million bushels and imports at 1 million bushels.

SRC-101

SRC-101
a slow release, chemical and fertilizer delivery system

SERVES AS A BINDER AND PRESERVATIVE TO CONTROL THE RELEASE OF CHEMICALS OVER A LONGER PERIOD OF TIME

BETTER RESULTS WITH SRC-101

CUT COSTLY CHEMICAL LOSSES, INCREASE PERFORMANCE, GET ADDED PROTECTION AND INCREASE PROFITS

SRC-101 helps cut costly chemical and fertilizer waste in seven proven effective ways:

- 1 SRC-101 can reduce drift by encapsulating your chemicals and fertilizers thus reducing evaporation and volatilization. SRC-101 helps give greater thermal stability to your chemicals
- 2 SRC-101 protects many herbicides from ultraviolet damage
- 3 SRC 101 helps to protect your chemicals throughout extended periods of drought so they are still effective when new weeds start to germinate.
- 4 SRC-101 helps to prevent your chemicals and fertilizers from leaching down or washing off during periods of heavy rainfall
- 5 SRC 101 provides added protection against chemical failure caused by poorly timed application
- 6 SRC-101 slowly releases your chemicals, helps to prevent costly stem burn and increases the chemical concentration in the root zone
- 7 SRC-101 is easy to use and non toxic. By reducing the chemical parts per million released at any one time SRC 101 assures greater peace of mind, and guards against harmful stunting and carry over

SUGGESTIONS FOR USE — LIQUID FERTILIZERS (Including liquid Nitrogen)
1 quart of SRC 101 to every ton of liquid fertilizer solution.
CAN ALSO BE USED WITH HERBICIDES AND INSECTICIDES

LIFE on the farm

© Dieter Krieg 1976

By DIETER KRIEG

The sweat running down my arms, face, and bare back was nearly sizzling from the heat. My face felt hot enough to transmit a burning sensation. There was no time for even a moment's rest and I continued my lone battle while facing certain defeat.

But there was no time to even think of giving up. The consequences of losing were frightening and so the hectic and frustrating struggle continued. My arms were weakening, my legs seemed to turn into rubber, and my lungs just couldn't seem to supply me with enough air.

Psychological and physical defeat were striding forward.

Only the fear of a real catastrophe kept me going.

I continued to rake, stomp, and scratch until I was thoroughly exhausted. Then there was just one thing left to do - run home to get help.

I stumbled through the back door of the house, grabbed the phone and called for help. On the way back out, as I raced to the barn to get the hired man and some tools, the whine of the fire siren pierced the air.

Still exhausted, but also feeling relieved now that help was on the way, I hurried back to the northwestern edge of the farm. Gray smoke was rolling skyward through

the trees. Orange flames stretched in a long line along the side of the hill for several hundred yards.

The brush fire had been started earlier that afternoon to destroy some weeds and growths on an adjacent field. It jumped into the woods in two different places, which made battling the blaze impossible for one man.

The volunteer firemen from the

Airville Fire Company had the fire under control in no time at all. And, fortunately, no harm resulted. In fact, one man commented the fire might actually have been beneficial since it cleared some of the debris in the woods.

All was well, I thought, -as the evening milking began. But I was in for a surprise before the day was over.

silagain[®]

the ensilator

Give your silage a treat instead of a treatment

The odds are that you don't treat silage with an additive. And, if in the past you've used additives, the results were probably not what you expected.

With the ever-increasing value of silage, it's time you either consider or reconsider and look into the benefits and economies of silaGain.

silaGain is the probiotic silage product. It's a combination of selected strains of microorganisms that produce lactic, acetic, and propionic acids to initiate and enhance natural silage fermentation.

The Probiotic Concept and its application to animal agriculture is new. silaGain and the process of inoculating viable (live) microorganisms to accelerate the ensiling process is innovative.

But, we're not encouraging you to try silaGain because it's new and innovative. Try silaGain because it works. It makes you money through improved silage quality, less waste and runoff, more conserved energy, better digestibility and palatability.

Community leaders honored by Grassland FFA's

By MELISSA PIPER
BLUE BALL - Grassland Environmental FFA's honored several members of the community during their second annual banquet held here recently.

Receiving certificates of appreciation for their contributions to the club were

Ken Borden, school custodian; Miles Fry, Fry's Nursery; Henry Hackman, Soil and Water Conservation District; Gary Mayk, Lancaster Newspapers; Stan Paula Kovich, Fish Commission; Bill Trupe, school business manager; Harold Weaver, Sportsman

Federation; Denise Collins guidance department and Melissa Piper Bowman, Lancaster Farming.

Honorary Chapter Degrees were also presented to Dean Miller, principle of Garden Spot High School; Mr. and Mrs. Charles Martin, FFA parents; Earl Pickel, chairman, English Dept.; and Mrs. Walt Wunderly, principal, Blue Ball Elementary School.

The grassland Environmental FFA is unique to the area and is one of the

few such organizations in the United States. During the past year, students have worked on building numerous wildlife protection areas along with planting seedlings in the community and doing stream surveys.

The members spent much of their time in working with the Welsh Mountain Clinic for which they won recognition in the "Building Our American Community" program.

The environmental aspects of the club has

drawn many members from the urban areas of eastern Lancaster County and with the increased manpower, the club has been able to tackle numerous projects both on an individual level and cooperative effort. Phillip Oglie and Cheryl Rousseau are the advisors of the club.

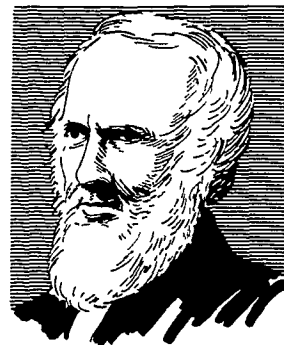

Sure there are a lot of good reasons to drive 55, but there's one thing to remember:

It's not just a good idea. It's the law.

'Wheatland' is popular tourist attraction

By MELISSA PIPER
LANCASTER - One of the most beautiful 19th century mansions was built midst acres of productive Lancaster county farm acres and later named "Wheatland", President James Buchanan's home still stands prominent as a historical landmark.

Located on Marietta Ave., a few miles outside of the city, Wheatland draws many tourists each year. Streams of people glide through the spacious mansion admiring

the 19th century decor along with the authentic period furniture and the personal possessions of Buchanan and his niece, Harriet Lane.

Buchanan bought Wheatland in 1848 for a little over \$6500. The homestead was so named for it overlooked expanses of waving yellow wheat and grain fields. At the time of the purchase, Buchanan was the Secretary of State for President Polk and it was on the wide verandas and shaded porches that many a

statesman came to be entertained by Buchanan and his niece.

As the only bachelor president, Buchanan had his niece host guests both at Wheatland and later at the White House when he became president in 1857.

After four years in the White House and the only president to represent the Commonwealth of Pennsylvania, Buchanan returned to his Lancaster County home where he died in 1868.

The house was kept in the family until the early 1920's when Harriet Lane died. It was purchased by a Lancaster County citizen and later bought by the Junior League of the City to preserve as a landmark and historical site.

Although standing for over 100 years and having modern roads built where the wheat fields used to sway, Wheatland has retained much of its natural beauty. A spacious front lawn dotted with shade trees afforded visitors a relaxing escape from summer heat as it still does today.

Inside, visitors can see rooms on both floors, filled with the Buchanan antiques, silver and china. In the main hall, a Shreiner grandfather clock still hums quietly while the chandelier tinkles in the breeze.

The formal dining room is set as if guests were expected at any moment and features the flatware, china and crystal of Buchanan's household.

A Chickering piano, a present from Buchanan to Harriet Lane, graces the living room along with a carved desk, conversation couches and etchings of England's royal family.

The bedrooms are furnished with period antiques and contain many of the personal items belonging to the former president and his niece. A worn prayer bench, traveling bag and handmade coverlet which appear in

[Continued on Page 55]

A bust of Buchanan stands in the main hallway on the second floor. The cast is from the shrine which is located in Washington D. C.

Dressed in period gowns, hostesses give guided tours of Wheatland daily. Pictured from left are: Mrs. Lawrence

Stengel, Mrs. Sally Luckey and Clair Parker, curator of Wheatland.

Multiflora rose banned

HARRISBURG - The Pennsylvania Department of Agriculture has announced that West Virginia declared multiflora rose to be a noxious weed, thereby making any shipment of that plant to West Virginia illegal.

Henry Nixon, director of the Pennsylvania Department of Agriculture, urged the commonwealth's nurserymen to be aware of the West Virginia Plant Pest Act and the ban on multiflora rose.

Effective immediately, Nixon said, "the shipping of multiflora rose plants into West Virginia will constitute

a violation of that state's plant pest act. Such shipments may be seized, destroyed, or returned to the point of origin at the owner's expense."

The multiflora rose was originally used as a ground cover for erosion control. However, the prolific growth of the plant has gotten so completely out of hand that good pasture land has been overrun.

The use of weed control chemicals has been considered too dangerous because of possible milk contamination in grazing cows. There is no effective control to date, except

physically cutting down the plants.

Nixon said the plant has not been declared a noxious weed in Pennsylvania. The department has been working with the Agricultural Stabilization and Conservation Service (ASCS) in selecting a weed killer that could be registered for use in Pennsylvania. When selected, ASCS will train farmers for use of the pesticide.

The West Virginia act does not forbid shipments of garden roses that have been grafted or budded onto multiflora rose root stock.

Copies of the West Virginia Plant Pest Act may be obtained by writing to the West Virginia Department of Agriculture, Plant Pest Control Division, Charleston, West Virginia 25305.

A Chickering piano given to Harriet Lane by Buchanan still graces the living room of Wheatland.

'Wheatland' is popular

[Continued from Page 54]

Miss Lane's room were the young lady's personal effects.

In Buchanan's room his favorite dressing gown, still lies across an arm chair with several of his belongings positioned in the adjoining dressing room.

Buchanan was thought to have introduced the first authentic bathtub into the

area and his bathroom still occupies a space near his bedroom.

The warming kitchen complete with a bake oven and cupboards is located in a corner of the first floor. Numerous cooking utensils of the period are exhibited there for visitors to view.

Guided tours of Wheatland are given daily from April to November from 10:00 a.m. to 4:30 p.m. Well informed

guides in period costumes offer the history and personal views of the home which belonged to the Lancaster County lawyer and 15th president of the United States.

Poultry production increases

HARRISBURG - Poultry production in Pennsylvania continued to increase during the week ending April 10. Placements of broiler chicks were 1,547,000 according to the Pennsylvania Crop Reporting Service.

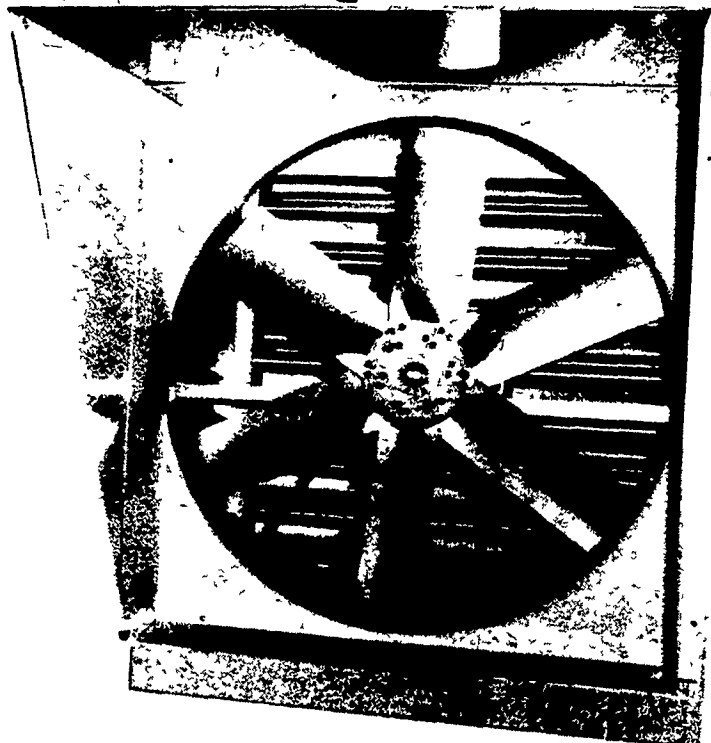

Placements were 31 percent above the corresponding week a year ago, and three percent above the previous week.

Average placements during the past ten weeks were 14 percent over a year earlier.

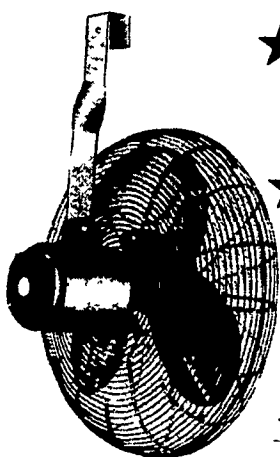

In the 21 key poultry producing states, placements were 67,970,000. This is 13 percent above the same week in 1975 and one percent above the previous week.

Average placements during the past ten weeks were ten percent above a year ago.

Stream clean-up planned

Cooperative planning will be the emphasis of the Storm Elose stream restoration to be done this summer by the U.S. Soil Conservation Service. Employees of the Pennsylvania Fish Commission, Department of Environmental Resources and the Soil Conservation Service were told that they will be working together on site and jointly preparing plans for stream restoration work. These instructions were given to over 100 employees of the three agencies at a meeting in Lewisburg. According to Benny

Martin, state conservationist, Soil Conservation Service, the joint effort is to assure the protection of the fish habitat and the stream environment.

Engineers, agronomists, biologists and contract specialist explained that restoration work will be limited to damage from Storm Elose. A team planning approach will be used to plan the work. Each team will consist of a representative of the Pennsylvania Fish Commission, Department of Environmental Resources and

the Soil Conservation Service.

Work will be limited to debris removal and stabilizing eroding banks using structural and/or vegetative materials. Structural measures include riprap, cribbing and deflectors. Vegetative means include grass seedings and shrub plantings.

Stream restoration work will be carried out in 22 counties in central and northeastern Pennsylvania, reported Martin.

THE GOOD WORD from the Bible

Who has measured the waters in the hollow of his hand and marked off the heavens with a span, enclosed the dust of the earth in a measure and weighed the mountains in scales and hills in a balance?

Isaiah 40: 12

Society 1

The monthly meeting of the Dauphin County Society of Farm Women, Group 1, was held on Tuesday, April 13 at 7:30 p.m. at the home of Jean Janssen. The co-hostesses for the evening were Ruth Oberholtzer and Bertha Kennedy. Bertha Kennedy was also in charge of devotions.

The roll call was taken with 21 members answering and there was also one guest present.

Final plans were made for the next meeting when Group 1 will entertain Group 11 from Millersburg. More plans were made for the stand the Group will be having at Hoffer Park on June 11, 1976. The Group will be selling homemade cherry, apple, and shoo-fly pies, and coffee. Tickets were distributed to the nine members of the Group who will be attending the Spring Rally in Gettysburg, Pa. on May 12, 1976.

The theme for the evening was a Birthday Party. This was done to celebrate each member's birthday. Each member was honored with a handmade flower, which were made by Bertha Kennedy, and a gift from her

Pollyanna. Games were played and prizes were awarded to the winners.

The next meeting of the Dauphin County Society of Farm Women Group 1, will be held on May 11, 1976 at 6:45 p.m. at the Conewago School where the Group will entertain Group 11 from Millersburg, Pa.

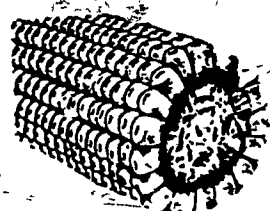

Never with my consent shall an officer of the people, compensated for his services out of their pockets, become the pliant instrument of the Executive will.

William Henry Harrison

Area swine breeders exhibit animals at Nat'l barrow show

Exhibitors from 36 states and Canada submitted entries in the Production Tested Barrow Contest of the National Barrow Show. The Production Tested Barrow Contest is the only individual

barrow class at the "World Series of Swine Shows" which will be held this year on September 13-14-15 at the Mower County Fairgrounds in Austin, Minn. Entries in the Contest

totaled 1,251, an increase of 47 over last year.

Entries by breed are as follows: Corssbred, 128; Berkshire, 79; Chester White, 128; Duroc, 283; Hampshire, 233; Landrace,

43; Poland China, 75; Spotted, 125, and Yorkshire, 157.

Dutch Valley Farm, Manxium, Pa.; W. F. Ruoss, Ephrata, Pa.; Doug Hancock, Hershey, Pa.; and

James T. Parlett, RD2 Airville, Pa. are included in the list of exhibitors who entered hogs in the 1976 Production Tested Barrow Contest. Their barrows will be consigned to the St. Ansgar (Iowa) Test Station on Friday and Saturday, May 7-8.

Barrows which complete the test and which qualify for the live show at the National Barrow Show will be divided into classes within their breed. Following the live show, the barrows will be slaughtered and appraised in a production-related Carcass Contest.

We write over 20,000 loans a year. Each one different. Just like you.

Car loan, house loan, travel loan. Every bank in the world has a loan for one thing or the other.

At Commonwealth we have just one.

We call it our Ideal loan. Or our You-Name-It Loan.

Want a den with pool table? We'll give you a den-with-pool-table loan.

A hay baling machine? A vacation house? A new house? You name it.

All of our loans are different. Some are short-term. Others have financing spread out over a

few years. Some come with free money-saving advice.

But they're all made up according to your needs. Not your neighbor's.

So, chances are, your loan will be unique.

Just like you.

We were happy to help with an Ideal loan.

Give your crops a head start in the yield race.

Applying some fertilizer near the seed at planting is a most efficient fertilizer practice. It insures a ready supply of plant food, on hand from the day the seed germinates.

Then at the critical "weaning" period, when the seedlings need more nutrients than the seed can provide—it will be there to give them the kind of head start that produces optimum yields.

Come in soon, or phone us right away. We have starter formulations that are just right to get your crops off to a fast, healthy start in the yield race

We want to help.

Dole considers grain inspection bill unfair to inspectors, buyers, sellers

WASHINGTON, D.C. - Senator Bob Dole last week stated his opposition to the Grain Inspection bill as reported by the Senate Agriculture and Forestry Committee, and introduced three amendments to modify the bill.

Dole, the leading Republican on the Agriculture Committee, said that while the grain inspection system needs improvement, "provisions of the Committee bill go too far in creating another layer of federal bureaucracy to

harass buyers and sellers of grain. The committee bill would put many highly regarded state and private inspection agencies - who have not been implicated in any way during the recent "scandals" or subsequent investigations - out of business and would also increase the costs of inspection thereby lowering the price farmers receive for their grain."

Dole's amendments would:

- delete provisions that would federalize the 25

major inland grain handling markets.

- stop the creation of a special federal agency to supervise the inspection of grain, separately from the inspection of other agriculture commodities

- strike the section providing for registration of all large grain companies and cooperatives.

"All proven cases of malfeasance and resulting indictments have been at major export terminals," Dole pointed out. "There has not been a single indictment at any of the 25 major inland terminals. Increased federal supervision of state and private inspection agencies would provide additional protection at a lower cost and in a more efficient manner than would complete federalization of the system."

The Kansas Senator said an entirely new agency for federal grain inspection would mean needless duplication of services already under the jurisdiction of the Agricultural Marketing

Service of the Department of Agriculture. USDA has

estimated additional administrative costs for the new agency would be at least \$1.5 million per year.

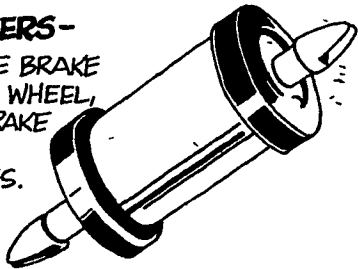

"The committee bill contains several provisions for enforcement and a separate registration provision for all large grain companies and cooperatives

- at a cost of \$1.6 million - would unnecessarily duplicate other enforcement procedures," Dole said. "With these amendments," he emphasized, "the bill would still provide extensive reform to prevent future violations such as we saw last year at Gulf ports."

Auto Service Tips

WHEEL CYLINDERS-

LOCATED INSIDE THE BRAKE ASSEMBLY OF EACH WHEEL, THEY FORCE THE BRAKE SHOES OUTWARD AGAINST THE DRUMS. WHENEVER LEAKS OCCUR ALL FOUR SHOULD BE REPLACED OR REBUILT.

When you need feed, you need it fresh.

We're fresh.

The Mix-Mill automatic grinder/mixer makes fresh feed. It grinds and mixes up to five different ration ingredients, automatically. It's accurate, too. 98% to 99% accuracy on recipe proportions.

A remote electrical control panel gives you finger tip command of all mill functions. Operates unattended too, controlled by modern electrical timers and switches.

Mixing is by auger proportioning, driven by trouble free steel gears. Just dial in

the proportions desired for your feed rations and let Mix-Mill do the rest. Select the exact amount of feed required day-after-day at the push of a button.

A daily ration of fresh feed generally gives dramatic increases in rates of gain. So make your next move to Mix-Mill.

See your Mix-Mill distributor soon. He's full of fresh ideas on making feed.

What's New

Solvent and Chemical Hose
One Hose for Many Jobs
Weil solvent and chemical hose is specially formulated to handle an extremely wide range of products. It is lighter and more flexible than all-metal hose, yet stronger and more serviceable than all-rubber or all-synthetic hoses. Its

unique properties are due to a flexible metal lining which

insures full flow and prevents collapse under suction. The metal lining will not kink, and resists pressure and expansion. It provides positive

dissipation of static electricity charges.

A solvent-resistant tube seals the flexible metal lining. This tube is specially compounded to resist swelling, remain pliable, and to not adulterate solvents. The tube is non-discoloring and non-flaking. The closely-woven cotton cover is light in weight and long-wearing.

Solvent and chemical hose is available in individual lengths of up to sixty feet from Weil Service Products Corporation, 2434 West Fletcher Street, Chicago, Illinois 60618.

Asgrow Adds New Variety To Soybean Line
DES MOINES, Ia. - Asgrow Seed Company is introducing its new soybean variety A3001 for 1976 planting, according to Bill Dimond, soybean product manager.

Lancaster Farming, Saturday, April 24, 1976—61

Asgrow released five new soybeans last year, and research is underway on several other varieties as a result of Asgrow's commitment to develop superior soybean seed.

A3001 is of Group III maturity similar to Wayne. The new variety is resistant to Race I phytophthora root rot and has shown high yield potential where Group III soybeans are grown, states Dimond. This variety is best suited to Central and Southern Iowa, Nebraska, Illinois, Indiana, Ohio, Northern Kansas and Northern Missouri.

A3001 is being processed through Asgrow's unique new plants at Oxford, Ind., and Clarion, Ia., to assure

growers of the high physical quality necessary for maximum performance from soybean seed.

"In this case, as with other Asgrow soybeans, the research genetics plus the special processing adds up to superior seed," says Dimond.

Savings Time Starts Sunday

Daylight Savings Time will go into effect on Sunday, when clocks should be turned forward one hour. The longer days will be in effect for half a year, until the last Sunday in October.

Twin Valley FFA'ers win procedure contest

By JUDY MITCHELL
Berks Co. Reporter
LEESPORT — The Berks County parliamentary procedure contest held at the Agricultural Center here on April 13 was evidence that FFA members are being well prepared to take their places in the agricultural industry as competent businessmen and women. An eight-student panel from each of the three area schools which competed were presented two items of business to consider in a timed, 20-minute mock meeting as the judges scored them and two quizzes from the opposing panels on six possible parliamentary

abilities. All of the panels went through their paces with remarkable efficiency, and it took some time for the judges to tally their score sheets and determine a winner.

Winning the top spot for Twin Valley in their respective positions on the panel were: Ted Ford, president; Harvey Bitler, vice president; Sandi Jennelle, secretary; Bill Harris, treasurer; Jan Oatman, reporter; Gary McVaugh, sentinel; Clarence Jennelle, student advisor; and Gerald Norris, chaplain.

Kutztown Area High School ranked second in the competition, with team

members: Ron Flicker, president; Kenneth Sanner, vice president; Michele Gladney, secretary; Richard Dietrich, treasurer; James Shrawder, reporter; Larry Shrawder, sentinel; Jeff Wessner, student advisor; and David Dietrich chaplain.

Making up the third place panel from Conrad Weiser were: Norman Manbeck, president; Art Noss, vice president; Jim Stoltz, secretary; Ray Zimmerman, treasurer; Dennis Salem, reporter; Leon Stauffer, sentinel; David Graupp, student advisor; and Jeff Phy, chaplain.

Judging the contest were: Don R. Weaver, the FFA Eastern Regional Vice President; Neil Burtner, an agricultural instructor from the Owen J. Roberts School in Chester County; and Charles Ackley, and agricultural instructor at Ephrata High School. Agricultural instructors advising the competing teams were: R. L. Frederick from Twin Valley who was also chairman for the contest; Ben Newcomer, Kutztown Area High School; and Sandy Effert from Conrad Weiser High School.

As first and second place winners in Tuesday's competition, the Twin Valley and Kutztown teams are eligible to take part in the area parliamentary procedure contest which will be held at the Center on April 28.

Food prices checked

WASHINGTON — Consumer food prices have not increased during the first quarter of 1976, the U.S. Department of Agriculture (USDA) revealed recently. Earlier the Department had expected a one percent gain in the first quarter.

Food prices may "increase slightly" during the second quarter, said Don Paarlberg, the Department's director of agricultural economics. However, Paarlberg said the leveling off of food price increases will slow the rise in the cost of living.

Paarlberg said some

seasonal retail price increases are expected during the coming months of fruits, vegetables, and for coffee. He expects some increases in farm prices for livestock and poultry.

"Farm prices of food have been declining since last fall. However, farm-to-retail price spreads for livestock are still relatively wide, even though the spread has narrowed in recent months," he explained. "If this trend continues in coming months, it will limit retail food price increases, and continue to slow the increase in the cost of living."

Germany spotlighted in Rotary travel program

The last program in the current Travel and Adventure Series sponsored by the Paradise Rotary Club will be held Saturday, April 24. Beginning at 7:30 p.m., the feature will again be at the Conestoga Valley High School.

Photographer - Narrator will be Bill Kennedy, in a presentation entitled, "Motoring Through Germany." Kennedy calls Germany a fascinating land of Alpine mountains and lakes, historical cities, fairy tale castles, gay festivals, and fabulous treasures of art and medieval buildings. Highlights of the program on film include the cities of Bonn, Hamburg, Bremen, and some lesser known.

Also included on the tour will be Bavaria and the majestic beauty of the Alps, with their white-capped peaks soaring to the sky and often reflected in clear sparkling lakes.

Tickets for the travel series will be available at the door at Conestoga Valley High School, at \$1.75 for adults and \$1.00 for students. Proceeds go to support the various community activities of the Paradise Rotary Club.

Feed & weed yourself? We'll help you rig up.

For fertilizing and weed control, there's a one-trip solution: Feed and weed — applying liquid fertilizer and weed control chemicals together in one quick trip. It saves you time, labor, equipment costs, reduces soil compaction, and helps you get more profit out of every acre.

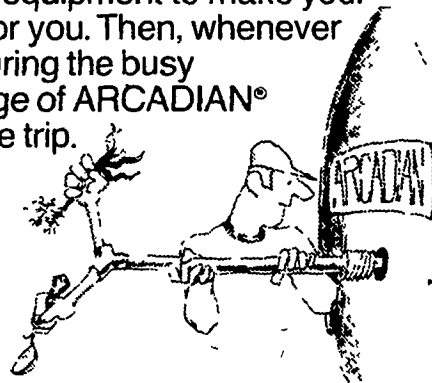

Most herbicides can be included in our prescription mixed SLF® liquid fertilizer or in Golden URAN® nitrogen solution. So you can feed and weed preplant or postemergence on practically any crop.

We'll help you rig up your equipment to make your own application, or we'll do it for you. Then, whenever you want to save busy work during the busy season, you can take advantage of ARCADIAN® liquid and feed and weed in one trip.

Ask us about it soon.

Cloister FFA wins area contest

By MELISSA PIPER
BROWNSTOWN
Preparing for an important
competition is not always an
easy task - especially when it
follows a spring vacation.
But for numerous area FFA

members, being well
rehearsed was important for
the parliamentary
procedure and public
speaking contest held here
on Tuesday.
Three teams competed in

the parliamentary procedure
contest which involves
conducting a business
meeting with eight officers
present. Judges look for
excellence in meeting rules
knowledge and in the poise
and attention each officer
devotes to his work.

Ephrata's Cloister FFA
team captured the event
with Solanco placing second
and Oxford taking third.
Judges for the contest were
Robert Gregory, Pennfield
Corp.; Charles Leibo, State
FFA official and Robert
Harris.

Chester and Delaware
County students topped the
field in the public speaking
category with Gary Steck,
Pottstown, a student at Owen
J. Roberts High School

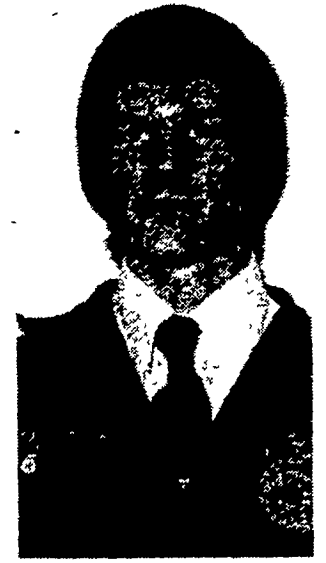

placing first, Bonnie Mc-
Shane, Landsdowne, a
student at the Delaware
County Vo-tech school
placed second in the event. A
Grassland FFA'er, Linford
Weaver, captured third for
his speech during the
competition.

Judges for the public
speaking contest were Jay
Irwin, associate county
agent in Lancaster; Harvey
Smith, area FFA advisor
and Dick Woods, former
FFA advisor.

The top individuals and
parliamentary procedure
teams will be traveling to the
regional FFA contest slated
for later this spring. The
regional contest will be the
preliminary for FFA State
Days slated for June.

Old-time farm festival planned

The age of steam and belt power comes alive again at "Agricultural Americana," an old-time farm festival which is now in its second year. Held

at Port Royal a year ago, this year's event will take place near Amity Hall.

Lancaster Farming Photo by Dieter Krieg

The second annual Agricultural Americana Folk Festival and working farm museum program will be held July 24 through August 1 at a new location at Amity Hall, north of Harrisburg.

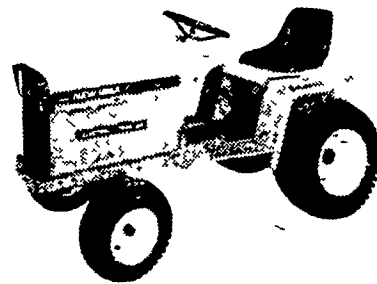

Harold Sheaffer, founder of the event, says the new site provides better facilities, more parking and a more central location than last year's Port Royal location. The greatly expanded program for the Bicentennial Year has more than 50 events slated and will cover two weekends to

handle the expected large number of visitors to Pennsylvania.

Agricultural Americana will feature a wide variety of early agricultural equipment in action and demonstrations of some long forgotten farming and household practices. Sheaffer says steam enthusiasts from other area shows will bring steam engines and equipment to the year. Steam powered threshing, a sawmill and

DR. THOMAS A. BOCH

IS PROUD TO ANNOUNCE
THE OPENING OF

THE BOCH CLINIC

At 2900 Yellow Goose Road

The Clinic Is Just Off Rt. 283, opposite the new Kellogg Plant.

Dr. Boch is a native of Oak Ridge, Tennessee, the famed "Atomic City," well known for its unique scientific and intellectual atmosphere. He is married to the former Linda J. Spriggle of Clearfield, Pennsylvania and they have three children.

Although a number of diverse conditions will be treated at the clinic, the main specialized attention will be directed at the following problem cases: headaches, arthritis, nerve problems, neck, shoulder, back and leg conditions.

Dr. Boch graduated from the Logan College of Chiropractic in St. Louis, Missouri in 1967 with the third highest class average (3.5). Post graduate studies: Biology, Physiology, and Anatomy at St. Francis College of Loretto, Pennsylvania and Roane State College in Harriman, Tennessee.

Specialized studies have been continuous during Dr. Boch's 9 years of practice; Area Research Director, Health Industries of Murray, Kentucky; the G. T. Owen Memorial Research Center in Jacksonville, Florida; Parker Chiropractic Research Foundation in Dallas, Texas; Scientific Research and Civil Rights Foundation in Altadena, California; The Rockley Research Academy in St. Louis, Missouri; The Owen Clinic of Chattanooga, Tennessee; The Pain Control Clinic in Kansas City, Missouri; and The Acupuncture Society of America in Kansas City, Missouri.

Dr. Boch holds basic science certificates in Florida, Ohio and Tennessee and is licensed to practice the healing art in Pennsylvania, Ohio, Florida and Tennessee. He is a Diplomat of the National Board of Chiropractic Examiners and a past member of both the American Chiropractic Association and the International Chiropractors Association.

Dr. Boch and his family reside at 1528 Nissley Rd. in Landisville.

Dairy promotion okayed

NEW YORK - A plan whereby dairy farmers contribute money for milk promotion activities of the American Dairy Association and Dairy Council of New York, Inc. was approved recently by Thomas A. Wilson, market administrator, New York-New Jersey Milk Marketing area. These milk promotion activities include advertising, nutrition education, publicity for dairy products, marketing and product research, and information services.

Noting that New York State had a mandatory milk promotion plan, the administrator stated that no dairy farmer will be subject to deduction under this program if he is making mandatory contributions under a state plan.

The action allows handlers regulated by the marketing orders to send "positive letters" to their dairy farmer suppliers, Wilson said.

A dairy farmer who receives a letter will be considered to approve for one year deductions of five cents per hundredweight from his monthly milk checks, unless he notifies the handler in writing that no deduction should be made.

Moneys deducted from payments for milk delivered on or after June 1 will be paid directly by the handler to the American Dairy Association and Dairy Council of New York, Inc.

The market administrator explained that participation is voluntary for both handlers and producers, and a participating producer may have deductions stopped at any time by notifying the handler. A producer who does not want to participate and who receives no letter need not notify his handler since no deductions will be made.

In approving the plan for

the coming year, Wilson pointed out that there had been no substantial opposition to the use of the positive letter procedure by producers.

Use of the positive letter approach was requested by Dairy Lea Cooperative Inc., Eastern Milk Producers Cooperative Association, Inc. and Northeast Dairy Cooperative Federation, Inc.

Nutmeg, Sage and Dill

A little nutmeg adds glamor to creamed vegetables or chicken soup and brightens beef dishes, fish cakes and fish casseroles. Sage is the perfect accompaniment for pork or poultry. Add a sprinkle to cottage cheese, too, and try a pinch in vegetable soup. Dill seed is delicious sprinkled on potatoes, cole slaw and macaroni.

Wool payments made

An incentive payment rate of 61.1 percent on 1975 marketings of shorn wool has been announced by the U.S. Department of Agriculture (USDA), according to B. Snavely-Garber chairman of Lancaster County Agricultural Stabilization and Conservation Committee. The announced payment rate is based on the difference between the national average price of 44.7 cents a pound received by producers during 1975 and the previously announced incentive price of 72 cents a pound. Incentive payments to wool growers are required under the National Wool Act of 1954, which promotes wool production to meet U.S. minimum needs. The program is financed by import duty on imported wool and wool products.

Payments totalling \$5669.92 were made to 58 farmers in Lancaster County.

The 1975 payment rate compares with the 1974 rate of 21.8 percent. Payments for 1975 marketings of wool will be about \$40 million compared to payments of \$15 million on 1974 marketings.

A grower's payment is determined by multiplying the net dollar return from the sale of wool by the payment rate of 61.1 percent. This percentage method encourages growers to improve the quality and marketing of their wool. In any marketing year for which incentive payments are made, the higher the price a grower receives for his wool, the larger his payment.

A payment rate of \$1.09 per

hundredweight on unshorn lambs sold or slaughtered in 1975 was also announced by USDA. This payment compensates growers for the wool they market on live lambs rather than as shorn wool. The payment is based on the shorn wool payment rate, average weight of wool per hundredweight of lambs, and value of lamb's wool relative to the national average value of shorn wool.

Deductions of 1½ cents a pound from 1975 shorn wool payments and 7½ cents per hundred pounds of liveweight from 1975 lamb payments will be made to finance advertising, sales promotion and related market development activities. These deductions, provided for in the National Wool Act, were approved by an 85.5 percent favorable vote by sheepmen voting in a November 1974 referendum.

Bank manager named

The First National Bank of Strasburg has named Ann B. Harting manager and David C. Hostetter assistant manager of its Willow Street Office. The announcement was made by Donald H. Hofferker, Senior Executive Vice President of the Bank.

Mrs. Harting joined the Bank in 1965 as a teller. In 1971 she was promoted to assistant manager of the Willow Street Office. She graduated from the Pennsylvania Bankers Association School of Banking at Bucknell University and has taken banking courses through the American Institute of Banking. She is also a member of the Women's Committee of the AIB.

Mrs. Harting resides in Willow Street with her husband Phares, and they have three children.

Hostetter joined The Friendly First in 1972 and has completed the Bank's management training program. He graduated with distinction from the Pennsylvania Bankers Association School of Banking and is a cum laude graduate of Lebanon Valley College. The Mt. Joy native is a member of the faculty of the American Institute of Banking and vice president of the Lancaster County Alumni Association of Lebanon Valley College.

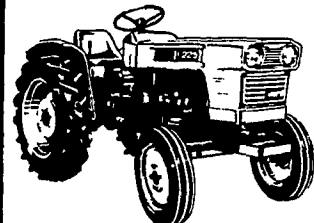

In mid-April, 1776, with the long siege of Quebec at an unsuccessful close, patriot leaders in Boston and Philadelphia were yet unwilling to abandon

Canada. Congress sent a diplomatic mission north to seek support from the Canadian people, also began raising troops for a second assault on Quebec

'Washing receipt'

GRANDMA'S "RECEIPT" FOR WASHING DIRTY CLOTHES

This is an authentic washday "receipt" in its original spelling as it was written out for a bride four generations ago.

1. Bild a fire in back yard to heet kettle of rain water.
2. Set tubs so smoke won't blow in eyes if wind is pert.
3. Shave one hole cake soap in bilin water.
4. Sort things, make three piles, 1 pile white. 1 pile cullord. 1 pile work britches and rags.
5. Stur flour in cold water to smooth then thin down with bilin water.
6. Rub dirty spots on board, scrub hard, then bile. Rub cullord, but don't bile — just rench and starch.
7. Take white things out of kettle with broom stick handle then rench, blew and starch.
8. Spred tee towels on grass.
9. Hang old rags on fence.
10. Pore rench water in flower bed.
11. Scrub porch with hot soapy water.
12. Turn tubs upside down.
13. Go put on cleen dress - smooth hair with side combs - brew cup of tee - set and rest and rock a spell and cout blessins.

Fire damages 2800 acres of forest

HARRISBURG - A rampaging wildfire, encompassing an estimated 2,800 acres of nearly all State Forest land, raged out of control Tuesday, in north-central Pennsylvania despite the untiring efforts of fire crews from the surrounding area to bring it under control.

A spokesman for the Division of Forest Fire Protection, Department of Environmental Resources, said the fire was one of 64 new wildfires, involving 3,800 acres, which broke out Monday as a spring heat-wave continued.

Blamed on a broken power line, the fire started along Rt. 44, near Haneyville, Lycoming County, and was last reported spreading towards Pine Creek.

Fire crews were hampered

not only by the intense heat but also by the fact that burning bark and sparks were blown for distances up to half a mile away to set off a series of new fires in the dry brush.

On the scene Monday and Tuesday were fire crews from Forest District 12, in which the wildlife is located; The Pennsylvania State University and from the Wellsboro area.

During another fire on Monday, in southeastern Pennsylvania, 10 firemen were overcome by the intense heat and required medical treatment; and in Forest District 20, in the Bloomsburg area, an 80 acre tract of forest land was swept by fire within 40 minutes. During that short time flames shot 50 to 150 feet into the air.

Here's how we've made the 1207 a little better

This improved 1207 does a better job for you - quieter and more reliable.

Internal changes in the knife drive case extend the life of this heavy-duty drive. And a sealed pin and stronger bushing connector increase the reliability of the knife head. There's a rubber cushioned dampener in the knife drive sheave to absorb sound. Here's a quiet, easy-to-service mower/conditioner - take a look.

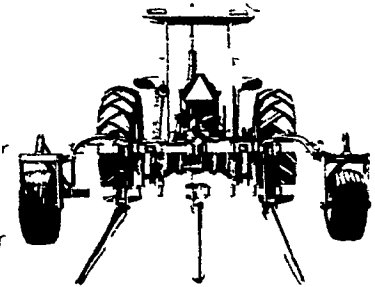

The new 100 Stack Wagon offers big-wagon, high-density features in a 1½-ton size

Start with the stack. In dimensions alone the 100 beats most others in its class. Measuring 7 feet wide, 10 feet long and 8 feet high, this size lets you put up more hay in fewer stacks. You get the rounded canopy for weather tight tops. Tight stacks from 195-psf compression pressure. Hydraulically-operated rear door clears the stack during unloading. Combination hay and stover paddles let you put the 100 on double duty - in hay and stover. And like the bigger John Deere stack systems, the 100 has a capacity-matched mover. We have more facts. Come in and see us.

Want to move 1½-ton stacks? Check our new 100 Stack Mover

The 100 Stack Mover makes light work of handling the 1½-ton stacks formed by our 100 Stack Wagon. You can also use this mover to transport big round bales. Three 116-inch long tines slide under the stack, hydraulic cylinders raise the stack, and two castoring support wheels help carry the weight. Your stacks get a secure ride with 14 inches of ground clearance.

Tractor Club holds round-up

The Lancaster County 4-H Tractor Maintenance Club Round-up was held Thursday evening, April 8 at the Farm & Home Center. Mr. Roy Buch, President of the Lancaster County Machinery Dealers Association presented awards to the members for

their outstanding project work.

Winners for the best two overall projects went to David Brubaker, Lancaster and Scott Augsburg, Reinholds; the best first year projects went to Dwight Rohrer, R7 Manheim and Mike Fox, R2 Ephrata; the best second year project awards went to John Kreider, Lancaster and Michael Bukowski, R1 Mount Joy; the best third year project awards went to Clifford Martin, R2 Ephrata and Jim Snader, Akron; and winners of the fourth year projects went to Sharon Bare, Witmer and Robert Haldeman, R1 Reinholds. Jay W. Irwin, Agricultural Agent, discussed the im-

portance of safety when working with equipment whether it is on the hi-way, in the field or in the work shop. He also discussed the Occupational Safety and Health Act (OSHA) and stressed the need for every farmer, that hires any labor, to be aware of the implications of this law. The film "Unfinished Miracles" was shown.

THE RIGHT MAN FOR THE JOB

R. DARRELL HAUCK

REPUBLICAN

CANDIDATE FOR REPRESENTATIVE

IN THE GENERAL ASSEMBLY

97th LEGISLATIVE DISTRICT

PULL LEVER F-30

ISSUES

AGRICULTURE "The 'family farm' concept is dying out primarily because of excessive inheritance taxes and farm land assessment. I favor an inheritance tax computed on the basis of farm land income - not market value of the land. I favor farm land assessment based on capacity of land (soil survey), land use, and capitalization of net farm income. I oppose farm subsidies as non-productive to the farmer and costly to the taxpayer."

TAXES "It's high time our State Government take a common sense approach to budgeting and spending! Budget cuts, combined with tax reform, are essential!"

WELFARE "Welfare is a charity - not a right! The ever-growing philosophy that welfare recipients are 'entitled' to your tax dollars and mine is encouraging welfare-statism and must be reversed!"

GUN CONTROL "I am opposed to gun control legislation. Gun control legislation does not reduce crime! It merely disarms law-abiding citizens - not criminals."

PUBLIC EMPLOYEES' RIGHT TO STRIKE "While I recognize the right of public employees to bargain collectively, I oppose their right to strike. By so doing, they withhold vital services and threaten the public health, safety and economy."

CRIME "We talk of freedom of speech, freedom of the press, freedom of religion. What about Freedom from Crime? It is time we began passing tough anti-crime laws and enforcing the laws we have! One of the first steps in that direction is limiting the second offender's 'right to bail' depending upon the seriousness of the crime."

Horse drugs on market soon

PALO ALTO, Ca. - The FDA has taken action on Syntex applications to market two veterinary drugs for use in horses, it was announced recently by Harold Hansen, president of Syntex Agribusiness, Inc.

Final clearance has been received to market for veterinary use the anti-inflammatory compound, naproxen, under the brand name of Equiproxen. Developed by Syntex Research, naproxen has been used extensively as an anti-arthritis drug in humans since 1972. Equiproxen is recommended for use in horses for the relief of inflammation, associated pain and lameness exhibited with myositis and other soft tissue diseases of the musculoskeletal system.

Equiproxen will be made available to veterinarians as

an intravenous solution and as granules for top-dressing on feed. Marketing will be through the Diamond Laboratories, Inc. division and the International Division of Syntex Agribusiness, Inc.

Syntex has also received an "approvable" letter from the FDA for the veterinary drug, prostalene, to aid breeding in mares, Mr. Hansen said. Prostalene, a synthetic prostaglandin, is a luteolytic agent that aids in the management of breeding in mares, particularly where it is impractical to check for estrus - the period when the mare can be fertilized.

Syntex is providing final labelling on prostalene to the FDA. After final clearance, the injectable product will be available to veterinarians under the brand name of Synchroncept, Mr. Hansen said.

April 28, 1788-Maryland enters the Union as the nation's seventh state.

The De Laval Unitized Vacuum Group

OUR RUGGED Space Saver

Because the tank and pump are "unitized", the De Laval vacuum pump takes up less space. That means more room in the parlor. We designed it for easy cleaning and maintenance, ruggedness, long pump life, and quieter operation. With a sufficient capacity for every dairy farm. See one today

Farm milk price drops

The March uniform price for base milk dropped 16 cents per hundredweight from the previous month. Excess milk showed an increase of 28 cents per hundredweight.

In comparison to March levels one year ago, base milk is \$2.10 per hundredweight higher and excess \$1.74 higher.

The weighted average price for the market was \$10.59, a decrease of nine cents per hundredweight from February.

A total of 455.4 million pounds of producer milk was pooled in March of which 64.4 percent was sold as Class I,

compared to 63.6 percent for February and 60.2 percent a year ago. A total of 8,182 Order No. 4 producers provided 14.7 million pounds per day to dealers during March, averaging 1,796 pounds per farm per day. Total value of producer milk was set at \$48,114,429 for the month.

Using Vegetables

Cooked vegetables such as snap beans, lima beans, corn, peas and carrots can add their flavor and nutrients to casseroles, creamed dishes, meat pies, salads, sauces, scalloped vegetables, soups, stews and vegetables in cheese sauce

The U.S. Department of Agriculture (USDA) has proposed rules and regulations for implementing the national Egg Research and Promotion Order, and called for comments on the proposal by May 13.

According to a poultry official with USDA's Agricultural Marketing Service (AMS), the proposed rules, developed in consultation with the Egg Board, would establish an assessment of 5 cents per 30 dozen eggs marketed to be paid by producers with more than 3,000 laying hens. Eggs from hatchery operations are exempt from assessment. The proposed date that producers would start paying the assessment is Aug. 1, 1976.

The 18-member Egg Board is responsible for administering the Egg Research and Promotion Order. It is composed of egg producers, nominated by producer organizations, and

Spice It Up

White pepper is more aromatic, but less biting in taste than black pepper. It is preferred for soups, sauces, fish, poultry and meat dishes where black specks might mar the appearance. Saffron is the world's most expensive spice. In rolls and cakes, it adds a distinctive flavor and soft, golden color. It is particularly good with rice.

**TRY A
CLASSIFIED**

Egg promotion proposals slated

appointed by the Secretary of Agriculture.

In the proposed rules, the AMS official explained, shell egg packers and egg breakers would be collecting handlers and remit producer assessments. Remittance would be directly to the Egg Board or through a cooperating State agency under contract with the board.

The official noted that any producer who grades or breaks eggs of his own production must remit the assessment on the eggs he grades or breaks. Also, handlers who do no more than buy and sell nest run eggs must also remit assessments to the Egg Board of eggs handled.

All funds collected must be reported and remitted to the board not later than 15 days after the end of the predetermined reporting period.

The proposal also specifies the types of reports that must be submitted to the board by collecting handlers and the procedure producers must follow to obtain refunds.

Comments on the proposal

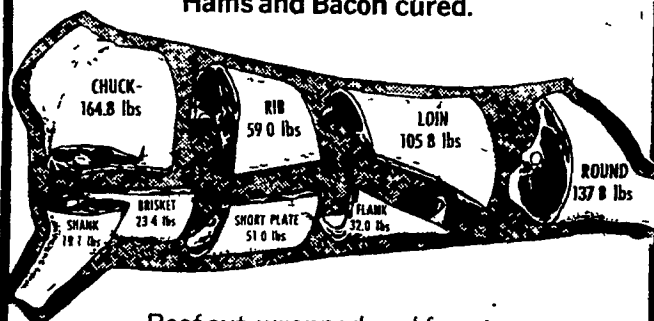

should be submitted in duplicate to the Hearing Clerk, Room 112-A, USDA, Washington, D.C. 20250, where they will be available for public review. Today's proposed rules and regulations are scheduled to appear in the April 13 Federal Register. Copies of the proposal can be obtained from the Poultry Division, AMS-USDA, Washington, D.C. 20250.

Hundreds of visitors came to the "Agricultural Americana" exhibition last summer when it was in its first year. Aside from old-time equipment being

in action, the show also has a variety of demonstrations on blacksmithing, broom-making, and much more.

Lancaster Farming Photo by Dieter Krieg

Steam show

(Continued from Page 64)

shinglemaking - will be featured on weekends.

Demonstrations will include blacksmithing, candle-

making, spinning-weaving, chair caning, rug braiding, applebutter-making, silver and copper-smiths, butter churning and more than 30

other crafts people at work. Special features will take place each day with square dancing every night.

Special weekend programs will include an old-fashioned picnic auction featuring Miss Pennsylvania and other regional beauty pageant winners. Outdoor church services will be held by a "circuit rider preacher" on

both Sundays. A slippery pig contest and fashion shows will also be weekend features.

Sheaffer's large collection of antique farm machinery will be moved to the location for Agricultural Americana showing. The festival site is 12 miles north of Harrisburg on a tract at the intersection of Routes 322, 22, 11 and 15.

Tree film available

WASHINGTON - The forests facing settlers of America provided materials to build a nation. This is the theme common to a new film, a booklet and an exhibit prepared for the public in recognition of the Bicentennial.

The film from the U.S. Department of Agriculture (USDA) highlights the role forests have played in the development of the United

States. Produced by USDA's Forest Service, "Roots of the Nation" traces the growth of the U.S. from early settlement to the present through the use of forests and wood products. For over 200 years trees, a renewable natural resource, have provided products to develop this country - sailing ships to wagons to railroad ties to solid rocket propellants made from wood product.

4-Hers return from trip to Canada

Four Pennsylvania young adults with outstanding 4-H records attended the annual meeting of the Junior Farmers' Association of Ontario, Canada, March 19-21.

Attending were Donna Lindsay, of Riegelsville R1; Karen J. Homer, of 1704 Church Road, Orelana; Hosea Latshaw, of 510 S. Wall Street, Spring City; and Jay Fulmer, of Lewistown R1.

According to Henry T. Moon, cultural exchange specialist, 4-H-youth, at The

Pennsylvania State University, the four took part in Junior Farmers' Association activities designed to broaden leadership capabilities.

They also participated in programs designed to help in expanding the image of local 4-H Clubs. Theme of the conference was "Motivation for Participation."

Donna Lindsay has a dairy farm background and is presently working in a dairy and grocery store.

Karen Homer, currently enrolled at Villanova University, has experience with horses and works summers on a horse breeding farm.

Hosea Latshaw, an agricultural engineering major at Penn State, has a farm background and worked summers at a golf course and orchard.

Jay Fulmer, an animal science major at Penn State, was raised on a dairy farm and also raises beef cattle.

Princess entries due

The Chester County Dairy Princess Contest has been slated for June 4 and will be held at the Elverson Fire Hall. The deadline for entering is May 12 and interested girls should contact Mrs. Evelyn Evans at Chester Springs.

FOR CONGRESS WALKER

**"BEST QUALIFIED"
CANDIDATE
ESHLEMAN SAYS**

SIXTEENTH CONG. DIST., April 5 Robert S. "Bob" Walker, chief aide to Congressman Edwin D. Eshleman, today received his boss's endorsement as the "best qualified" of the Republican candidates for Congress.

Stressing that Walker will be able to provide the kind of service the district has come to expect, Eshleman said,

"Bob Walker is the man who has been serving this district for ten years and I am confident that the service will continue in the same tradition if he is elected to Congress.

"Bob Walker has provided leadership toward reforming welfare laws and food stamp problems.

"Bear in mind the next Congressman will be my Congressman too. Therefore, I want the best qualified man elected. That man is Bob Walker."

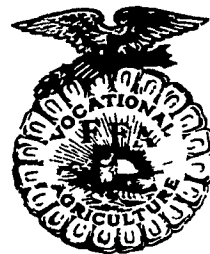

BOB WALKER FOR CONGRESS

Paid for by The Bob Walker For Congress Committee, Betty M. Fiedler, Chairperson.

From Local Ag Teachers:

Thoughts in Passing

Charles J. Patterson
Brownstown Vo-tech
As vocational instructors, we have sometimes felt detached from the main flow of education. This can be especially true at the vocational - technical schools where students are only in attendance on a half-day basis, and may live many miles from the school. There are no school teams, newspapers or assemblies, and very few student activities outside of the student "trade" clubs (FFA, DECA, and VICA). Even at home schools Vo-ag and shop courses are usually in a remote wing of the building. Vocational teachers there are usually not as involved in school activities as the so-called academic teachers. This is usually due to longer hours involved with our job, but it still reinforces the split between regular classroom subject and vocational classes.

About the time that the vo-tech schools arrived in Lancaster County, education in general was changing very suddenly and quite strongly. Most schools offered many electives, dress codes disappeared, and high school graduates were very oriented to the liberal arts type of college. Many vo-ag departments reached some new students by elective courses, but only half of our local schools have vo-ag. The new Vo-tech schools often times got the unwanted or unmotivated student, just as vo-ag and industrial arts have sometimes had in the past. Things had to change,

and I believe they are now doing so. The slow job market has created a rush to vocational training, both at high school and college levels. Guidance counselors and home school teachers have had a chance to see vocational education work. Many students now are

coming to shop classes out of a positive choice, not a lack of anywhere else to go. More vocational graduates are getting higher education in their field. Some shops are still not filled, we still have a long way to go, but vocational education is truly coming of age.

Cattle inventory released

HARRISBURG - Pennsylvania cattle feeders had 80,000 cattle and calves on

feed for slaughter market on April 1, 1976, according to the Crop Reporting Service. This was eight per cent or 6,000 head more than were on feed a year earlier.

Marketing of feed cattle during the January-March quarter, at 27,000, were four per cent or 1,000 head more than were marketed during the same period in 1975. There were 19,000 head placed on feed during the quarter, the same as a year ago.

Expected marketings of fed cattle, if realized, during the April-June quarter of 1976 would be 24 per cent or 8,000 head more than were marketed during the same period in 1975.

Cattle and calves on feed for slaughter market in the 23 major cattle feeding states totaled 10,872,000 head on April 1, 1976. This is up 28 per cent from a year ago. Placements of cattle and calves in the 23 states during the January-March quarter of 1976 totaled 5,439,000 head, up 14 per cent from this period in 1975.

Marketings of fed cattle for slaughter during the January-March quarter of 1976 totaled 6,350,000 head, up 15 per cent from the same quarter a year ago. Expected marketings during April-June 1976 in the 23 major states is estimated at 5,957,000 head and if realized would be 18 per cent above the second quarter of 1975.

Sea Stories

In the 5th century, English sailors wore loose, full-sleeved "sea-gowns" that hung to the knees and were belted at the waist. The first official naval uniform dates from 1604, when King James I ordered shipmasters to wear long, scarlet livery with velvet trim. Seamen in the 18th century were called "tars" because they wore their long hair in tarred pig-tails to keep it in place. The large square collars on sailors' uniforms were added to keep the tar from staining their open-necked jumpers.

Farm payment was 1500 gals. apple brandy

Editor's Note: This is the 12th in a continuing series of feature articles describing farms in southeastern and south-central Pa. which have been in the same family for 100 or more years. It is LANCASTER FARMING'S way of recognizing and saluting agriculture — the foundation of civilization everywhere.

By DIETER KRIEG

LIBERTY SQUARE — "Times are very dull here . . . no demand for anything but hogs." That might sound like a statement from last summer, but the words are actually those of James Ecklin who penned them at the age of 75 in a letter dated Dec. 29, 1893. James Ecklin is the great-grandfather of Luther Ecklin, who is now nearly the same age, and present owner of the Ecklin homestead which has been in their family since 1851.

Tucked away among the hills in southwestern Lancaster County, the Ecklin farm remains largely undisturbed and removed from developed areas. But that is not to say that the

★★★★★★★★★★★★★★★★★★★★

Bicentennial farm

★★★★★★★★★★★★★★★★★★★★

farm is out of touch with civilization and modern conveniences. The Ecklins were, in fact, among the first in the area to have electricity, a radio, and telephone.

Luther Ecklin recalls the early days of radio in his home. The neighbors used to come over in flocks to listen, he chuckled, explaining that there were no loudspeakers back

then and with just two sets of earphones the competition for listening got pretty keen sometimes. "That was a real treat in those times," he said.

Although a rather large collection of letters, deeds, newspaper clippings and family heirlooms document the history of the Ecklin family fairly well, it is not known exactly when the first Ecklins arrived in America.

Mrs. Ecklin, the former Ella Smith, tells the story of the first member of the family coming to this country as a result of crossing class lines in marriage. That sort of thing was frowned upon in 18th Century England and the newlyweds therefore sought to establish their homes in a freer society. The family's genealogy can positively be traced back to the year 1782. Records prior to that were lost, Mrs. Ecklin remarked.

The 109-acre farm once consisted of 186 acres and was first deeded to white settlers in 1739 as a land grant from William Penn. When resold later to a fellow by the name of John Robinson in 1787, the going price was 45 pounds of gold or silver currency and 1500 gallons of apple brandy.

In 1808 the farm was sold again for a price of 175 pounds of Pennsylvania currency, which is interesting since the United States had been in existence for approximately a generation at that time.

The first of the Ecklins to have acquired the property was Mary Ecklin Buchanan, who had the land willed to her after her husband's death in 1851.

The importance of water is obvious in just about every place where man settled. Here, on the Ecklin farm, for example, a strong spring is within easy walking distance of the house and it was definitely a factor when the decision for location of buildings was made. The spring was so important

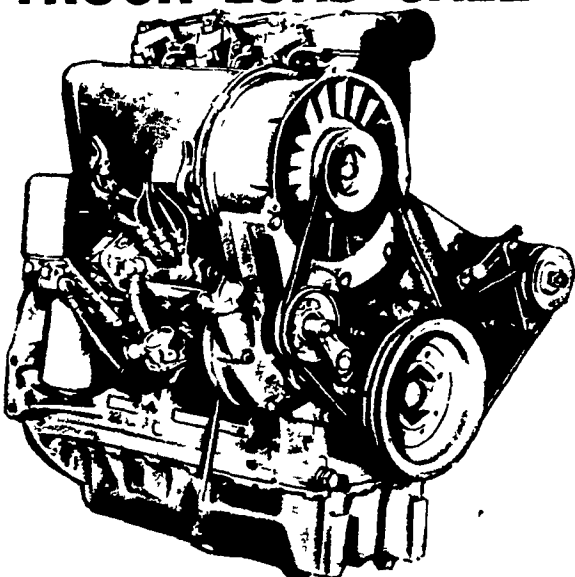

[Continued on Page 75]

Suzanne and Rob Ecklin, foreground, are the sixth generation of Ecklins associated with the

Ecklin homestead near Liberty Square in southwestern Lancaster County. They're the children of Robert Ecklin, right, son of the property's present owners, Mr. and Mrs. Luther Ecklin. With the family is Mrs. Ecklin's mother, Anna Smith.

Will your feed efficiency measure up to Mol-Mix?

To any cattleman, whether he's a feedlot operator or a cow-calf man, feed efficiency is the name of the game.

But mere supplementation may not be the whole answer. If you choose an inferior brand, you may just be wasting your money.

Mol-Mix liquid feed supplement contains extra "performance oriented" ingredients that many others don't have. Things like: phosphoric acid; ammonium polyphosphate, corn distillers solubles, and condensed fermented corn extractives. A feed supplement, as with any manufactured product, is no better than the quality of its construction. You get what you pay for. Mol-Mix is made with the best ingredients available.

It's just an out and out fact that Mol-Mix will make more net profits for you. Some have reported as much as \$5.00 return for every dollar invested in Mol-Mix.

Stop in at your Mol-Mix dealer and find out how. He may just have a nice surprise for you.

Chester Co. homemaker's day set

The Chester County Extension Service is sponsoring Spring Homemaker's Day at the Cochranville Fire Hall, Rt. 10 - Cochranville. The program will be held on Wednesday, April 28, 1976 from 10 a.m. to 2 p.m.

A slide presentation on the Pennsylvania Family featuring past, present and future will be discussed by Trudy Dougherty, Extension Home Economist. Those planning to attend are encouraged to bring along

items of local interest that reflect the family's heritage. These items will be displayed and included in the program.

Talks on places of interest in the counties of Chester, Delaware and Lancaster will be given by Mrs. Robert Smiley, Chester Spring, Mrs. William Hall, Glen Riddle and Mrs. Melvin Stoltzfus, Lancaster.

Entertainment by the Music Department of the Octorara High School will be part of the day's activities.

The day's program will include a workshop by Valerie Peoples and Jan Renner, County Home Economists, on learning the techniques of sand art by making a mini terrarium. Sand, plant material and soil will be provided. For this workshop bring along a small container not larger than 8 oz. with straight sides.

The program is planned by the Chester County Home Economics Advisory Committee and they invite all who are interested to attend.

A small registration fee will be required by Wednesday, April 21, 1976. For further information call or write, Chester County Extension Service, 235 W. Market St., West Chester, 696-3500.

FmHA housing extended

WASHINGTON — Home loan service to families of low and moderate income were extended today to 254 communities in the 10,000-to-20,000 population range by the Farmers Home Administration (FmHA), rural credit agency of the U.S. Department of Agriculture.

The action was taken under a provision of the Housing and Community Development Act of 1974. The act authorized FmHA to make housing loans in rural towns where population exceeds 10,000 but does not exceed 20,000, if the U.S. secretaries of Agriculture and of Housing and Urban Development determine such towns have a serious lack of mortgage credit. FmHA otherwise confines its home loan program to the

rural countryside and rural towns of not more than 10,000 population.

Regulations for extending service to the 254 larger community areas certified by the two secretaries were in the April 14 Federal Register and become effective immediately. As required by law, all communities listed are outside Standard Metropolitan Statistical Areas (SMSA's).

The extended authority applies to single-family housing loans administered by FmHA under Section 502 of the Housing Act of 1949, as amended. The agency's insured loans may be made to families whose incomes are categorized as low or moderate, for terms of up to 33 years. The interest rate currently is 8½ percent. Under interest credit provisions of the housing act,

interest as low as one percent may be paid by a borrower family of low income.

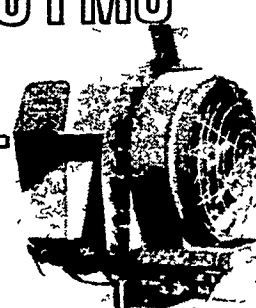

Communities in this area which are listed in the Federal Register as newly eligible for the service are:

PENNSYLVANIA — Appollo - Vandergrift, Athens - Sayre - South Waverly, Berwick, Bloomsburg, Bradford, Chambersburg, Clearfield, DuBois, Franklin, Indiana, Greenville, Connelville, Grove City, Lewistown, Lock Haven, Meadville, Oil City, Sunbury, Warren, Waynesboro.

NEW YORK — Batavia, Massena, Ogdensburg, Olean, Oneonta.

MARYLAND — Cambridge.

Home landscaping school slated

The Schuylkill County Cooperative Extension Service announces a three session Home Landscape Course beginning May 4. Home owners interested in learning about basic landscape design, care of lawns, selection of trees, shrubs, and ground covers are invited to attend. Home owners will develop a landscape plan over the 3 two-hour classes. The school will be conducted May 4, 11, and 18. There will be two class times. Residents may attend either the 1:00 to 3:00 p.m. class or the 7:30 to 9:30 p.m.

class. The latest up-to-date materials on lawns, shrubs, trees, and ground cover selection and care will be provided each participant. Schuylkill County residents must register with the Agricultural Extension Office by May 3. Classes will be limited to 20 in the afternoon class and 50 in the evening class. First come, first serve. Contact Terry R. Bortz, County Agent-Agriculture, Schuylkill County Extension Service, P.O. Box 404, Schuylkill Haven, PA 17972 or call 385-3431 for more information.

Oldsters to ride free

As a salute to the senior citizens of Lancaster County, the Lancaster County Office of Aging and the Red Rose Transit Authority have announced today that all senior citizens, 65 years of age and older may ride the buses free, at any time of day during the entire month of May.

"May, being Senior Citizen's Month is the perfect time for all of us to honor these people for their contributions to Lancaster County", Pete Dys, executive director of the Office of Aging commented.

"With the cooperation of the Red Rose Transit Authority and funds provided by the County Office of Aging, we are pleased to be able to offer this extra service", Dys continued.

Reed Rodman, executive director of the Red Rose Transit Authority pointed out that senior citizens currently make up approximately 40 percent of their total ridership. The Authority presently participates in the Penna. Dept. of Transportation Free Fare for Senior Citizen program which allows persons 65 years of age to ride free during the week "off peak" hours. During May there will be no limit on the time for free rides to senior citizens presenting either a medicare card or a state senior citizen identification card.

NORTHCO
Serv-O-Matic
Dairy Feeder
TWO MODELS AVAILABLE

The Model 101 Serv-O-Matic may be mounted through the wall in a loose housing system or through the fence line for open lots. Side braces are also provided for mounting and installation.

The feeder opening is designed to permit only one cow to eat at a time. A 2 inch auger drops approximately 1 lb. of concentrate per minute into the feeder ... this is the same rate the cow eats ... no feed remains in the feeder when she moves away.

A simple magnet around the cow's neck will activate the feeder meter as she places her head into the feeder. Cows without a magnet are unable to get feed.

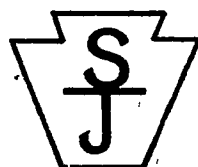

"Selectively" Provides More Feed to Top Producers

The Serv-O-Matic Dairy Feeder enables you to feed additional grain and concentrates only to the top producing cows in your herd! It eliminates the labor problem of separating the herd in a loose housing system to give individual attention to top producing animals.

The Serv-O-Matic is activated by a simple magnet fastened around the cow's neck. This way, only the cows you select can activate the feeder and receive additional ration ... yet all animals can still be housed together.

Each cow producing 10 lb. or more over the herd average should receive extra feed. In actual trials, cows on the Serv-O-Matic consume an extra 10 lbs. of grain per day (while eating some less in the parlor). Milk output shows an average increase of 1 lb. of milk for each pound of concentrate fed through the Serv-O-Matic ... some as high as 5 lbs. of milk per pound of feed!

One Serv-O-Matic will normally handle 20-30 cows in an 80-120 cow herd. Normal procedure is to put fresh cows on extra ration and remove the magnet when production drops to a predetermined level.

'Slave auction' planned

EPHRATA - The Cloister FFA Chapter and Ephrata Area Young Farmers will conduct a "slave auction" and volleyball tournament on April 27 beginning at 7:30 p.m. at the high school, here.

All EAYFA members and other interested bidders are encouraged to attend, advisor Charles Ackley announced. According to the sale bill there are 20 FFA member slaves. "They are skilled workers in their prime," Ackley noted, "and will work for the bidder at least eight hours at the bid price per hour."

In addition, LANCASTER FARMING's editor, Dieter Krieg, has volunteered to work on a dairy farm for a day and will be auctioned off along with the FFA slaves. Krieg was employed on a farm full-time until two years ago. Proceeds go into

the FFA treasury to purchase chain animals for members and conduct various community service projects carried out by the Chapter.

"The success of the sale depends on the attendance of bidders. Good farm help can be obtained for use in the Ephrata-Denver area for a fair price," says Ackley. Arrangements for what days slaves will be available are to be made by each slave and his buyer. The deadline for such arrangements is prior to the last day of school.

Preceding the slave auction, which begins at 9 p.m., is the volleyball tournament which pits the EAYFA against FFA slaves. Refreshments will be available. Checks for slaves should be made available to Cloister FFA Chapter when he or she performs the work.

Host homes needed for fresh-air kids

New York City was not built for children, and not many areas are adapted for a normal childhood. City children have enough problems, now with the city budget cut, children will suffer even more. Summer camps are closed; neighborhood recreation programs are discontinued; summer schools are closed; etc., etc., etc. Adding all these together means that literally thousands of children will be left with no summer activity. They will be in the streets unless someone finds a better way. Children need to go outdoors to play without danger and fear; they need to have exposure to a different way of life. The Fresh Air Fund's Friendly Town experience broadens their horizons and gives them a motivation they would have never known otherwise.

We need to find several hundred more host families in Lancaster County who will

be willing to give two weeks of summer to a child. If you are interested and able to host a child, write your name, address and telephone number on a card and send it to: Mrs. John M. Buckwalter Ronks, Pa. 17572. I will then have the committee worker near you, contact you with further information.

If you are unable to host a child but would like to contribute in another way, send a donation to the Fresh Air Fund Friendly Town Department, 300 West 43rd Street, New York, N.Y., 10036.

Food Production

Approximately 98 per cent of all human food is produced by agriculture, including horticulture. The remaining two per cent comes from the oceans. In tonnage terms, the world produces close to 400 million tons of milk, 84 million tons of meat (including poultry) and something like 17 million tons of eggs. Coffee output runs around 4 million tons and wine near 29 million tons.

Planting intentions told

HARRISBURG - Based on April 1 planting intentions received by the Crop Reporting Service, Pennsylvania farmers plan to devote more acreage to corn and hay for 1976 than in 1975, but less to oats, barley and soybeans.

Reports also indicate that tobacco and potato acreage may remain unchanged.

A breakdown of intended 1976 plantings in Pennsylvania and changes from 1975 is:

Corn 1,600,000 acres, up three per cent; all hay, 1,990,000 acres, up one per cent; oats, 390,000 acres, down four per cent; barley, 165,000 acres, down three per cent; soybeans, 43,000 acres, down four per cent; tobacco, 12,500 acres, no change; potatoes, 31,000 acres, no change.

For the United States, the breakdown of intended 1976 acreages and changes from 1975 is:

Corn, 82.7 million acres, up six per cent; all hay, 62.6 million acres, up one per cent; oats, 16.8 million acres, down four per cent; barley, 912 million acres, down three per cent; soybeans, 49.3

million acres, down ten percent; tobacco, 1,009,270 acres, down seven percent; potatoes, 1,117,200 acres, up four per cent; and spring wheat, 16.4 million acres, up 17 per cent.

The 1976 winter wheat crops in five key states were plagued by dry and windy weather during and after

seeding last fall. Based on a special survey of April 1 conditions, winter wheat and production in Colorado, Kansas, New Mexico, Oklahoma and Texas is forecast at 522 million bushels, down eight percent from the December 1 forecast and 26 percent below the 1975 output.

CONSUMER GUIDELINES

Add longer life to shower curtains and liners by laundering them before water spots, scum and mildew build up and become difficult to remove. Launder and dry fabric ensembles

according to fabric types. Plastic items may be machine washed in warm water and for a short time — about four minutes. Dry plastics in a dryer, using 'air' setting only.

High Price

Ad in a newspaper read "\$1,000 reward for the return of my wife's black cat." "Isn't that a high price for a cat," the caller asked. "Not for this one," the man said, "I took it fishing with me yesterday and drowned it."

Whatever
A tourist driving along a country road one Sunday morning stopped to ask directions from a farmer sitting on a fence. "I just don't see how people stand living in the country," the motorist said. "There's nothing to see and nothing to do." The

farmer replied, "I really don't see any difference in what I'm doing and what you're doing. I sit here on the fence and watch the cars go by while you sit in your car and watch the fences go by. It's all in how you look at things."

Bicentennial farm

(Continued from Page 72)

dependable that it was marked on maps; a creamery on the edge of it until the early 1900's; and neighbors lived in on it.

Buchanan (Mary's husband) signed a contract with a Smith in 1850 which allowed Smith access to his land for a term of 99 years. Furthermore, the agreement, at cost Smith \$500 initially and one dollar per year for the year of its use, was renewable "forever." The deal was terminated in 1932 when the Smith family moved.

Agedy struck the Ecklin farm on May 8, 1923 when a severe electrical storm passed through Lancaster County. Describing the bolt of lightning as having been no louder than a revolver shot, Ecklin recalls how hectic and frustrating it was to try and save animals and equipment from the blazing fire. "The animals wanted to go back in as fast as we took them out," he said. Five cows, a horse, colt, and a few hens perished along with 14 tons of hay, some corn and the machinery. Total loss was estimated at \$8000 in a few days.

Ecklin still remembers the name of the man who sold him the lightning rods which had just been installed on the farm that Spring. The equipment had been guaranteed, but

Quarantine lifted

State and federal hog quarantine were lifted from Burlington County, N.J., officials of the Department of Agriculture's Animal and Plant Health Inspection Service have announced. The counties - Gloucester, Camden in southern Jersey, as well as parts

of Massachusetts and all of Rhode Island, still remain under quarantine for hog cholera. Under such quarantines, swine may move to slaughter only under a permit from state or federal animal health officials.

Nine infected and 12 exposed herds - about 16,000 hogs - have been destroyed in New Jersey to prevent further spread of the disease. Similar action has been taken in Massachusetts and Rhode Island.

Part of the Ecklin home may have been built shortly after this country became a sovereign nation. It's not known for sure but the architecture is similar to that of other homes in the area which

the salesman "left the country" the farmer said without a trace of a smile on his face. His expression changed as he continued the story.

The family set up a sawmill below the house and began cutting logs. Neighbors donated some of their lumber and time. At one point 150 people were there and the new barn was put up in one day's time. "By golly they were really good to us," Ecklin announced in an appreciative tone.

Without question, the Ecklins cherish their background and take an active interest today in preserving what they have. But that wasn't always so. It has come about with age.

"My mother used to save all kinds of stuff . . . she saved everything," Ecklin announced, "and, boy, now I'm glad she did!" Old letters, among other things, have become dear to them because of what they reveal about their ancestors.

have dates inscribed on their walls. An unfailing spring near the house was a major reason for this site having been chosen for the homestead which was originally deeded to white men in 1739.

Several letters from the 19th Century, for instance, mention outbreaks of the flu which took as many as three people from one family. James' son, Joseph, was among the victims one year.

Some old papers tell of prices: rye 55 cents per bushel, oats 30 cents, and old corn 50 cents. Ecklin recalled when tobacco sold for three cents a pound in the early 1900's, and Mrs. Ecklin distinctly remembers her father having been "so proud" over having received \$3.00 per bushel for wheat during World War I.

Sitting on their front porch to chat about times which have long since been carried away by the breezes of the four seasons, Mrs. Ecklin remarked: "If I had to live my life over again, I'd keep a lot of things . . . will there be any antiques in 50 years? . . . young people today don't save anything."

TURN YOUR PICKUP INTO A . . .

DUMP TRUCK!

Now with a JET HOIST electric/hydraulic offloader accessory, you can unload your pickup truck fast . . . easy! Just press a button. JET HOIST tilts your pickup box and offloads more than 2 tons in just 75 seconds! Saves time, money and horsepower. Pays for itself in the savings. Contractors, farmers, nurserymen, maintenance people - all who haul dirt, sand, feed, construction materials or other loads - say they couldn't be without JET HOIST.

Installs readily on 1/2-, 3/4- and 1-ton pickups with no change in body lines. Let your pickup do the work. SEE A DEMONSTRATION AND GET YOUR JET HOIST RIGHT AWAY. Contact . . .

March 1976

A registered Holstein cow owned by J. Mowrey Frey, 1831 Hans Herr Drive, Lancaster, completed the highest 305 day lactation. Dottie produced 19,064 lbs. of milk, 974 lbs. of butterfat with a 5.1 percent test. Second high lactation was completed by a registered Holstein cow owned by J. Mowrey Frey Jr., 401 Beaver Valley Pike, Lancaster. Marsha produced 19,761 lbs. of milk, 878 lbs. of butterfat with a 4.4 percent test.

The herd of Ben K. Stoltzfus, R1, Gordonville, had the highest daily butterfat average. This herd of 34 registered and grade Holstein cows averaged 64.3 lbs. of milk, 2.31 lbs. of butterfat with a 3.6 percent test. The herd of Robert L. Shelly, R4, Manheim, placed second. This herd of 32.6

registered and grade Holstein cows averaged 51.7 lbs. of milk, 2.14 lbs. of butterfat with a 4.1 percent test.

Facts for dairymen

By Alan Bair

Assoc. County Agent
Lancaster, Pa.

Bigger vs. Better

Given the choice of milking 39 cows or 76 cows and having the same return over feed cost, most "normal" dairymen would choose the 39 cows. Apparently we have a lot of dairymen that are not "normal"! We have too many low producing cows and low producing herds to claim that everyone is doing the best possible job.

Our DHIA records show that 39 cows producing an average of 16,000 pounds of milk yearly can net the same income after feed costs as 76 cows producing 9,900 pounds per year. If this sounds too extreme for you consider this: 47 cows producing at a 13,700 pound level and 63 cows at a level of 11,000 pounds return the same income over feed costs. Cows producing at lower levels

require so much additional labor to take care of the added numbers that this level of production is not profitable.

You know and I know that the records listed elsewhere in this newspaper are not all the production records of all cows in this area. There are too many low producing cows being kept on your farm, well, at least if not on your farm, on your neighbor's farm. You must keep records and use them. It's the only way you can cull the unprofitable ones.

If you are considering sources of more income, carefully study the levels of production and ways to improve it before deciding to increase the number of any animals in the herd. Adopt the motto of "Better Before Bigger." It's not only more profitable but also a lot less work!

AAtrex® 4L offers you added convenience

The same smooth, pourable, easy to handle AAtrex but in a more convenient, easier to handle 2½ gallon jug

This new jug does two things. It gives you fewer jugs to handle than the 1 gallon size. And it's only half the weight of the 5 gallon jug, obviously. Not so obvious is the fact it empties in 13 seconds and it's completely burnable, for easy disposal.

AAtrex 4L For weed and grass control you can count on. Won't hurt corn; just the weeds. Shouldn't AAtrex 4L be your herbicide of choice?

AAtrex® trademark of CIBA-GEIGY for atrazine

MUELLER FRE-HEATER™

EXPLANATION OF THE REVOLUTIONARY NEW MUELLER "FRE-HEATER™" FOR THE DAIRY FARM

Bulk milk coolers on modern dairy farms remove heat from the milk promptly after it is produced. To accomplish this requires refrigeration machines and they are generally of the air-cooled type. Air-cooled condensing units literally "throw away" this valuable heat.

On these same farms, large amounts of hot water are needed for "prepping" the cows, washing the milk cooler, the pipeline milker, other equipment, and the milking parlor itself. It is also advantageous to heat the cows' drinking water in winter.

The Mueller Fre-Heater conserves energy and provides "free" hot water by capturing the heat now wasted!

HERE'S HOW IT WORKS:

Rather than using noisy, dust-creating fans with fragile, dirt collecting air-cooled condensers, the refrigerant is routed to a specially designed condenser/heat exchanger and its heat is transferred to the water.

A thermostatically controlled valve delivers 145° F water to the storage tank.

In addition to the thermostatic valve, a mixing valve is provided to permit "prepping" temperature water.

Thus, the Fre-Heater delivers two temperatures of water — prepping and washing.

Tests indicate the Fre-Heater consumes 10% less power than an air-cooled system . . . and you get Free Hot Water!

ELIMINATES REFRIGERATION SERVICE PROBLEMS!

The most common causes of slow cooling in bulk milk cooling systems are related to the air-cooled condenser.

Three things which frequently reduce the efficiency are:

1. Poor air circulation and recirculation
2. Fan motor failures
3. Dirty or clogged condenser fins

Air-cooled condensing units are generally installed out of doors in order to assure adequate air supply to the condenser. This exposes the compressor to extreme ambient temperatures. Starting problems and compressor failures have resulted and air-cooled condenser units are always noisy.

The Fre-Heater eliminates these problems because:

- There is no air-cooled condenser.
- The Fre-Heater is installed indoors.
- There are no fans to generate noise.
- The head pressure is very stable — assuring longer compressor life.
- There are no cold weather starting problems, plus . . . the Fre-Heater conserves energy and produces Free Hot Water!

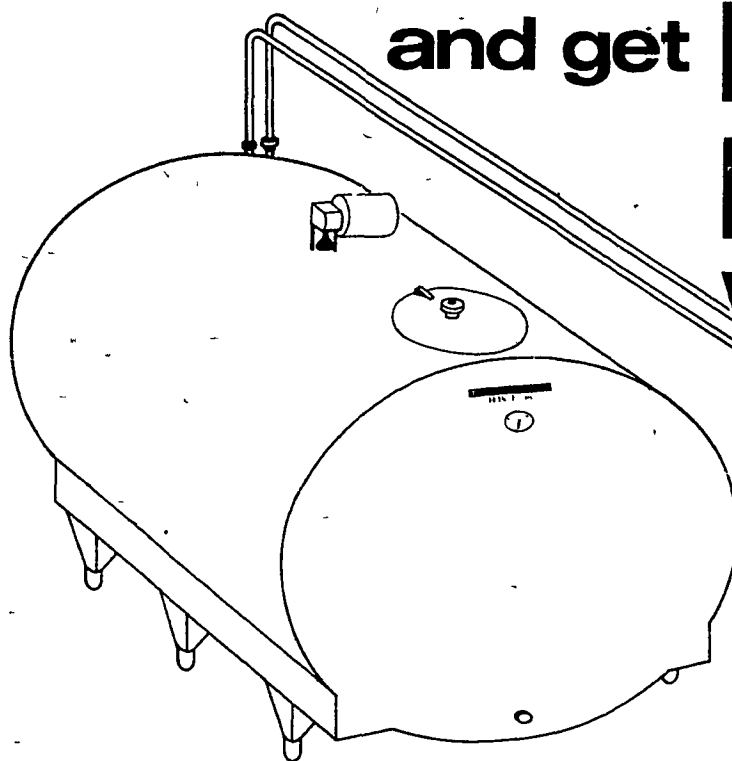

HOW MUCH HOT WATER CAN BE GENERATED?

There are many variables, so this question cannot be answered directly; however, a rule of thumb is that a Fre-Heater operating on 60° F. well water will produce a volume of 145° F. water similar to the amount of milk produced during a milking. In other words, if 100 gallons of milk per milking is produced, approximately 100 gallons of hot water (145° F.) will be generated during each milking.

Save Energy

and get

FREE HOT WATER..

WHAT SIZES ARE AVAILABLE?

MUELLER HIPERFORM™ BULK MILK COOLER

2, 3 and 4 H.P. units are available for either HiPerForm or conventional refrigeration systems

The 2 H.P. unit normally requires a 120 U.S. gallon water storage tank and the 3 and 4 H.P. size each normally require two 120 gallon water storage tanks. (See typical installation diagrams on back)

The Mueller "Fre-Heater" can be used with either the Mueller HiPerForm Bulk Milk Cooler or with a conventional bulk milk cooler.

WEIGH THE DIFFERENCE

Zero MILKING SYSTEM OFFERS AGAINST ?

Dairymen! LET US CHECK YOUR MILKING MACHINE'S PERFORMANCE

WITH OUR
DETCO
GRAPH MACHINE

NO CHARGE! NO OBLIGATION!

If you have a problem of teat and udder erosion in your herd chances are you are milking with unstable vacuum. And, as more and more animal health authorities have been agreeing that mastitis and udder injuries—which have contributed to the spread of mastitis—have been caused by unstable milking vacuum... you should have your milking machine's performance checked.

We'll be happy to do this for you with our DETCO Graph Machine. It's a remarkable, new invention that records vacuum readings the milker units attached to the teats, recording the milking vacuum and pulsating vacuum simultaneously. And tells you in easy to understand graph form, as shown in the photo above, if you are milking with unstable vacuum at the teat end.

Increasing the size of your vacuum pump and the size of your milk lines are good recommendations. But if you still do not have stable vacuum at the teat ends—investigate our ZERO CONCORD Twin-Vacuum Pipeline Milking System. It's a combination of revolutionary pipeline milking machine and the ZERO Complete Automated Vacuum Bulk Milk Cooler. It was designed especially to milk with stable vacuum at the teat ends to prevent teat and udder injuries caused by milking with unstable vacuum. And has many other advantages.

Marv Miller has seen his ideas become law.

Too bad there's not two of him, because we hate to lose Marv Miller in Harrisburg, where he set a record for good government, but we desperately need a man of his caliber in Washington.

He took the people's business out of the smoke-filled rooms

The Sunshine Law (Act 175 of 1974) introduced by Marv, opened the doors of local and state government meetings to the public and the press.

He restored voluntary prayer in the public schools

Act 305 of 1972, introduced by Marv Miller, permits voluntary prayer and release-time Bible study by public school students.

His concern helped combat drug abuse in Pennsylvania

In 1972, Marv served on a Select House Committee that revised Pennsylvania's drug laws to permit harsh sentences on pushers.

He fought for equal pay for injured workers

Marv Miller sponsored the bill that grants equitable disability compensation to Pennsylvania's industrially crippled.

He works to rebuild public faith in government

In 1974, Marv Miller proposed immediate expulsion of any member of the Pennsylvania House or Senate who is convicted of a major crime such as bribery, embezzlement or extortion.

Farmland assessment was an idea he proposed

The original House bill to assess farmland at actual use value was sponsored by Marv.

He voted to remove chiselers from the relief rolls

In 1974, Marv voted to close loopholes in the state's assistance laws.

Marvin E. Miller for Congress

SEND MARV TO WASHINGTON— PULL REPUBLICAN LEVER 6F. (LEBANON 16-B)

Paid for by the G.O.P. Campaign Committee for Marvin E. Miller, John E. Dianastasis, Chairman, Wilbur B. Miller, Treasurer.

WHITE WASHING with DAIRY WHITE

- DRIES WHITE
- DOES NOT RUB OFF EASILY
- NO WET FLOORS
- IS COMPATIBLE WITH DISINFECTANT AND FLY SPRAYS
- WASHES OFF WINDOWS & PIPELINES EASILY.

**Also Barn Cleaning Service
Available With Compressed Air**

To have your barn cleaned with air it will clean off dust, cob webs & lot of the old lime. This will keep your barn looking cleaner & whiter longer. We white washed 600 barns last year, so if your barn needs white washing for better service have it done early.

**High-Pressure Washing
In Dairy Barns.**

Barn spraying our business, not a sideline.
Spraying Since 1961

SPERRY NEW HOLLAND '770' FORAGE HARVESTER.

A standout performer in any crop!

The Sperry New Holland exclusive 12-knife cutterhead is coupled with a P.T.O. driven power sharpener to keep these knives razor-sharp.

- Gives you chopping ability, capacity and horsepower efficiency!
- Reduces field loss by picking up the short, fine-stem haylage many ordinary pickups miss!
- Tine tips are curved forward to pick up crops more gently!
- Flotation tires reduce soil compaction and increase maneuverability of soft ground!

Choose between two Super-Sweep windrow pickups - 56" or 66" wide

Three months ago, few people had ever heard of Darwin Boyd. Today, a lot of people think he should be our next Congressman.

In a very short time, Darwin Boyd has gained the respect and support of thousands of people all over the 16th Congressional District. He has been shaking hands, meeting people individually and in groups, sharing his convictions about America and America's political process.

He has personally carried his message from factory floors to corporate boardrooms, from farmers' fields to city streets. He has been campaigning long days and long nights since February 12th; the day he resigned his staff position in Harrisburg to devote full-time to taking his message to the voters of the district.

He believes in the American political system. Torn and battered though it may sometimes appear, he believes it is still the best political system in the world. But to make it work, people must work. Especially people in government.

After he is elected, Darwin will work just as hard on the job as he did to earn the right to represent you in Congress.

What kind of Congressman will Darwin Boyd be? Certainly, he will work hard. Everything about him - the way he was brought up, the way he has lived and actually challenged life, his youth, his energy, enthusiasm, vigor and health - all proclaim a willingness to work, an eagerness to work, a tremendous capacity for work.

As your Congressman, Darwin Boyd has promised to work for you - to the very limit of his capacities. He has promised to uphold the high private and public moral standards you have a right to expect from your elected officials. He has promised to serve you with enthusiasm and vigor. He has promised accessibility, integrity and candor.

These are all promises he can and will keep. They are promises to each and every one of us here in the 16th

Congressional District. They are not promises to political factions or pressure groups. Although he has led a life of public service for the past decade, Darwin Boyd has remained free of entanglements with special interest groups, in and out of politics.

Darwin Boyd is the kind of man we need in Washington. If you've met him, you already know that. If you haven't met him, we hope you'll take the time to read here about his work and accomplishments. It's a lot of reading. Because, although he's a young man, there's a lot to say about Darwin Boyd. He's accomplished a great deal.

As your Congressman, he will accomplish even more. For the country. For mankind. For you.

We hope you'll vote for Darwin Boyd in the Republican primary, Tuesday, April 27.

Boyd for Congress Committee John R. Gibbel, Chairman

HONORS

1974 - Citation by the Pennsylvania House of Representatives for "... outstanding leadership, dedication and expertise as an administrator and researcher as Executive Director of the House Committee on Health and Welfare ..."

1972 - Selected to appear in the 1972 edition of Outstanding Young Men of America.

1972 - Citation by the Pennsylvania House of Representatives for receiving the National Medal - Order of Civil Merit - from the Government of the Republic of Korea.

1972 - Citation from the Korean Minister of Agriculture and Forestry; Medal and Citation from the Korean Administrator of the Office of Rural Development; and Citations of Appreciation from the Governors of six of the nine provinces in the Republic of Korea.

1971 - Youngest person ever to receive the National Medal - Order of Civil Merit, and Citation, Republic of Korea. For "... great achievement and meritorious service rendered in promoting the nation's welfare by devoting yourself to the social development of our country."

1970 - Letter of Appreciation and Plaque of Appreciation from the Korean Minister of Agriculture and Forestry.

1967 - Letter of Appreciation from the Korean Administrator of the Office of Rural Development.

1964 - Recipient of the 1964 Walter Riggin Award based upon four continuous years of outstanding citizenship, scholarship and athletic accomplishments at Delaware Valley College.

1964 - Recipient of the Joel Hillman Award for bringing the most favorable recognition to Delaware Valley College during the academic year 1963-64.

EXPERIENCE

1975/76 - Associate Legislative Research Analyst for the Minority Caucus, Pennsylvania House of Representatives. Major efforts continued to achieve welfare reform in the Commonwealth. Research also conducted on many other issues and projects.

1973/74 - Executive Director, Committee on Health and Welfare, Pennsylvania House of Representatives. Responsible for research, legislative analysis and program evaluation aimed primarily at reforming the welfare system in Pennsylvania.

1966/72 - 4-H Program Director, the American-Korean Foundation, Inc.: Responsible for the development of the rural youth program in the Republic of Korea. Administered a \$535,000 vocational and leadership training program.

1966/72 - Used vacation, and leave time while working in Korea to travel widely. Visited 27 countries in Asia, Africa, the Middle East and Europe.

EDUCATION

1965/66 - Pennsylvania State University, University Park, Pennsylvania. Master of Public Administration degree - 1966.

1964 - Grassroots Ambassador of Friendship and Goodwill to the Republic of Korea in the International Farm Youth Exchange Program. (June to November)

1960/64 - Delaware Valley College of Science and Agriculture, Doylestown, Pennsylvania. B.S. - 1964. Completely financed undergraduate work with proceeds from 4-H Club projects.

1960/64 - President of the college student body in senior year; vice-president in junior year. Class president as a freshman, sophomore and junior.

No time wasted

In speaking at the L G M Club in Coatesville on Wednesday, Republican congressional candidate Donald Krank announced that he did not plan to attend Candidate Night in Cochranville for the simple reason that he had not been invited. "Organizer Henrietta Hazel indicated she had not wanted to waste money on long distance phone calls inviting everyone - although she did manage to phone the candidate she supports - long distance," Krank charged. "Well, Henrietta, I'm not going to waste something even more valuable on that type of candidate night - my time. The people of this district are smarter than you think and realize that for too long there's been a little club that considers itself the whole Republican Party," he says.

BE THE JUDGE

ABS PROFESSIONAL TECHNICIAN SERVICE

Maurice Stump is the A.B.S. representative in Southern Chester County, lower Lancaster County, Northern Delaware State, and the North-Eastern Shore of Maryland. Mr. Stump has been with A.B.S. since May 31, 1960 when he bred his first cow. Since 1960 through 1975, Maurice has inseminated or sold semen that has led to the insemination of approximately 6000 cows a year. He regularly services 82 direct herd refrigerators and sells semen to over 160 different farmers. He actively promotes the total A.B.S. programs including herds in both Genetic Mating Service and the Associated Herd Program. Maurice and his wife May have four children and reside at 304 Little Avenue, West Grove, PA.

N.J. youths given awards

The Hunterdon County Pomona Grange No. 3 met April 10 at the Kingwood Grange for Youth Night. Master Thomas K. Pierrman from Ringoes presented Certificates of Merit to outstanding 4-H members in the County.

Receiving certificates were: Debbie Coleman of Stockton, member of the Mt. Airy 4-H Dairy Club and the Cloverettes Twirling Club, Chris Endris of Flemington, member of the Lucky 4-H Community Club, Jennifer Fisher of Flemington, member of the Tally-Ho 4-H Club, Nancy Goedeke of Flemington, member of the 4-H Sheep Club, and Sew What 4-H Club, Linda Jakubco of Flemington, member of Lucky 4-H Community Club and Hunterdon County Seeing Eye Club, Julie Lewis of Clinton Township, member of Round Valley Riders, Barbara Metch of Flemington, member of 4-H Beef Club, and Karen Salasko of Clinton Township, member of the Round Valley Riders.

Also receiving Certificates of Merit were Barbara Simpson of Ringoes, member of Lucky 4-H Community Club, Diane Soltys of Franklin Township, member of Cherryville Homemakers, and Diane Wenczel of Franklin Township, member of Cherryville Homemakers. Not present to receive their awards were Elfie Wegner of Spruce Run Gardening Club and Mothers Helpers, and Joyce Marriott of Tally-Ho Horse Club.

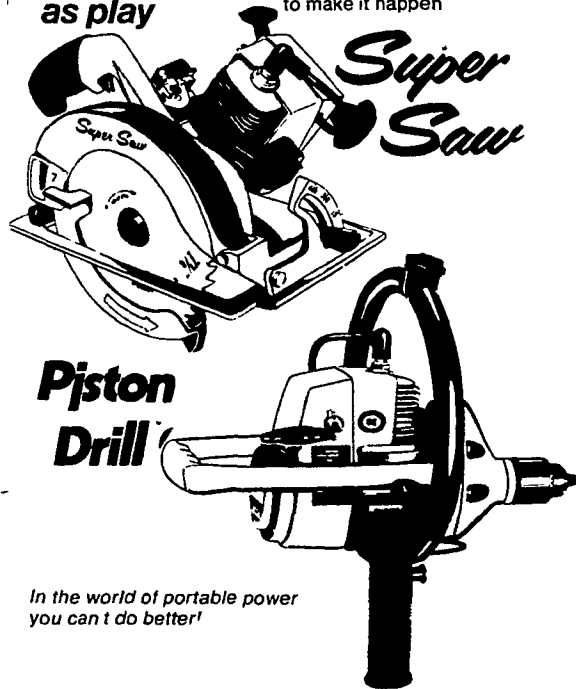

The David Agans Memorial Plaque, awarded to the top 4-Her in Hunterdon County was presented to LouAnn Miller of Franklin Township, member of the Milford 4-H Dairy Club and Cherryville Homemakers. Lou Ann will begin college next fall in the Home Economics program.

Miss Jo-An Van Doren of Flemington, teacher at North Hunterdon High School, was presented the 1975 Alumni medal by Mrs. Brenda S. Hillard, associate 4-H agent. Miss Van Doren was honored for her years of service in the 4-H program.

Congressional candidates introduced

Norman Aamodt

Norman Aamodt

Norman O. Aamodt, Coatesville, 48, is owner and manager of a farm in Chester County, where he has developed direct sale of package beef by air and home delivery.

He formerly was a research engineer at the Bell Telephone Laboratories of Murray Hill, N.J., and market development manager of Avisun Corp., Marcus Hook, Pa. He is an expert in wire and cable technology and serves as a consultant.

He graduated with honors from Stevens Institute of Technology. He was an Eagle Scout, and served as a Scoutmaster and as a volunteer fireman. He also served in the U.S. Army.

He is an elder in the Unionville Presbyterian Church, where he teaches senior high students. He was vice-president of the Young

Republicans of Somerset County, N.J.

He is a member of the Society of Plastics Engineers, American Assoc. and Pennsylvania Angus Assoc., and the state and national Farmer's Associations.

He is married and has three children.

Al Baxter

Al Baxter

Alonzo B. Baxter, Jr., of Coatesville, 34, is Director of County Affairs and Research for Chester County, dealing with minority problems of both black and Spanish-speaking people. He is also director of Operation Mainstreams, working with the disadvantaged people.

He formerly was a supervisor trainee with Lukens Steel and worked for the State Human Relations Commission for two years. He is a member of the Pa.

Real Estate Salesmen, president of the Advisory Board of Delaware Valley Regional Planning Commission, and a member of the Interracial Faith Council, Coatesville. He served on zoning and housing commissions, the borough council, and the Community Action Board in Coatesville.

He is a graduate of Coatesville High School and Lincoln University, with a degree in biology, and has done graduate work at several universities. He attended Indiantown Gap Training School and was a first lieutenant in the Army Reserves from 1964-1971.

He is married and has two children.

Darvin Boyd

Darvin Boyd

Darvin E. Boyd, Akron, 34, is associate legislative research analyst for the GOP in the state House of Representatives.

In 1973-74 he was executive

Director of the Committee on Health & Welfare, Pa. House of Representatives, responsible for research, legislative analysis and program evaluation aimed primarily at reforming the welfare system in the state.

He is a native of Lititz and a graduate of Delaware Valley College of Science and Agriculture, class of 1964, with his four years of college financed by his 4-H projects. He received his master's degree in public administration from Penn State in 1966.

From June to November, 1964 he served as a Grassroots Ambassador in Korea with the International Farm Youth Exchange Program.

For six years, beginning in 1966, he was 4-H Program Director in Korea, to develop rural areas. He was named among Outstanding Young Men of America in 1972 and was the youngest

person to receive the Korean Order of Civil Merit.

He is a member of the Lititz Church of the Brethren. He is a council member of the Central Pennsylvania American Society of Public Administration, a member of the American Academy of Political and Social Science, and Ephrata Lodge 665,

F&AM. He is married and has one son.

Bill Drury

Bill Drury

Rev. William A. Drury, Lancaster, 49, is president and director of Christian Youth Services, Inc., and founder and director of Teen Haven Ministries, which has centers in Buffalo, N.Y., Washington, D.C., Philadelphia, and Lancaster, and which accepts no federal funding.

He formerly was executive

director of Youtharama in Philadelphia from 1956-63, and worked for and traveled extensively for Diebold, Inc. in their microfilm division.

He attended Shelton College and Temple University, and served in the 8th Infantry in Europe during World War II.

In 1962 he attended the 8th World Festival of Communist Youth in Helsinki, Finland for the purpose of presenting the Gospel to 18,000 Communists from 139 nations.

He was named Philadelphia Man of the Year in 1967 by the Kiwanis Club, was a National Volunteer Awards recipient in 1971, received a Citation of Achievement from WSBA Radio, a Freedom Foundation Award, was cited by the Church Women of America, and received commendations from Senators Richard Schweiker and Hugh Scott, Governor Milton Shapp, Congressman Ed Eshleman and Mayor Thomas Monaghan.

He is married and has four children.

POLITICAL ADVERTISEMENT

Paid for by the Committee to Elect Loht
Donald F. Krank, Chairman
W. Craig Boyd, Treasurer

Donald Krank

Donald Krank

Donald F. Krank, Lancaster, 37, is a partner in Krank, Gross and Casper, attorneys at law.

He is a graduate of the University of San Francisco and received his law degree from Georgetown University.

He formerly was assistant sales manager for Norcross Greeting Cards and tariff officer for Western Pacific Railroad before entering the U.S. Navy. In the Navy he served as a lieutenant and lieutenant commander, with service in the Orient and Antarctic.

He has served on a special study group for the Secretary of Defence in

Washington, the legal staff of Armstrong Cork Co., and as corporate counsel and secretary of AC&S Corp.

He is married and has one daughter.

Al Lewis

Al Lewis

Alvin B. Lewis, Jr., Lebanon, 43, is a practicing attorney and was the youngest district attorney elected in the history of Lebanon County, a position he held for eight years, including election as youngest president of the Pennsylvania District Attorneys.

He graduated from Lehigh University, where he won the Dean's Service Award as outstanding graduating senior, and received his law degree from Dickinson Law School, where he was president of the student body.

He was appointed by Governor Shafer as chairman of the Pennsylvania Crime Commission, South-central Council, a post continued by Governor Shapp. He later was honored by the governor, attorney general, and chief justice of the Pennsylvania Supreme Court for efforts to improve criminal justice.

He is a director of the Council of Crime and now serves on a statewide

committee to revise criminal justice standards. He also is active on the Lebanon County Republican Committee, and was county finance chairman for four years.

He was a leader in numerous charitable and civic drives in his community and was nominated by the Jaycees there as one of the Outstanding Young Men in America.

He is married and has three children.

YOUR DOLLAR GOES FURTHER...

KUBOTA TRACTORS

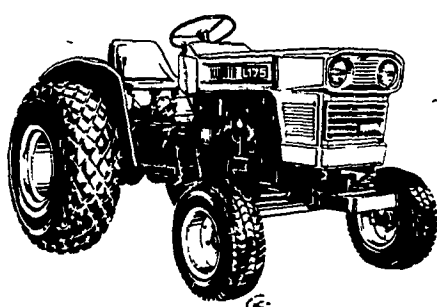

L225

A triumph of tractor engineering. A new and different breed of tractor to fill your work gap. It's a versatile tractor with a powerful 24HP water-cooled diesel engine.

- Quieter 3-cylinder, perfectly balanced engine.
- 8 forward, 2 reverse and 2 PTO speeds (rear).
- Category 1, 3-point hitch with stabilizer.

**Time Tested,
Dependable,
Versatile
and
Economical**

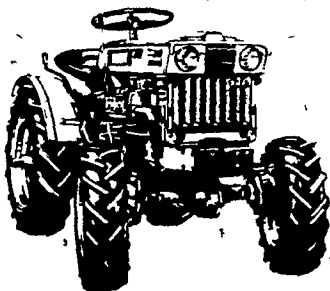

L175

The tough, little tractor that doesn't act its size. For people who want more than a garden tractor. A scaled-down model of big tractors with big tractor features. Powered by a 17 HP water-cooled diesel engine.

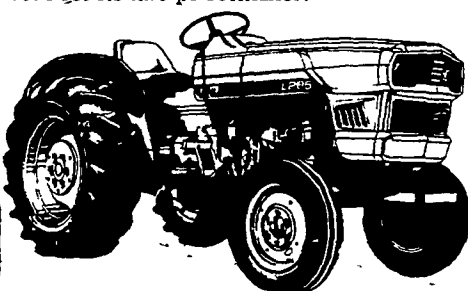

- 10 speeds, 8 forward and 2 reverse.
- Category 1, 3-point hitch with stabilizer.
- Hydraulic system easily lifts up to 1,350 lbs.

B 6000(4 wheel drive)

The little tractor that's big on work. Perfect for less than full scale farm work. A complete 12.5HP, water-cooled, 2-cylinder diesel tractor, the B6000 is built to work hard economically and efficiently.

Come in for a free demonstration
Kubota gives you
one thing more... service!

L285

The one compact with power and pull to spare. For versatility and ease of use this power-packed 30HP compact is hard to beat. Perfect balance, exclusive spherical combustion chamber and high grade filters are some reasons for its fine performance.

Department of Navy and Department of Defense, and is presently vice-president of Navy Reserve Affairs Assoc.

He is listed in Who's Who in Commerce and Industry, Who's Who in Finance and Industry, and in the National Sales Executive Speakers Roster as an authority on marketing. He has spoken in 49 states on sales, inspirational, and Naval subjects during the past 25 years.

He has been a basketball official for 29 years.

Since 1962 he has received 12 awards from the American Cancer Society, Lancaster American Business Club, American Legion, Sertoma Clubs, Republican County Committee, Lancaster Elks, and Fraternal Order of Police.

He has been a member of the vestry at Trinity Lutheran Church for six years.

Marvin Miller

Marvin Miller

Marvin E. Miller, Sr., Manheim Township, Lancaster, 48, is serving his 10th year as Representative for the 97th Legislative District and was the original sponsor of the state's Sunshine Law.

He was prime mover for House rules change to require the public be admitted to House Committee meetings.

He was sponsor of a Constitutional amendment giving Pennsylvanians a right to clean air and pure water, sponsor of a bill requiring training for local policemen, sponsor of legislation banning sale of flammable dolls and toys, sponsor of legislation requiring that merchandise mailed to persons without being ordered be considered a gift.

He is a member of the Select House Committee to give stiffer sentences to drug pushers.

He was born in Warwick Township and graduated from Lititz High School. He served in the U.S. Marine Corps in 1945.

He was sports editor and assistant city editor of the Lancaster Intelligencer Journal for 12 years, and a political reporter and assistant city editor for the Lancaster New Era for six years. He was editor of the Lititz Record Express for two years. He was winner of six statewide prizes for better writing and investigative reporting, and cited by the Pulitzer Prize Committee in 1965.

He was recipient of the Sertoma's "Freedom in American Way Award."

He is a member of Lititz Moravian Church, Lancaster Sportswriters and Broadcasters Assn., Lancaster County Firemen's Assn., Solanco Farmers - Sportsmen's Assn., and Slumbering Groundhog Lodge, Quarryville.

Richard Mohler

Richard L. Mohler, Ephrata, 43, has spent the past 17 years as a federal executive and federal career employee.

He has held many managerial posts such as program operations manager of U.S. Information, an agency mainly in the field of motion picture and television service, including all phases of planning operations, audiovisual production, analysis,

budgeting and administration.

He helped produce U.S. government films on Apollo flights and was budget analyst of Voice of America. He also was a senior foreign service officer with travel in

Richard Mohler

40 countries and five continents.

He is a sustaining member of the National Republican Party, a member of the American Legion in Washington, and the Pennsylvania Society of Washington, D.C.

He is a graduate of the University of Miami and the Federal Executive Institute, Charlottesville, Va., and attended federal seminars conducted by the government in Washington. Locally, he held jobs with WGSA radio and Weaver's Pattern Works before entering government training.

He is married and has two daughters.

Richard Scott

Richard M. Scott, Lancaster, 57, is mayor of the city of Lancaster. He is retired from the U.S. Air Force with the rank of brigadier general. Before running for mayor he was

This new formulation is now being produced by us as a high grade row fertilizer for corn. This analysis is very high in phosphorus, low in nitrogen and potassium. Any response to phosphorus will be in the first 2 or 3 weeks after planting. Nitrogen in this analysis is not derived from urea. The phosphorus is largely derived from MAP. In our opinion on Page 9 of the March 27, 1976 issue of the Penna. Farmer is an excellent article on row fertilizer for corn. This motivated us to produce this analysis.

Senatorial candidate wants farm assistance program

Jack W. grew up on a farm in Pennsylvania. When it came time for him to start out on his own, his natural choice was to follow in his father's footsteps and set himself up - something small, he was willing to work hard. He was a farmer.

But Jack W. was out of luck. When he started looking for land in his county he found most of it had been grabbed up housing developments, factories and roads. What was left was priced way out of his range. Everywhere he turned it was the same story.

"That burns me up," says

George Packard, U.S. Senatorial candidate. "I was born on a farm. I milked cows and brought in the hay. I know first hand that farming is hard work. We're lucky to have young people who want to go into it. If these young men and women are thwarted this way, it's going to be a tragedy for this country."

"It's an outrage - Federal tax laws are unfair - they're really an abuse of the men and women who made this country great - the farmers who continue to feed Americans despite rising costs that threaten their own survival."

Packard says he'll go to bat for the farmer in several ways. He wants to see comprehensive land use planning.

"If we don't do something, by the turn of the next century, the U.S. Department of Agriculture has estimated there will be fewer than one million farms in

this country. Federal funds should be made available to states and municipalities to be used to formulate effective land use patterns based on the needs and desires of local citizens. But zoning decisions must remain at the township level.

"We must do something for people like Jack W., who want to get into farming on their own, but are unable to because of high start-up costs."

Packard is calling for the creation within the Department of Agriculture of a Federal Farm Assistance Corporation.

"The corporation would lease family-sized farms to qualified new farmers who lack the necessary capital to enter farming. At the end of the lease period, the established farmer would buy the farm from the corporation.

To aid farmers who wish to pass their land onto their children, Packard called for

Boy Scouts to study animal science

NORTH BRUNSWICK, N.J. — Recently, in Gloucester County, N.J., a fifth herd of swine was found to be infected with hog cholera. The herd, which consisted of some 2,000 pigs,

a substantial increase in the current exemptions under the Federal Estate and Gift tax.

"The personal exemption should be raised to \$200,000 and the marital deduction to \$100,000, plus 50 percent of the estate."

Packard opposes restrictions on exports of U.S. farm products. He also called for greater fairness with regard to imports of foreign agricultural products. To maintain the competitive position of U.S. farmers, countervailing duties should be imposed on imports from countries that subsidize their agricultural production, according to Packard.

brought the death toll of infected swine throughout that county to 8,000.

During 1974, according to U.S. Department of Agriculture estimates, 6.1 million head of cattle, and 6.8 million hogs died that year. Some 1.4 million sheep also met their fate during 1974.

Each year the livestock death rate increases to such great proportions that there is mounting concern on Capitol Hill. Last year farmers and livestock producers lost millions of dollars to such livestock diseases as brucellosis (Bang's disease), enterotoxemia, swine dysentery, and equine abortion.

Agriculturalists, farmers, and the Boy Scouts of America contend that such livestock losses could be averted, provided timely, preventive, and controllable measures are taken.

In part, to combat the problem, the Boy Scouts of America has published a new, 48-page Animal Science merit badge pamphlet for Scouts.

The booklet serves as a guide to Scouts preparing to earn the BSA's new Animal Science merit badge, as well as a major reference tool for parents, merit badge counselors, and animal husbandry students.

Illustrated with black and white photos and drawings, its pages contain in-

formation on everything from the seven major breeds of horses (there are some 10 million horses in the United States), to such lineage of cattle as Holstein, Guernsey, and Jersey, the 12 major breeds of sheep and hogs, to various livestock diseases and treatment, and a subchapter on livestock management and careers. There is also a five-page bibliography recommended jointly by the American Library Association's Advisory Committee for Scouting and the U.S. Department of Agriculture, as well as merit badge requirements.

Animal Science will not only be a valuable asset to the farm-oriented Scout, but to the urban-oriented Scout as well.

The booklet, which costs 55 cents, can be obtained through the local council office, official Scout distributor, or the Supply Division of the Boy Scouts of America, North Brunswick, N.J. 08902. Please refer to pamphlet No. 3395 when ordering.

Hog cholera outbreak possibly introduced by outlawed vaccines

The use of hog cholera vaccines, which is outlawed in most states, may have caused the recent hog cholera outbreak in New England, according to officials of the U.S. Department of Agriculture (USDA).

Among states without such laws are New Jersey and Rhode Island, where hog cholera was found in late February, and Massachusetts, where the latest disease episode was noted in early March.

Federal regulations prohibit interstate shipment of cholera vaccines and of vaccinated hogs. Federal licenses to produce hog cholera vaccine were rescinded in 1971.

Deputy Administrator John Hejl of USDA's Animal and Plant Health Inspection Service (APHIS) says animal health officials have evidence that hog cholera vaccine was being sold in the New England area. "We don't have all the facts nailed down yet. We are continuing an investigation in this area," Dr. Hejl said, adding:

"I was shocked when I learned that vaccines may have been used. The reason we stopped their use more than six years ago was because we knew that in some cases they could actually introduce hog cholera into a herd. Also, vaccines mask infection, making it difficult to spot the disease before it has a chance to spread to other herds.

"Vaccines could jeopardize the whole state-federal hog cholera eradication campaign. Their

use could cause continued outbreaks of this serious swine disease, which in turn would delay eradication, threaten the pork supply of this country and cut off potential export markets for U.S. pork."

Hejl noted that exports of fresh pork to Great Britain had resumed in April 1975, when the United States had been free of hog cholera outbreaks longer than 12 months. "We had growing market with the British," he said, "and we were investigating other foreign market possibilities. This export market was shut off in July 1975 when a hog cholera outbreak occurred in Texas."

Vaccines were restricted as part of the national program to eradicate hog cholera in mid-1969 because they were causing extensive problems and there was no need for protection they might afford. Considerable progress in eliminating hog cholera has been made since then, with only five isolated outbreaks of the disease in the past two and a half years.

Hog cholera is usually fatal to swine, but affects no other farm animals and poses no health hazard to humans. Before the eradication campaign started in 1962, some 5,000 to 6,000 swine herds were infected annually.

APHIS officials urge farmers not to use vaccine and to check freezer lockers for old supplies. They should notify state or federal animal health officials immediately if any hog cholera vaccines are found. The vaccines will be picked

up and destroyed as a means of eliminating this potentially dangerous source of costly outbreaks.

State and federal animal health officials have destroyed 15 infected and 30 exposed herds of swine - involving more than 19,000 animals - to contain and eliminate the latest infection. Nearly \$2.4 million in indemnities have been paid to New England and New Jersey farmers to help compensate them for their losses.

Conservatives pick Walker

Robert Walker, Republican candidate for Congress, was endorsed Monday by the National Conservative Political Action Committee for "his strong stand in favor of fiscal integrity and his commitment to solve the problems of inflation and unemployment."

Charles R. Black, Jr., Chairman of NCPAC, in announcing the endorsement said: "After careful consideration of all candidates in the race for Congress in the 16th District, we have determined that Bob Walker is the best qualified candidate in the Republican primary."

"Walker is definitely committed to the goals of reducing runaway government spending, halting inflation, controlling Federal interference in the everyday affairs of our citizens and helping restore adequate defense capabilities of our nation."

"We are convinced," Black continued, "that Bob Walker has the maturity, judgment and experience to help lead the fight against excessive government and to

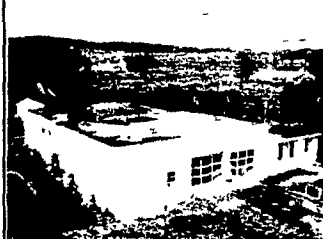

be an effective voice for the citizens of the 16th District of Pennsylvania."

The National Conservative Political Action Committee is a bi-partisan political

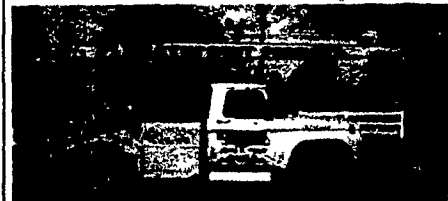

committee with over 100,000 supporters, and assists candidates who believe in fiscal integrity, free enterprise and a strong American defense.

AGROX® NOW AVAILABLE AT A REDUCED PRICE!

**Lifesaver
for seed**

AGROX® insecticide/fungicide seed treatment protects seed corn, soybeans, sorghum, beans and peas... against certain insect and disease problems your seed may face in the soil, especially in cold wet weather.

These problems include seed corn beetles, seed corn maggots, and fungus diseases that cause damping-off, seed decay and seedling blights.

AGROX 2-WAY protects germinating seeds and seedlings against them all. Due to new production economies, the price has now been reduced more than 15%.

AGROX 3-WAY gives you the same protection as 2-WAY plus control of wireworms. The price has been reduced 20%.

Both formulations are applied to seed

through the drill or planter box. No special equipment is needed. Simply mix 2 ounces of 2-WAY or 3 ounces of 3-WAY into each bushel of seed in the planter box. It's done in a few seconds. Seeding rate is not reduced because AGROX contains graphite.

AGROX protects seed against insects and provides extra protection against diseases, a dual advantage that's especially important now because of high priced seed and high replanting costs. See your dealer. Follow directions on the label.

AGROX is a registered trademark of Chipman Chemicals Ltd.

DEALER INQUIRIES INVITED

Aamodt reveals platform

"A three pronged attack is necessary to save the family farm, says Norman Aamodt, Republican candidate for Congress, who prides himself as being the only candidate with farming experience. "First, low cost loans must be made available to second and third sons in farm families to allow them to establish themselves in farming. Second, farm land must be taxed as farm land and not on the same basis as development ground. Third, a fair market must be established by promoting a competitive climate with foreign imports. Taxes which American farmers must pay are rebate to European farmers so that European farm products have an unfair competitive advantage in the world market." Aamodt proposed import tariffs to match foreign rebates.

Stressing the need for natural and moral environmental protection, Aamodt noted that the Declaration of Independence speaks of our right to "life, liberty, and the pursuit of happiness." Today, he observed, the emphasis in our country is on the pursuit of pleasure. Aamodt's campaign slogan, "You'll be happier with Aamodt in Congress," is related to his desire to bring a return to government with constitutional limits. Aamodt opposes gun control because it violates a right guaranteed by the second amendment, and takes a similar stand against abortion.

In international affairs, Aamodt stresses the im-

portance of a strong American. He sees detente as hazardous, opposes giving away the Panama Canal, and advocates a strong defense posture supported by adequate research and development to insure superiority in technology and weaponry over the Soviets.

A four term limit to congressional offices is an Aamodt proposal to keep government closer to the people. Aamodt, vowing to set the example himself by stepping down after eight years, would initiate legislation to control political dynasties created by limitless re-election of congressmen.

Married and the father of three children, Aamodt is an honor graduate of Stevens Institute of Technology and is presently farming in Chester County.

Herb garden planned for national arboretum

BELTSVILLE, Md. - The U.S. Department of Agriculture (USDA) and the Herb Society of America have completed arrangements for creating a National Herb Garden on the grounds of the National Arboretum in Washington, D.C. The announcement was made jointly recently by Dr. John Creech, Director of the Arboretum, and Mrs. Andrew Jyurovat, President of the Herb Society.

The Society will finance the project, which is estimated to cost about \$250,000, including design, construction, and development. This venture was made possible by recent passage of legislation permitting USDA to accept gifts on behalf of the Arboretum, making them fully tax-deductible.

"The Agricultural Research Service is indebted to the Herb Society of America for its generous Bicentennial gift to the American people through the

Arboretum," stated Creech. "The Herb Garden will join the other great Collections here, such as the Gotelli conifers and the Japanese bonsai, which are without parallel anywhere in the world. The new Garden will serve the public well, in educating and helping people understand the long history of herbs in the United States."

The new facility will contain a formal "knot" garden with plants arranged in intricate patterns resembling various kinds of knots. Also planned are specialty herb gardens - for medicinals, flavorings, essential oils, bees, dyes, and teas, as well as herbs used by Indians and early colonial settlers. Species roses - the old fashioned non-hybrid types - will also be featured in special arrangements.

"It is particularly appropriate to initiate such a Garden in connection with America's Bicentennial,"

said Mrs. Jyurovat. "An Herb Garden at the Arboretum will sum up the long contribution herbs have made to America's well-being, pleasure and commerce, and serve as an introduction to their new role in science."

"It will be a teaching garden, an historic garden, and a garden of the finest in design and planting. Above all, it will be a garden of inspiration and continuity and affection. Each ethnic group will discover something of its heritage here, and just as America brought a diversity of people together and enriched their lives by their being together, so will the National Herb Garden."

The Herb Society that Mrs. Jyurovat now heads was organized in 1935 and numbers about 1,100 members throughout the U.S. and Canada. Members had wanted for many years to build an Herb Garden at the National Arboretum. With the passage of the enabling legislation, they are now moving ahead to implement their hopes. According to Mrs. Jyurovat, the Society is now in the process of raising the initial \$50,000 to complete early stages of the design and construction. The Arboretum will maintain the Garden after it is constructed, and will provide a horticulturist trained in the culture of herbs.

The new facility will be located opposite the terrace of the Arboretum's Administration Building within a large, lovely meadow. The actual herb plantings will occupy probably less than one acre, including walkways and terraces, and a background of various shrubs and trees. The Garden's size and layout will permit it to accommodate fairly large groups for visits and study. The Arboretum will extend its educational programs to include herb culture and uses.

Krank sets example in campaign spending

Republican Congressional candidate Donald F. Krank announced today that his expenditures thus far for the Republican Congressional race, prepaid through April 17, 1976, the reporting date, have been \$476.85. He further indicated that he has filed a campaign report although not required to do so by law since his expenditures have been under \$1,000. Krank further stated that projected expenditures for the remainder of the campaign would not exceed \$200.00 and that he expected his total campaign spending to be slightly less than \$700.00.

Krank once again called for restrictions on campaign spending in general. He

indicated that "during the course of this campaign it has become evident that the spending imbalance creates merely an 'identity' election. As he discussed in an interview with the Lancaster New Era, he feels that a spending limit whether the funds are provided by the person individually or through contributions of \$5,000 is certainly adequate for running a congressional campaign in a three county district."

Krank went on to say that the bulk of his expenditures have been for advertising with the balance being primarily postage and printing.

Equality preached

Republican Congressional Candidate Donald F. Krank says he would, if elected, serve the residents of Lebanon and Chester Counties as well as those of Lancaster - "I think the people of Lancaster are fair minded and want all residents of the District to be served. The Press in Lancaster keeps warning everyone that if they don't unite behind their hand-picked choice - the worst of all things may come to pass - a man from another county could get elected. Everyone in all three counties deserved proper representation, and I think people in all three counties are tired of the narrow-

minded thinking that is being pawned off in the guise of impartial reporting."

Farmer wins degree

In a recent story concerning the Octorara FFA banquet, John Stoltzfus was incorrectly identified as Ben Stoltzfus. The Chester County farmer received the Honorary Chapter Degree at the awards ceremony.

Walker speaks at coffee

LANCASTER - Robert S. "Bob" Walker, GOP candidate for Congress, said this week that performance rather than image should be the yardstick by which voters measure their next Congressman.

Speaking at a coffee in the home of Mr. and Mrs. Marvin Humphries, 1550 Country Club Drive, Lancaster, Walker said that "a known quantity is the best guarantee of legislative quality."

"Several of my opponents have emphasized integrity and honesty as a part of their image building campaigns, but my unblemished record of 10 years in the public eye speaks for itself."

"An opponent has called

for full financial disclosure by Federal officials, but I'm the only candidate who has put his personal finances on public record," Walker said.

"Some of my opponents have talked about their capacity for legislative leadership, but I have demonstrated my ability to provide that leadership."

"All of my opponents have spoken out against special interest, but I've done something about limiting special interest power by limiting campaign contributions to \$100."

"Actions still speak louder than words, and performance should be more important than public relations images," the candidate stated.

"When the people chose a Congressman, I'm confident that they will consider a man's record more important than campaign rhetoric," he concluded.

Konhaus Farms produce champion turkeys

By DIETER KRIEG
MECHANICSBURG — Starting with a kitchen sink for a processing facility, and the back porch as a sales room, Paul Konhaus has seen his turkey operation grow to the point where it is totally diversified and complete.

Turkeys are a way of life for the middle-aged and exceptionally modest man. He started with just a few back in the 30's, and today raises, processes, and markets 30,000 per year.

What's more, they have won quite a few prizes. At this year's Farm Show, for example, Konhaus Farms showed the grand champion — a 41-pound 6-ounce tom which was later donated to the Crippled Children's Hospital at Elizabethtown.

Farming a total of 500 acres, of which close to 200 are rented, Konhaus raises all of his own corn. A group of 10,000 birds will eat up to 24 tons of feed per week just prior to marketing when they've reached the desired

size. In addition to corn, his feed consists of soybeans, concentrate, and additives. Corn is stored and dried on the farm and the entire ration is mixed right on the premises.

The turkeys are brought in when they're a day old and are shifted from one house to another according to age. There's more to it than what one would first assume, according to Konhaus' son, Paul Jr. He explained that lots of new strains of birds come out each year and keeping up with them is a task in itself. But it must be done if high quality turkeys are the goal. The family's large collection of trophies, ribbons and plaques — some of which are on display at the farm store — attest to the sharp eyes involved in the Konhaus turkey business.

The younger Konhaus noted that a strain is picked on the following criteria: broadness of breast, strength of legs, bloodlines, and body conformation. Each year the idea is to get a turkey which is broader and has better conformation than birds did the year before.

Konhaus Farms' manager for the past 30 years, Gerald Brown, claims there's not much to raising good turkeys. "Good common sense," he says, is what most of it is. But that's not to say that there isn't a lot of work involved or that problems never arise. There are enough of both to keep everyone on the farm on his toes.

The first few weeks of raising a new flock of poults are the most difficult. Diseases are more likely to occur during early stages and maintaining proper temperature is highly critical, explained Brown.

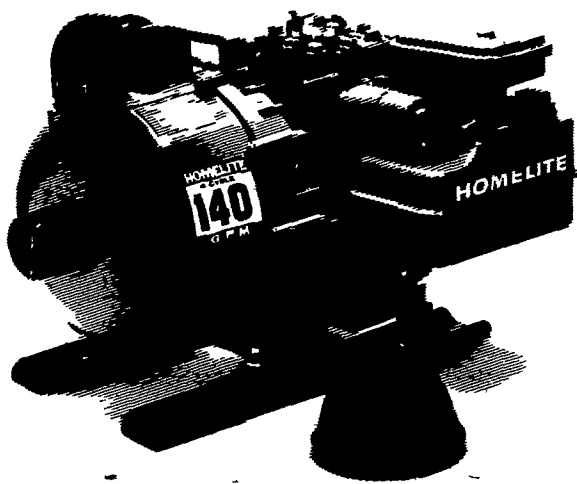

Day-old poults are raised with the aid of heaters which maintain a temperature of 100 degrees Fahrenheit. After the first week the thermostat is taken back 10 degrees every seven days until a level of 60 to 70 degrees is reached. After four to six weeks the young birds are moved to another barn, and from there again to the next, according to age. At the end of an 18 to 20 week

Paul Konhaus, Jr., left, and Gerald Brown, manager of the Konhaus Turkey Farm for 30 years, display one of their larger turkeys. Their grand

champion at the Farm Show weighed 41 pounds and six ounces and was later given to the Crippled Children's Hospital at Elizabethtown.

Homelite® plastic pumps move corrosive and abrasive liquids fast.

Self Priming General Utility Pump for Farms, Buildings and Industry.

Rugged design uses reinforced thermoplastic for pump body, volute and impeller help resist impact wear and corrosion. Use the 200 series for pumping liquid fertilizers, herbicides, and pesticides the 300 series for abrasive liquids (sand, mud, gravel) without fear of corrosion.

- Four models to choose from with either 1½" or 2" discharge and output capacity of 6,000 or 8,400 g p h respectively
- Total heads up to 95 ft
- All wear surfaces are rubber-coated aluminum for long service life
- Built-in check valve permits fast re-priming
- Single cylinder 4-cycle engine has splash lubrication and manual choke
- Automatic rewind starter

Corn is first choice

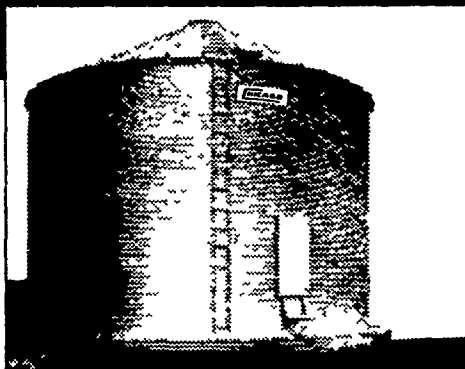

ANNAPOLIS - Maryland farmers, who reaped a record corn harvest last year, say they will go in for even more plantings for 1976. That is the highlight of the April 15th prospective plantings report issued last week by the Maryland Crop Reporting Service and State Department of Agriculture. Farmers planting intentions polled April 1st show that some 700,000 acres of corn will be planted in Maryland this year, up some nine percent from 1975.

Correspondingly, farmers say they plan to cut their soybean plantings some 19

percent to 260,000 acres and cut their barley acreage some five percent to 107,000 acres for 1976 from the acreages they devoted to these crops in 1975.

Three other key crops covered in the report issued show little or no change over 1975 planting intentions. Oats acreage for this year is estimated at 28,000, the same as in 1975; tobacco plantings are estimated to hold the same as last year at 23,000 acres and hay acreage at 255,000 represents a two percent increase over last year.

Chicago has what you want in a grain storage and drying system:

Chicago storage bins are the only bins that give you:

SELECTION Choice of 11 different diameters with capacities from 1800 to 48,000 bushels.

UNIQUE ROOF DESIGN Chicago's trend setting roofs serve as both a weather enclosure and support system. An increased number of deep rib roof sheets and steep pitch give super strength.

EXCLUSIVE DOOR DESIGN Only Chicago offers a hot dip galvanized fully welded man size walk-in door with 5 hinged inner panels as standard on all bins.

WALL STRENGTH Heavy gauge corrugated 40,000 psi minimum yield galvanized wall sheets double bolted with high strength heat treated bolts. Optimum corrugations per foot for added strength.

THE GOOD WORD from the Bible

For which cause we faint not; but though our outward man perish, yet the inward man is renewed day by day.

For our light affliction, which is but for a moment, worketh for us a far more exceeding and eternal weight of glory;

While we look not at the things which are seen, but the things which are not seen: for the things are seen are temporal; but the things which are not seen are eternal.

11 Corinthians 4: 16-18

Bake sale planned

The Northern Berks 4-H club is holding a bake sale at Bethel on May 1.

At the club's last meeting, held at the home of Mr. and Mrs. John Stump, Bernville R2, each member took a turn at clipping a calf.

The next meeting will be held at the home of Edward Wicks on May 7.

Pinch potatoes to make sure they are firm, not leathery or spongy, two signs that they have been frozen or improperly stored.

Wildfire problem increased during early days in April

HARRISBURG — Penn-
sylvania's wildfire problem
increased considerably over
the past week with an ad-
ditional 415 fires reported
throughout the Com-
monwealth, the Department
of Environmental Resources
announced this week.

Statistics provided by the
Department's Division of
Forest Fire Prevention now
show a total of 1,020 wildfires
since the beginning of 1976
compared to 482 for the same
period of time in 1975.

Wildfires during the past
week, from Monday through

Lancaster Farming, Saturday, April 24, 1976—95

Sunday night, involved 3,528
acres making a total of 6,691
acres swept by fire so far
this year. Some 1,284 acres
were burned over during the
same period of time in 1975.

A breakdown of the
number of fires reported
over the weekend - from
Good Friday to Easter
Sunday, - was not available
but the Division assumed
that a large majority of the

415 fires reported occurred
during those three days.

Earlier in the week, prior
to the opening of the trout
season on Saturday, the
Division warned fishermen
of the fire hazard and asked
that they be extremely
careful with fire. The
fishermen cooperated and
only one fire, caused by an
angler, was reported.

— SPECIALIST IN YOUR FIELD —

New Jersey professor is national winner

3 Marylanders named 'spokesman of the year'

Three Maryland residents affiliated with agriculture have been selected for national recognition in the 1975 "Spokesman of the Year" contest, sponsored annually by the Chervon Chemical Company and Farm Chemicals magazine.

Two of the award winners are faculty members in the Division of Agricultural and Life Sciences at the University of Maryland in College Park. The third honoree is a livestock producer and grain farmer in the Upper Bay area of northeast Maryland.

Four national winners were selected in the open section of the contest. Named as winner for the

Eastern region of the U.S. was Henry S. Holloway of Darlington, Md., currently serving as first vice-president of the Maryland Farm Bureau, Inc.

Holloway received a hand-carved trophy and cash award from a Chervon Chemical Company official on March 24 during a Rotary Club Farmers Night program in Bel Air.

In recent years, he has hosted many groups at his farm to help gain a better understanding for agriculture. These have included youth delegations, meat boycotters and family participants in the annual statewide Farm Visitation Day each June since 1968.

During the past two or three years, Holloway has appeared on 10 television and radio programs in the Baltimore metropolitan area to help promote better public understanding of farm policy issues and cost-price considerations. He has also participated in a radio talk show aimed at consumers. And he is often quoted in local and area newspapers.

Holloway is a past president of the Harford County Farm Bureau organization and past chairman of the county soil conservation district. He currently holds membership on the county's land use planning advisory council.

The personable farm spokesman and his wife represent the fourth generation of the Holloway family living in the old Holloway homestead, built in 1805. Fifth-generation Holloways in the household include Henry, Jr., 17, a budding Chester White 4-H and FFA swine breeder; his sisters, Teresa, 13, and Judy,

Henry Holloway, right, has taken the farmer's story directly to the consumer on many occasions, including TV appearances. He believes it's important for farmers to do their part in striving for a better understanding between farmers and consumers. The public-relations

minded farmer gives much of the credit to his brother Richard, left. The two farm close to 700 acres in partnership. "If my brother weren't here to keep things going, I wouldn't be able to tell agriculture's story in town," the award recipient remarked.

Decisions up to local people, ASCS banquet-goers are told

LEBANON - The Lebanon County Agricultural Stabilization and Conservation Service (ASCS) Committee held its annual banquet recently at the Mt. Zion Fire Hall.

John Stick of Lebanon R2,

was awarded a 10 year service award for his participation on the ASC County Committee. Stick had to retire from the committee because of a recent congressional decision that a committeeman may not

serve more than three consecutive terms of three years each. He was known for being outspoken for the conservation of farmland and for his work in preserving our nations natural resources. The award winner served most of the ten years as chairman.

Even though Stick had to retire from ASCS he will still actively maintain his farming operation near Fredericksburg.

Also receiving an award was Earl Kurtz of Newmanstown for serving 15 years with ASCS. Kurtz had to retire because of an age requirement.

Leroy Blouch of Jonestown was presented a Certificate of Election for being elected as the new member of the County Committee for a three year term. He was elected to serve as chairman.

Receiving awards at the recent Lebanon County ASC banquet were, left to right, Earl Kurtz, 15-year service award, and John Stick, 10-

year service award. Leroy Blouch, right, was elected chairman of the county committee.

The main speaker for the evening was Richard Arnold Pennay, State ASC Office Conservation Specialist.

This being the bicentennial year, Pennay spoke on the "200 Years of Agricultural Progress" in the United States.

He pointed out that lime and chemical fertilizers were responsible for the development of agriculture in this country and that through the liming program provided by the U.S. government was the beginning of the Agricultural Stabilization and Conservation Service. In the early days of this country nine out of ten people were farmers. Today three out of one hundred are farmers but as Pennay quickly stated, "because of the technical advances, agriculture is still one of the leading industries of this nation."

Pennay pointed out that the early education leaders of this country were instrumental in developing agriculture. They were agronomists in that they studied crop rotation, liming practices and drainage problems. They were inventors in developing a seed drill, moldboards for plows

and even a threshing machine. Even our educated farmers of today can produce a surplus of food for ourselves with exports available to other nations.

What is going to happen to agriculture in the next 200 years?, Pennay asked the group of 75 in attendance. "We have to be concerned with land development and our conservation problems," he quickly answered. "It is up to our local people," our county ASC Committeemen and farmers to consider our food problems of tomorrow.

Let us never forget that the cultivation of the earth is the most important labor of man.

Ag research programs funded

HARRISBURG - The Agriculture Research Committee recently approved continuing 18 projects for fiscal year 1976-77 at a cost of \$372,655, it was disclosed last week by Pennsylvania Agriculture Secretary Raymond J. Kerstetter.

Kerstetter, who was elected chairman of the nine-member committee, noted that less than \$28,000 would be available for new projects to be considered for approval sometime next month. Funds for agricultural research are derived from a yearley appropriation of about \$400,000 from harness and horse racing proceeds.

"Last year ten new projects were approved," observed Kerstetter. "The committee felt they were good projects worth continuing. That is why there are few funds left over to initiate new projects."

The largest project to be continued is Producer-Consumer Marketing, a project shared by Edinboro College, the state Department of Agriculture and

Opportunities Industrialization Center (OIC) at a total cost of \$91,190. The project was launched last year at a cost of \$120,705.

Edinboro College has been investigating the legal, insurance and taxation problems facing buying clubs. The college is also trying to form a federation of buying clubs in northwestern Pennsylvania. Edinboro was awarded \$25,190 for its share of the research, \$7,000 below its original request of \$32,190.

OIC, a manpower training organization, is involved in coordinating city buying clubs and in training men to work in cooperative warehouses and other food receiving and distribution points. OIC was awarded \$50,000.

The Agriculture Department, which has a task force working on the development of direct marketing between primary producers and consumers, cut its own request from \$40,000 to \$16,000.

A sewage sludge project at

Pennsylvania State University had the next largest share of research funds for its continuation with an award of \$50,500. The project, considered important because it may offer a twin solution to the mounting cost of waste disposal and fertilizers, involves the testing of sludge samples from six treatment plants around the state.

Besides direct marketing and sewage sludge, other projects approved for continuation are:

Computerized forecasting of potato late blight to minimize pesticide use, \$11,069, Penn State; maize germ plasm study, \$4,170,

Penn State; control of cork spot in apples, \$17,400, Penn State; poultry waste and egg and chick contamination, \$15,470, Penn State; tomato production, \$4,988, Penn State; beef forage practices, \$15,081, Penn State; production of grapes for wine, \$12,760, Penn State.

Also, methane gas production from farm waste, \$17,539, Penn State; wheat spindle streak mosaic disease, \$13,215, Penn State; canned mushroom spoilage, \$25,000, Penn State; corn stalk rot, \$22,350, Penn State; horse respiratory disease, \$20,068, University of Pennsylvania; chronic diarrhea in horses, \$20,554,

University of Pennsylvania; rural studies information program at eight colleges, Mansfield, Bloomsburg, and Lock Haven Colleges, Pennsylvania State University, Lycoming College, Susquehanna

University, Bucknell University and Williamsport Area Community College, \$5,950; conifer pests, \$14,683, Agriculture Department; and bovine leukemia, \$10,488, University of Pennsylvania.

Recovery seen for Soviet grain outlook

WASHINGTON - Soviet grain production this year should recover sharply from 1975's disastrous crop, if weather is fairly normal, according to a report released recently by the U.S. Department of Agriculture's Economic Research Service (ERS).

A grain crop of 205 million metric tons is targeted by the Soviets - 65 million metric tons above the actual 1975 harvest, but 10 million below what was planned for

that year. ERS analysts judge that based on past trends in grain yields, the Soviet goal could be achieved under normal conditions from about 124 million hectares, which would be somewhat less than the area harvested last year. This year's winter grains suffered above average damage from cold weather, but soil moisture supplies in the eastern spring grain area are better than at the beginning of the growing season last year.

Market hog evaluation guide published by NPPC

After two years of work by swine and meat specialists from 13 states, a new uniform guide for evaluating market hogs is being released by the National Pork Producers Council.

"Procedures to Evaluate Market Hogs" is a 20-page

booklet produced by the NPPC in cooperation with the American Meat Science Association, animal geneticists, animal scientists and related industry personnel from across the country. Most of the work on the procedures was done by

NPPC's Evaluation Coordination Committee.

"For some years there has been a growing demand for a uniform system of evaluation. A system where the basic figures from production and carcass test information could be inserted and information obtained for comparison and industry improvement," J. Marvin Garner, NPPC executive vice president and chairman of the committee, said.

"The committee has presented this procedure as not the ultimate or perfect system, but as a basis from which we hope to assist the pork industry in developing a better system."

Dr. R. G. Kauffman, meat specialist with the University of Wisconsin and committee member, explained that the intent of the

guidelines is to identify market pigs that excel in both production efficiency and carcass desirability.

"The procedures include methods for combining production records, live visual appraisal and carcass characteristics," Kauffman said. "It is believed that such an approach will measure excellence in genetic improvement and practical swine management. It should also improve the efficiency of administering contests, especially in the collection and interpretation of carcass data."

Kauffman added that the guidelines should also supplement efforts presently being made to improve market pigs through on-the-farm testing, central testing stations, breed improvement programs, live-carcass competitions of excellence

Questionable sales made

Reports have been received by EPA that high-pressure telephone salesmen have been misrepresenting the use and quality of Federally registered products in soliciting sales of pesticides, mostly herbicides, to farmers.

These practices started as early as March 1974 and have been intensified in first one state and then another. Their unsubstantiated claims included assurances that the product could be used with crops, would provide at best three to six

years of weed control, and they failed to indicate that the product was in diluted strength.

Most farmers who ordered the herbicides, or agreed to take them, found upon delivery that the label did not confirm the claims of the telephone salesman. In practically every instance the label specifically read for "non-crop" use.

Reports received to date indicate that sales promotions have been directed in the State of New York, West Virginia, Georgia, North Carolina, Kansas, Iowa, Nebraska, Colorado, Arizona, California, and Nevada.

In most cases, the products are Federally registered and the labeling complies with the requirements for ingredients of the pesticide product. State permits to sell the product have been obtained by the distributors. The manufacturers are apparently not involved, only the distributors who obviously are operating paper companies under more than one name and sometimes with the same officers and address.

The salesmen decline to give the names or location of the distributor they represent, to leave their telephone number or to furnish printed information on their product.

It is impossible for legal action to be taken without documentation, which is only verbal contact between salesman and farmer.

The best way for a farmer to insure that he is not "taken" by these deceptive practices is to follow these rules: 1. Read the label before purchasing. 2. Order only from a known dealer or a responsible catalogue company.

and other evaluation activities.

"The information provided in the guidelines is not the final answer to market pig evaluation," Kauffman said. "It is a reflection of opinions collectively agreed upon by several representatives of the industry, supplemented by suggestions from producers, meat processors and educators. As the industry progresses and new information becomes available to support the need for changes, revisions will be made."

The guidelines feature a four-page, full-color centersection illustrating loin eye area and fat depth at sixth and tenth rib, backfat thickness, seam fat scores, marbling scores, color scores and a skinned defatted ham. Also included is a recommended data collection form.

Anyone interested in obtaining a copy of "Procedures to Evaluate Market Hogs" should write the NPPC at 4715 Grand Avenue, Des Moines, Iowa 50312. The price per copy is 80 cents. The full-color centersection is also available in volume numbers of 10 or more at 10 cents each.

Manor FFA holds awards banquet

The sixteenth annual Manor Chapter FFA banquet held recently opened with the invocation by Steve Witkowski followed by the evening meal. The banquet then moved to the opening ceremonies led by the 1975-76 officers.

Ron Hunt, president, gave a warm welcome to everyone present. After the welcome entertainment was presented by the freshman class.

The presentation of awards followed.

Skip Rice was awarded honors for winning the local Creed Contest. Prior to receiving his award he recited it for the entire audience.

Awards of appreciation went to persons who helped the Chapter during the year. Persons receiving this award were as follows: Robert Kendig, David McMichael, Robert Herr, Rich Herr and Robert Long. The certificates were handed out by Rick Hunt.

The Honorary Chapter awards went to the following persons: Harry Breneman for entering all of the Manor Chapter projects at the Lampeter Fair; Jay Landis for helping to set up the Chapter with a chain calf and providing a place for dairy judging. Melvin Shertzer for giving our dairy judges a place for dairy judging and providing seed corn for the Chapter. These awards were presented by the incoming president Craig Harnish.

The Dekalb Award was presented to Ron Hunt for being the outstanding ag student. Ron has participated in a number of projects such as corn and tobacco crops, he raises swine and steers. Ron also held the offices of reporter, assistant sentinel, corresponding secretary and president. Richard Trout presented this award to Ron.

This year's Bankers award was presented by Ron Bucher, Farm representative of the Commonwealth National Bank. The award was received by Jeff McMullen who is a top Agricultural student at Penn Manor.

The Chapter's outstanding Agricultural Program was handed out by Chris McCarty. This award went to Carroll Herr for his outstanding projects and farming program.

The Hunting contest award was won by Jim Risser. Over the past year Jim scored the most points for his skill in getting game.

The Citrus Sales award went to Carroll Herr. This is Carroll's fourth year for winning this award. The freshman award went to Paul Funk. These awards were presented by Bob Hess.

Jeff McMullen presented the FFA Foundation awards for outstanding projects. Awards went to Chris McCarty for Ag Placement, Dean Neff for swine and Rick Falk for beef.

The dairy team awards were presented by Mr. Burton and these awards were given to Bruce Landis, Steve Witkowski, and Ron Hunt. These students placed second in the State of Pennsylvania competition and 1st place in the North Atlantic.

The chain gilt awards were given out by Jim Breneman and received by Fred Charles, Dave Charles, Mike Gerlach, and Lesley Harnish.

The chain calf was given out by Bruce Landis and received by Steve Shertzer and Doug Zimmerman.

The chain bees were given out by Dean Neff and received by Steve McMichael and Dave Stauffer.

The chain lambs were given out by Steve Charles and received by Kevin Kilheffer, John Mylin and Mark Sweigart.

The chain corn was given out by John Myers and received by Richard Haines, Leslie Harnish and Steven McMichael.

Steve Shertzer presented the Star Greenhand award to Mark Sweigart while Bob Hess presented the Star Chapter Farmers award to Jim Breneman.

The Star Red Rose Farmers award was presented to Bob Hess by Carroll Herr. Bob also was the Star Red Rose Farmer of the County. The Manor Chapter had fourteen Red Rose Farmers.

Dr. Elmer J. Berkebile presented five Keystone awards this year. Those receiving this high award were Ron Hunt, Carroll Herr, John Sabatine, Jeff McMullen and Chris McCarty.

Mr. Harold Herr a former recipient of the American Farmer award and a graduate of Penn Manor presented the American Farmer Award to Mr. Greg Landis, the first in nine years.

A special award was presented to Mrs. Burton by Mr. Ornstein for being cooperative with Mr. Burton's job. Mr. Burton is not home very much.

The FFA speech was given by Craig Harnish who said,

Logging safety celebration set

The Pennsylvania Forestry Association and The Pennsylvania Logging Safety Council have set the week of April 26-30, 1976, as Logging Safety Week in Pennsylvania.

A special film on the proper handling of a chain saw in felling, trimming, and cutting trees was made on location in Pennsylvania and will feature Mr. Tommy Holms of Sweden a professional representative of the Sandvick Company. The film will run 28 minutes. Additional entertainment will be provided by Country

and Western musicians and door prizes will be given.

The fun filled evening is open to the public and especially to individuals or families involved in the sawmill and logging industry.

Local Committee members and arrangements have been handled by: Ray Brooks, chairman, Glatfelter Paper Company, Spring Grove, and Earl Renninger, secretary, Richfield.

The Logging Council's primary concern is on-the-job safety to prevent injury.

Prevention is the goal and the Council requires members to pledge to recognize the hazardous nature of working in the profession of logging. With this recognition goes the responsibility to do everything in their power to eliminate potential accidents by regular inspections of all equipment, including trucks, tractors, rigging and hand tools, and preventive

When mowing your lawn, make sure the mower is sharp. A dull mower may tear out the new, weakly rooted grass plants.

maintenance of their equipment to insure the safety goal.

Logging Safety Week programs will be conducted in the following communities and are open to interested individuals in the surrounding counties.

April 26th - West Branch Area High School, Allport,

Penna. 7:30 p.m.; April 27th - Kane Country Club, Kane, Penna. 7:30 p.m.; April 28th - American Legion, Bedford, Penna. 7:30 p.m.; April 29th - Shade Gap Fire Company, Shade Gap, Penna. 7:30 p.m.; April 30th - New Elementary School, Tunkhannock, Penna. 7:30 p.m.

Fish-wildlife conference slated for April 26-29

Pennsylvania will host the 32nd annual Northeast Fish and Wildlife Conference at Hershey April 26-29. The conference will attract an audience of over 800 scientists, professional resource managers, field personnel, business executives and state and federal government officials in the fields of renewable

natural resources from 15 northeastern states and five Canadian provinces.

These sponsoring organizations will hold their annual meetings concurrent with the conference: Northeast Section, The Wildlife Society; Northeastern Division, American Fisheries Society; Conservation Law Enforcement Chiefs Association; Northeast Society of Conservation Engineers; Northeast Conservation Information and Education Association; and the Northeast Association of Fish

Farm productivity

Some statistics on the importance of agriculture appeared in the Agway Cooperator, a publication put out by this large cooperative. It points out one U.S. farmer feeds 56 people. This was not always so. In 1920, one farmer produced enough to feed about 8 people and by 1960 he had increased his productivity to feed 25.

and Wildlife Resource Agencies.

The Pennsylvania Game Commission and the Pennsylvania Fish Commission will be the hosts.

You can see there has been quite some improvement

If you put it another way, each American consumer will spend about 17 cents of the tax income dollar for food in 1976. The article goes on to point out that the outlook is for about the same relationship all the way through to 1980 if we can keep inflation under control. 1972 was the low with 15 cents. It was 20 cents in 1960 and before 1920, it was 40 cents. It is not this way in other parts of the world. In Russia, it still takes nearly 50 cents today.

AGWAY

CORN STARTER

**PREPARED SPECIFICALLY TO
HELP GET YOUR CROP OFF TO
A FAST, STRONG, EVEN START:**

- ★Corn Starter is an ammoniated grade of plant food. Each particle is a complete fertilizer. You avoid the potential crop damage that could be caused by using simple blended materials high in urea and diammonium phosphate. (Blends are ideal for plow-down and side-dress . . . not for row application!)
- ★Corn Starter is fortified with zinc, with magnesium and with extra boron, the three "minor" elements most likely to be lacking and those most important during early development of the plants.
- ★Corn Starter is high in water-soluble phosphorus. A major key to a successful crop is plenty of phosphorus in highly available form, as growth begins. Agway Corn Starter supplies it in the form that is most needed.
- ★Corn Starter is economical. It doesn't take tremendous quantities of Agway Corn Starter to do the job. In fact, a maximum of 200 lbs. per acre is recommended. You get results and economy with Agway Corn Starter in the planter box.

**Don't chance a poor start. Help assure an energy-packed corn crop with the
one fertilizer designed to get things growing right . . . Agway Corn Starter.**
